

### Investment Objective

The Fund is designed to deliver a real return of US CPI +4.5% net of fees over the long term, with an appropriate level of risk.

### Investment Policy

The Fund intends to achieve its investment objective by investing globally, primarily via other collective investment schemes, in a wide range of asset classes including cash, fixed income, equities, property, commodities and asset allocation portfolios. The Cell may also invest in transferable securities which are classes of investments that are negotiable on a capital market such as (but not limited to) shares in companies or bond investments.

\* The Total Expense Ratios (TERs) are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. The TER to 31.03.24 is based on data for the period from 31.03.23 to 31.03.24 and the financial year-end TER is based on data for the financial year-end to 30.06.23. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.                                                                                                                                                                                                                                              |

equity exposure than lower risk/conservative profiled portfolios. High risk portfolios therefore tend to carry more volatility and expected potential long-term returns could be higher than other risk profiles, in turn potential losses of capital could be higher. For low risk /conservative portfolios, expected potential returns could be lower but with less volatility. |

| <p>Collective investments are generally medium to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future.</p> <p>Collective investments are traded at ruling prices. Commission and incentives may be paid and, if so, would be included in the overall costs. All performance is calculated on a total return basis, after deduction of all fees and commissions and in US dollar terms. Forward pricing is used.</p> <p>The Fund invests in other collective investments, which levy their own charges. This could result in a higher fee structure for the Fund.</p> <p>Deductions of charges and expenses mean that you may not get back the amount you invested.</p> <p>The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.</p> <p>Notwithstanding ongoing monitoring of the underlying funds within the Fund, there can be no assurance that the performance of the funds will achieve their stated objectives.</p> <p>The Fund will contain shares or units in underlying funds that invest internationally. The value of an investor's investment and the income arising from it will therefore be subject to exchange rate fluctuations.</p> <p>The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realisable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund's dealing days.</p> <p>No borrowing will be undertaken by the Fund except for the purpose of meeting short term liquidity requirements. Borrowings will not exceed 10% of the net asset value of the Fund. For such purpose, the securities of the Fund may be pledged. No scrip borrowing will be allowed. The Cell is not permitted to enter into any form of borrowing or loan arrangement with other cells of the Company nor other collective investment schemes of the Manager.</p> <p>Forward contracts are neither traded on exchanges nor standardised. Principals dealing in these markets are also not required to make markets in the currencies they trade, with the result that these markets may experience periods of illiquidity.</p> <p>The Manager has the right to close the Fund to new investors, in order to manage it more efficiently, in accordance with its mandate.</p> <p>Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment.</p> <p>Investors are reminded that any forecasts and/or commentary included in this MDD are not guaranteed to occur, and merely reflect the interpretation of the public information and propriety research available to the Investment Manager at a particular point in time.</p> <p>This report should be read in conjunction with the prospectus of Momentum Mutual Fund ICC Limited and the supplement, in which all the current fees and fund facts are disclosed.
