

Mini Shark UAS

MINI SHARK is the smallest and lightest of our fixed-wing drones, and it is a man-portable solution that can be taken anywhere. Equipped with the same advanced tech as any other our drone, it enables you to do most of the tasks required by the modern environment, just in a bit smaller form.

Take-off weight 5,5 kg
Wing span 2600 mm
Length 1250 mm
Height 260 mm
Flight duration up to 2 h
Communicational range ... up to 35 km
Operational altitude 1000 m
Cruising speed 55 km/h
Maximum flight speed 120 km/h

Operating temperature range of UAS
-15 °C to +45 °C

The USG-261 gimbal is our smallest and lightest solution, specifically for small UAVs of any configurations. It is equipped with a lightweight Full HD high-quality camera.

- Day-view camera Full HD
- 10x optical zoom
- Anti-fog
- Target tracking
- Gyro- and digital stabilization

USG-261 weighs only 300 grams but has all the advantages of a full-size gimbal.

USG-261

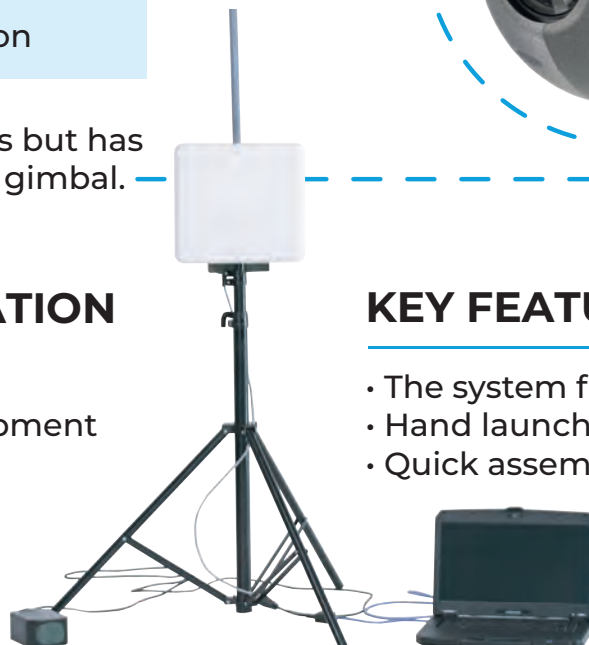

MOBILE CONTROL STATION

- UAV control laptop
- Ground communication equipment
- Portable battery station
- Tripod

KEY FEATURES

- The system fits into 2 backpacks
- Hand launch and belly landing
- Quick assembly
