COMPANY TIMELINE

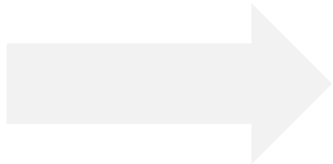

OUR MISSION

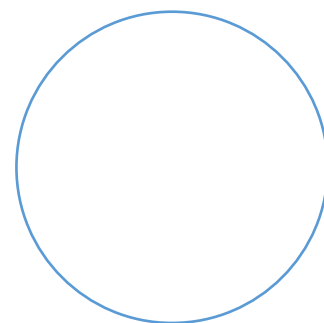

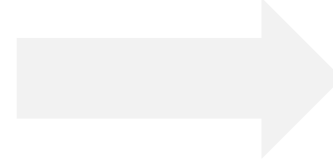

OUR TEAM

OUR SERVICES

OUR PRODUCTS

UAV AS A SERVICE

# Our story

**At the outbreak of a military conflict in the Eastern Ukraine in 2014, a group of people with different abilities, knowledge and skills came together with an idea to deliver a military-grade UAVs to support Ukrainian Army.**

**Initial attempts to import foreign «military» UAV solutions failed, facing strict export regulations and the only choice was to start a development of our own UAS.**

**After the years of hard work and a number of attempts — we created a great product that widely uses by Ukrainian Army.**

# Company Timeline

During our history we have always built our products based on demand of our existing and potential clients from all over the world

**2018**  
**FIRST FOREIGN CONTRACT**  
PD-1 VTOL delivered to the foreign MOD

**2018**  
**New facility**  
Move into the new, more comfortable and roomy office and more than 1800 m<sup>2</sup> production facilities

**2020**  
**UAS Components**  
New project launched with components, payloads and sub-systems for UAS

# Our Mission

**Assist commercial and government customers to use UAV technologies in the most efficient way**

# Our key values

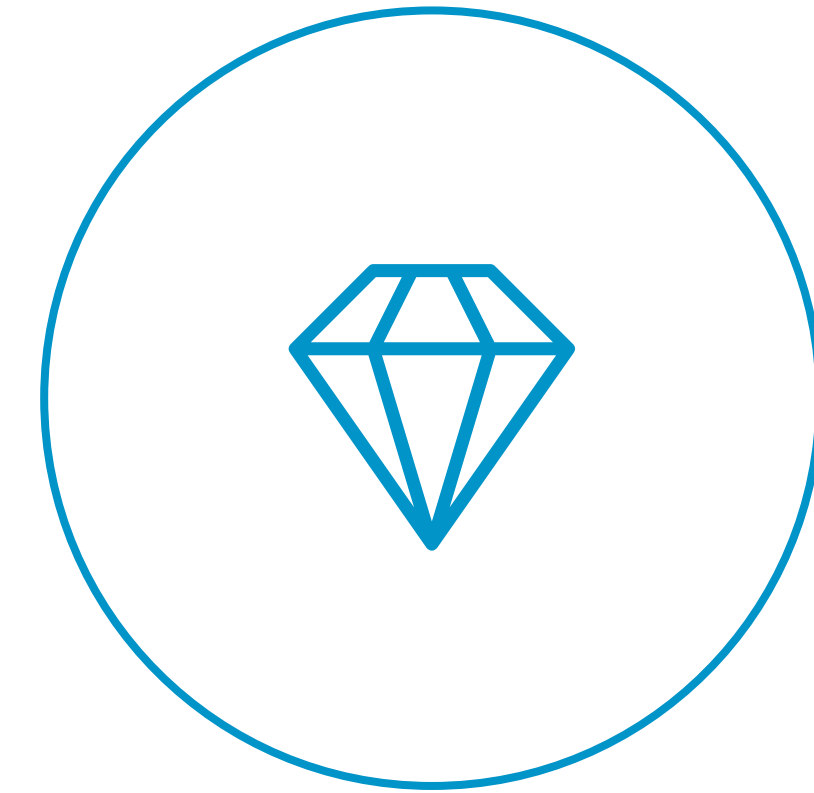

---

**Analyze end-users  
experience  
and issues they are faced  
with**

**Improve products with the  
demand-driven  
developments**

**Deliver reliable and  
cost-effective solutions**

# Ukrspecsystems Team

**Currently Ukrspecsystems employs over 140 experienced professionals that are engaged in development, production, assembly and testing of unmanned aerial vehicles and payloads.**

