

MINI SHARK

UAS

**UKRSPEC
SYSTEMS**

in advance

HAND LAUNCH 35 KM RANGE

The smallest, lightest, and sneakiest in the pack of our fixed-wing drones. This EDC solution is designed to act smart on the fly.

EO/IR Gimbals Line

Our advanced gimbal systems provide exceptional clarity and detail, both day and night. With 10x optical zoom and high-performance IR capabilities, you'll capture every crucial moment.

Belly Landing

Built for the real world. With an automatic belly landing feature, MINI SHARK lands itself safely and quickly without extra gear.

Intelligent Software

Our intelligent software learns from every mission, enhancing performance and reliability. Focusing on user experience, it minimizes errors and maximizes control.

Easy Launch

Get airborne in seconds. MINI SHARK requires just one operator and no extra equipment. Launch it anytime, anywhere.

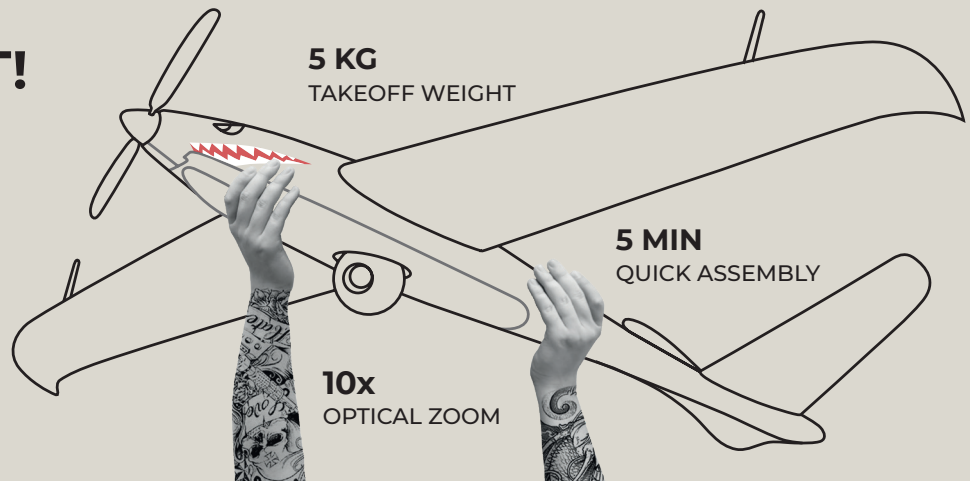

MINI SHARK

MAXI IMPACT

While others bulk up, the MINI SHARK remains compact yet potent. Equipped with the same technology as its larger counterparts, it is **perfectly suited for prompt reconnaissance and surveillance operations.**
