Fisrt step to entering the Ukrainian market

## Solidarity act to improve your corporate image

Opening a virtual office is solid support for the Ukrainian people in their fight against unlawful Russian aggression. Such a step ameliorates your company's corporate image, putting it in line with global companies such as Gucci, Visa, Apple, Netflix, or IKEA.

It will be appreciated by your clients & partners, especially international ones.

Numerous reports from prominent financial institutions show that those companies that supported Ukraine saw increases in their ESG rankings.

## Fisrt step to entering the Ukrainian market

Compared to opening a trade representation in a war-time country, a virtual office does not foresee any risks to your company.

After Ukrainian victory, Ukraine will become a popular destination for many investors. Thanks to Western aid, Kyiv will fund many powerful projects to improve Ukrainian economy and rebuild the country.

Your chance is to prepare now, to be in a better position than everyone else when these days come

**PREPARE NOW**

# WHY DO YOU NEED UKRAINIAN MARKET?

40 million people / Second largest country in Europe

Even though Russian Aggression against Ukraine severely harmed the Ukrainian economy, it also paved the way to market reorganization.

Some "old big players" found themselves in debt and trouble, and Ukrainian businesses suddenly wanted to import things for which there was never a significant demand.

Consequently, all Ukrainian market segments are being changed, so your company has all chances to integrate into it. As old production chains are changing, local firms will not have such a comparative advantage as in any other country you may consider.