**A wide range of experts with the strong technical base allows us to cover all tasks from development and prototyping of new products to the implementation of serial production in short period of time.**

**We have two facilities (2100 sq. m.) in Kyiv, Ukraine and try to keep as much processes in-house as possible to ensure highest quality standards.**

Since  
**2015**

- UAS
- Training
- Servicing
- Repairs

Proud official supplier of  
**Ministry of Defense of Ukraine**

# Export capabilities

Our company has government license to export our goods and services directly to end-users.

We can export:

- Unmanned aerial systems
- Training services
- Technical support
- Technologies

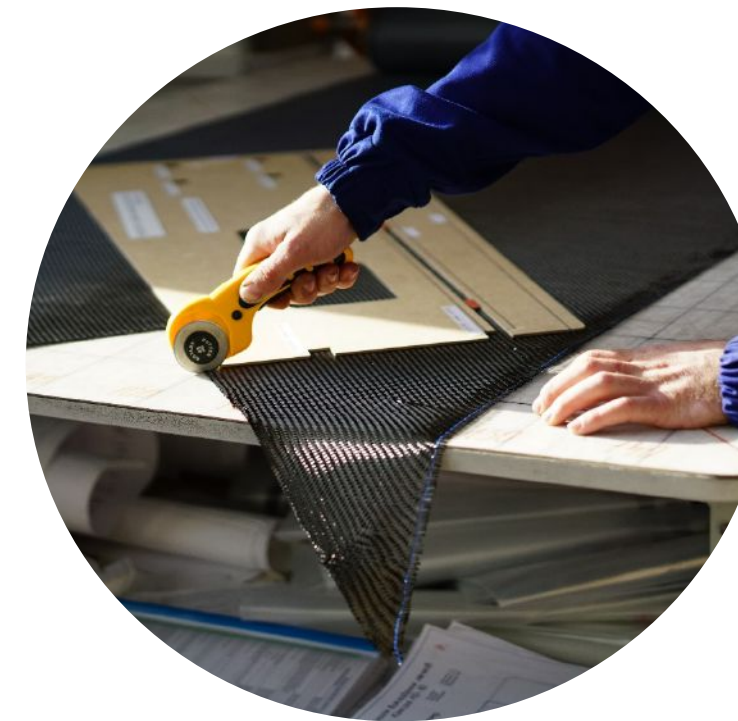

# Ukrspecsystems Departments

Our key activities lay in the following areas:

