

“
Does TIBA support multiple software installation types?
”

Of Course We Do!

TIBA's Flexible software architecture allows for ultimate choice in how you deploy your PARCS solution. Our SmartPark management platform powering your system is the most adaptable technology on the market — meeting the strictest of site requirements, facility dynamics, and deployment criteria. Plus, TIBA's local technology experts partner with your team to take the time required to assess and determine the best set up for your facility — both current and future.

Software installation solutions for all use cases:

- On-premise deployment with onsite servers — for site controlled operations
- Virtual environment deployment — local or off-site, installed in client's VM location
- Serverless, cloud deployment — SaaS, cost efficient, secure, reliable, updates/upgrades at no additional cost
- Hybrid on-premise and cloud model — for ultimate scalability and control

TECHNOLOGY & FLEXIBILITY

Contact TIBA today to see how you can achieve an Engaged Parking Experience!
