BARCELONA

## what is BRIDGE?

BRIDGE is Font Barcelona's new collection of decorative electrical mechanisms.

BRIDGE follows the style of 5.1 collection by Font Barcelona, but the main difference between both collections is on the mechanism.

The distinctive sign of 5.1 Collection is the design of the toggle mechanism (Red Dot award winner 2013).

The distinctive sign of this new Bride collection is the design of the rocker. We've developed a new mechanism in order to include a rocker instead of a toggle.

Plates and rocker finishes are the same as 5.1 collection.

## following the current design trends

We want to make switches the ultimate complement in every interior design project.

BRIDGE Collection is the perfect product following latest decoration trends such as *minimalist, architecture design, pure, avant-garde design.*

Strong character, marked by geometric proportions of its rocker

Its form evokes a bridge that join design, ergonomics, simplicity and tradition

## filling a gap in the market

Font Barcelona has focused all the efforts in producing a value-added products based on the design of our products.

The design of the toggle of 5.1 collection was awarded the Red Dot 2013.

The market can offer you different range of products similar as 5.1 collection: metallic plates (brass, aluminium, stainless steel) but basically all of the competitors use toggle mechanisms.

No other product in the market updates this kind of products in such a minimalistic contemporary rocker thus filling a gap in the market and in our own catalogue.