Research &  
Development

Composite Production  
Department

Engineering department

UAV assembly  
department

Payloads Department

Administrative department

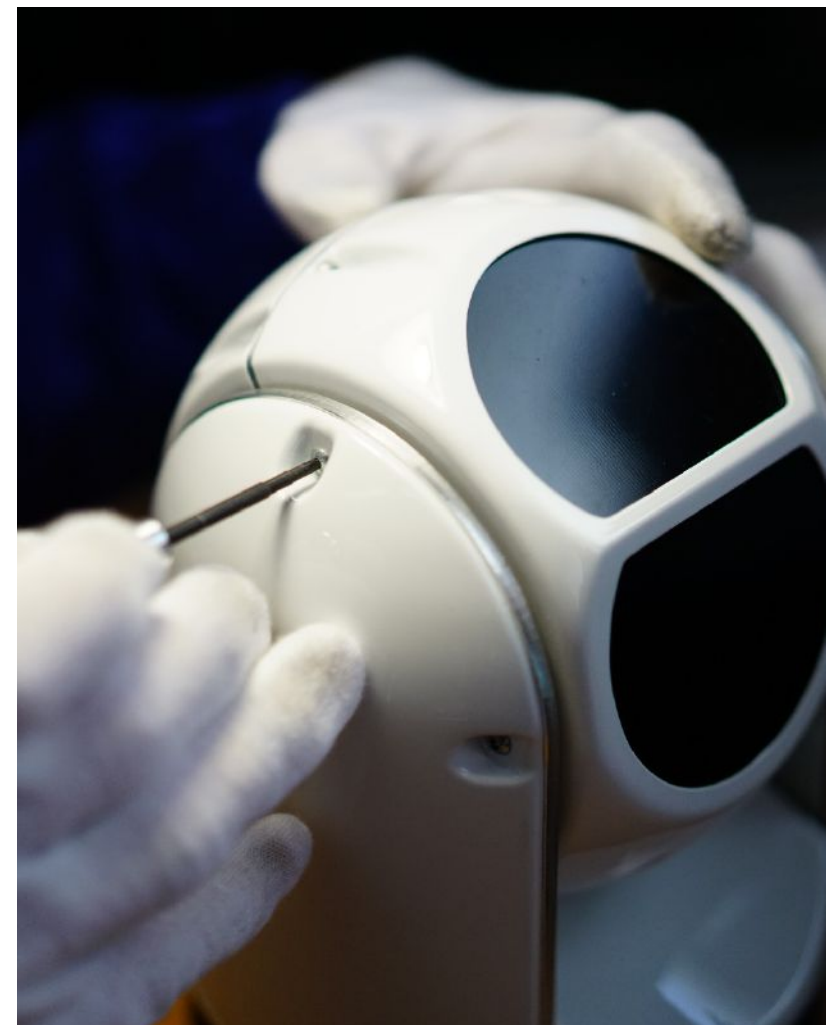

# What We Do?

---

**Fixed-wing  
VTOL UAV production**

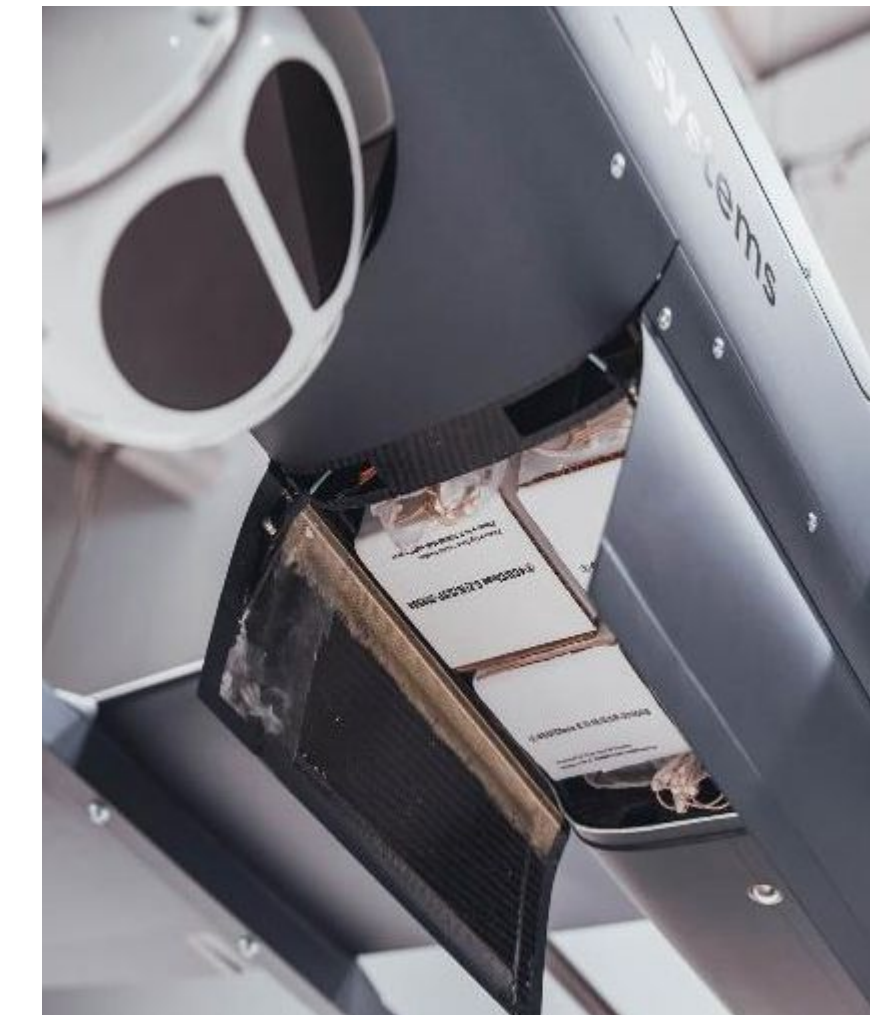

**Drone payloads &  
components  
production**

**Payload and  
electronics  
integration**

**Complete drone  
operator training  
course**

**Drone as a service**

# PD-1 Unmanned Aerial System

PD-1 Fixed-Wing VTOL UAV

---

Conventional takeoff and landing

Catapult launch & parachute recovery

Vertical takeoff and landing

PD-1 Fixed-Wing VTOL UAV configurations

# Leleka-100 Unmanned Aerial Systems

## Proven and reliable small electric UAV

- 2.5 hours endurance
- 60 km range
