

Mini Shark

Mini Shark is the smallest and lightest of our drones, and it is a man-portable solution that allows it to take you everywhere with you. While packed with the same advanced tech as any other our drone, it enables you to do most of the tasks required by the modern environment, just in a bit smaller form.

Take-off weight	5 kg
Wing span	2600 mm
Length	1250 mm
Height	260 mm
Flight duration	2h
Communicational range	up to 35 km
Operational altitude	1000 m
Stall speed	42 km/h
Cruising speed	55 km/h
Maximum flight speed	120km/h
Sensor type	EO camera
Zoom	10x (optical)

The operational temperature range of the UAS is from **-15 °C to +45 °C**.

The USG-261 Gimbal is our smallest and lightest solution, specifically for small UAVs of any configurations. It is equipped with a lightweight FullHD high-quality camera.

- Day-view camera Full HD
- 10x optical zoom
- Anti-fog
- Target tracking

USG-261 weighs only **400 grams** but has all the advantages of a full-size gimbal.

USG-261

MOBILE CONTROL STATION

- UAV control laptop
- ground communication equipment
- portable battery station
- tripod

UAS IS DESIGNED FOR:

- carrying by two people in backpacks
- taking off by starting from the hands of the operator
- fuselage landing