- EO/IR payloads
- Encrypted datalinks

# UAS Components

A division of our company focused in delivering high-quality components for your drones.

## High-quality components for your UAS

- Camera payloads
- Tracking antenna
- Video link
- Airframe
- Engine unit
- And much more

[www.uascomponents.com](http://www.uascomponents.com)

# UAS Components products

A division of our company focused in delivering high-quality components for your drones.

USG-212

EO/IR camera payload.

USG-211

EO camera payload.

VPB

Real-time UAV video processing module.

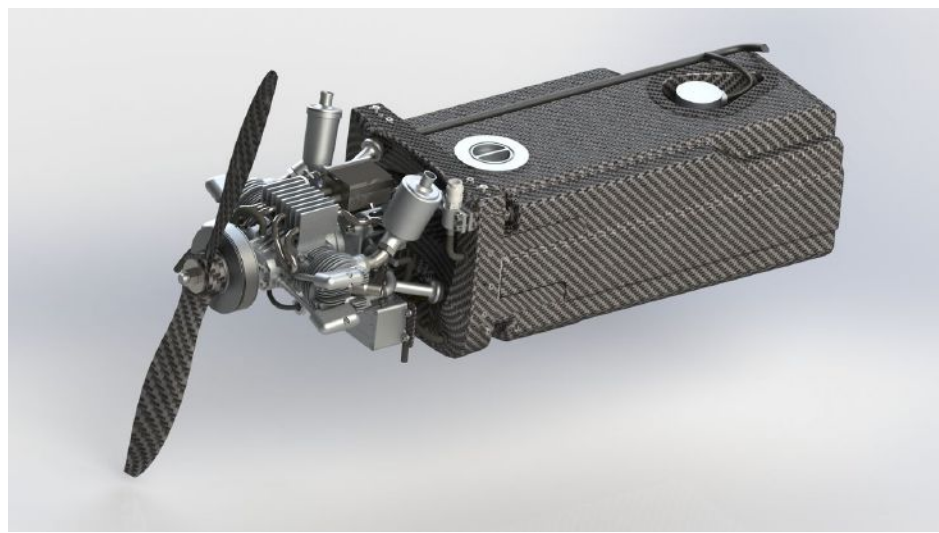

Tracking antenna

Precise tracking antenna.

Composite airframe

Fully composite airframe.

Engine unit

Advanced engine module for UAV.

Video link

Long-range video downlink for UAV.

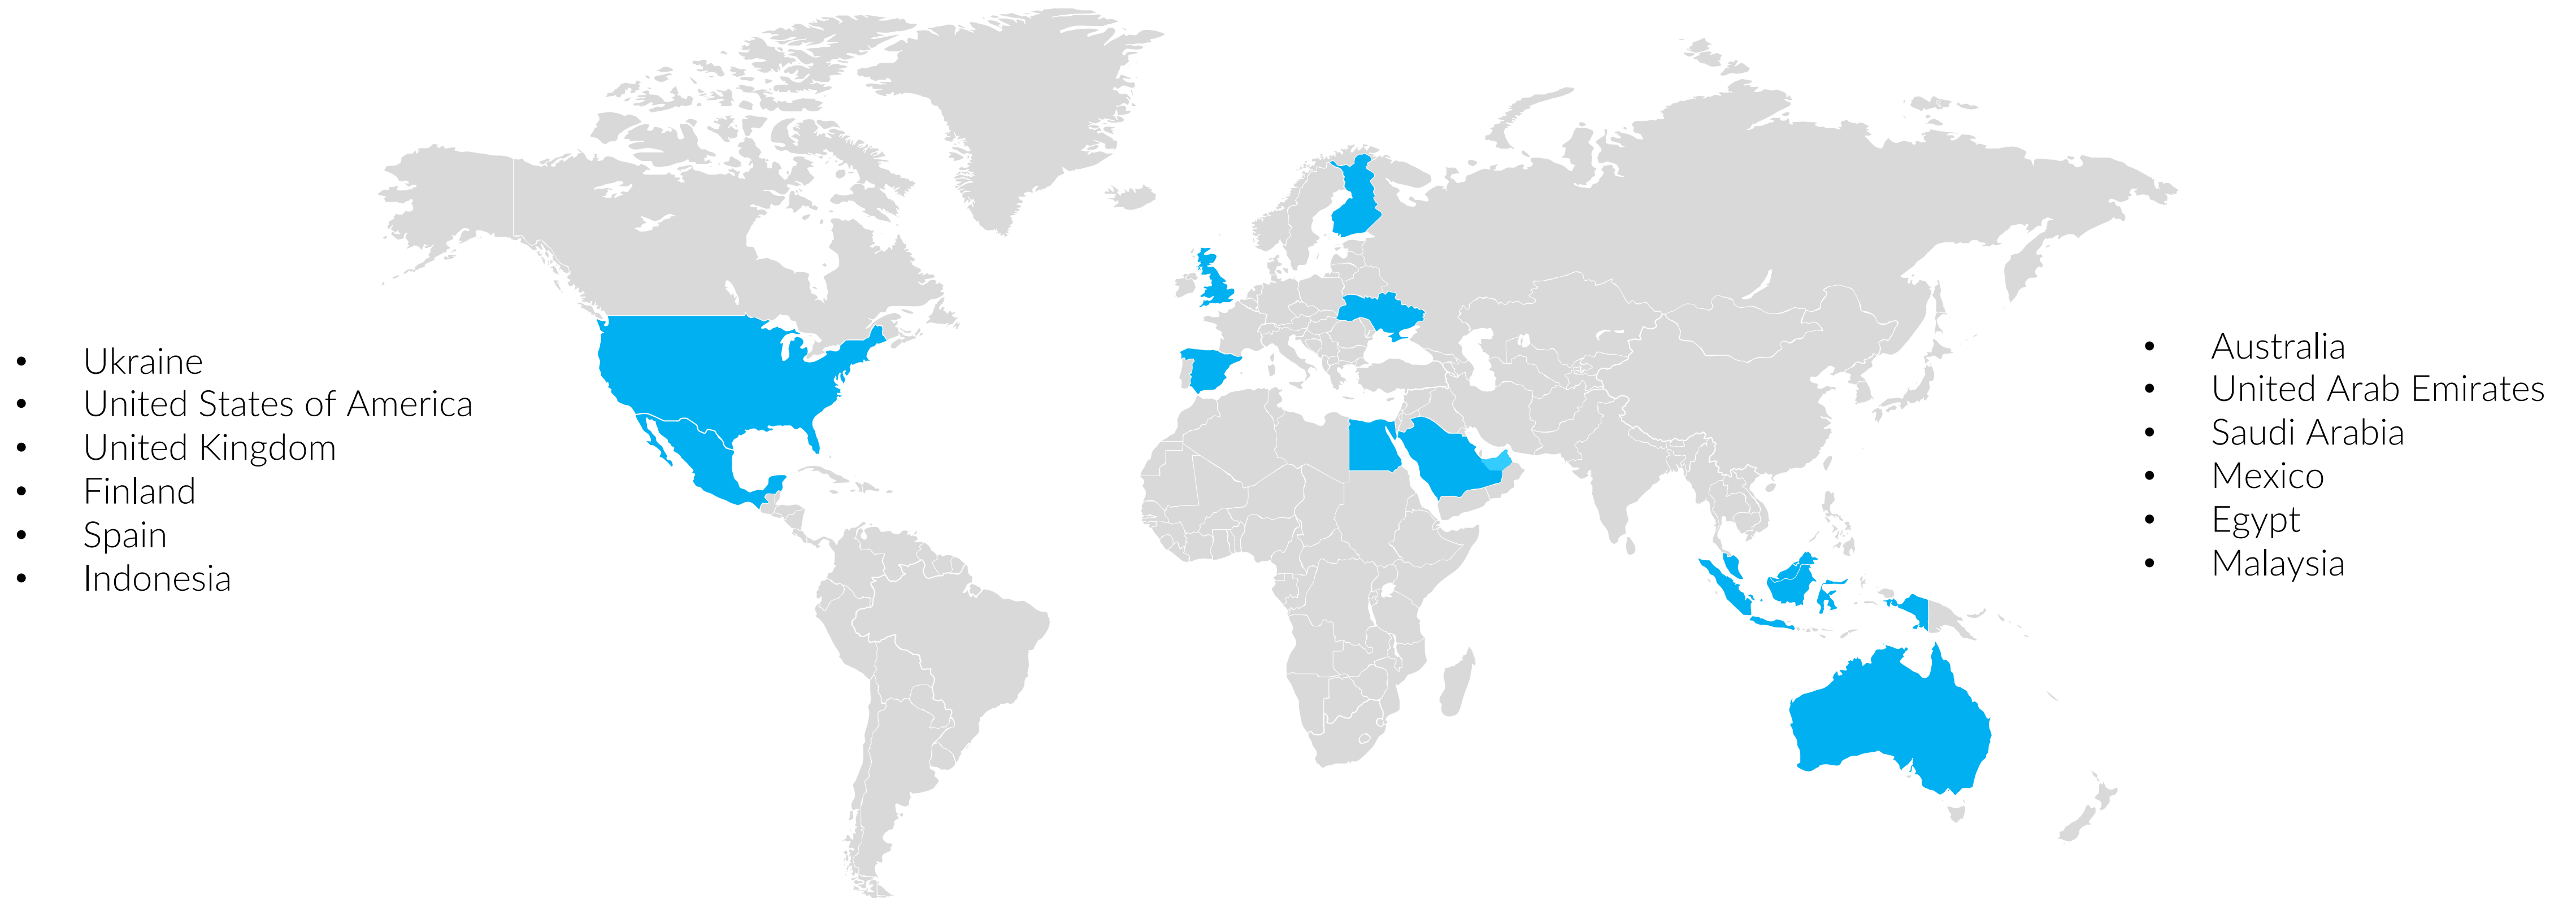

Catapult launcher

Pneumatic catapult launcher for drones.

# Worldwide Presence

Our products are currently in use in different parts of the world.

## Headquarters

30/32 Zhylianska str.  
Kyiv, Ukraine 33336
