Plaster dismantling list

Not.	Type	Height (mm)	Area (m ²)	Volume (m ³)
Db	Part of the ventilation channel	3790	3.5	0.43
Dsh	Plastering	3720	224.3	4.48

- - wall levelling
- - installation of new walls

Installation list for vertical structures, false walls and partitions							
Not.	Type	Width (mm)	Profile (mm)	Filling	Cladding	Height (m)	Square (sq.m)
Mw1	G/C partition wall	150	100	Minwool	2 sheets of G/C on both sides	3.72	1.52
Mw2	G/C partition wall	125	75	Minwool	2 sheets of G/C on both sides	3.42/3.72	43.82
Mw3	Raised wall G/C	100	75	Minwool	2 sheets of G/C from the room side	2.40/3.72	3.09
Mw4	G/C partition wall	100	50	Minwool	2 sheets of G/C on both sides	2.40/3.72	0.65
Mw5	Raised wall G/C	75	50	Minwool	2 sheets of G/C from the room side	0.55/2.9/3.72	21.96
Mw6	Brick infill	120	-	-	levelling tinting layer	-	3.62

For detailed heights of structures, or niches in them, see the scans and axonometries

- Notes:
1. All walls are anchored with a levelling layer of 15-20 mm tinting, or see additional dimensions on the plan.
 2. All dimensions must be checked on site. The contractor shall report any discrepancies or omissions in the pre-construction plans during the construction phase.
 3. All dimensions, markings and references shall be verified on site.
 4. All elevations are in relation to the finished floor elevation.
 5. Before manufacturing and installing the partition in the wardrobe, make the final measurements on site.
 6. Use moisture-resistant gypsum plasterboard in the bathroom.
 7. In damp rooms and in the bathroom, use a coating waterproofing up to the standardised height.

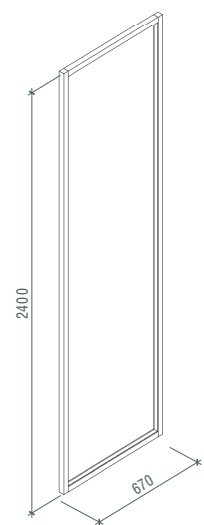

Specification for filling doorways						
Not.	From the opening side	Opening direction	Width of opening (mm)	Height of opening (mm)	Name	Quantity
D1		П	900	2800	Flush-mounted door, white, RAL-9010	2
D2		Л	900	2800	Flush-mounted door, white, RAL-9010	1
D3		П	900	2800	Flush-mounted door with reverse hinges, white, RAL-9010	2
D4		П	900	2800	Flush-mounted door with reversible hinges, white on the opening side, RAL-9010, and red-brown, RAL-8004	1
D5		Л	900	2800	Flush-mounted door with reverse hinges, white, RAL-9010	2
Dp			965	2700	Door leaf cover, white, RAL-9010	1

Door leaf overlay Dp, exact size to be measured after the fact, also approve the colouring with the customer and project developer!

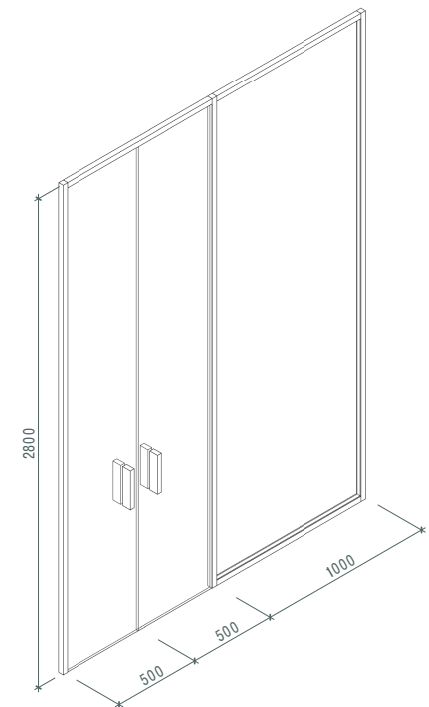

Notes:

The schemes of glass partitions are approximate and subject to refinement upon installation of the structures.
 The detailed view, opening, tinting are to be specified by the Customer and the project developer.
 Consider together with project visualisations.

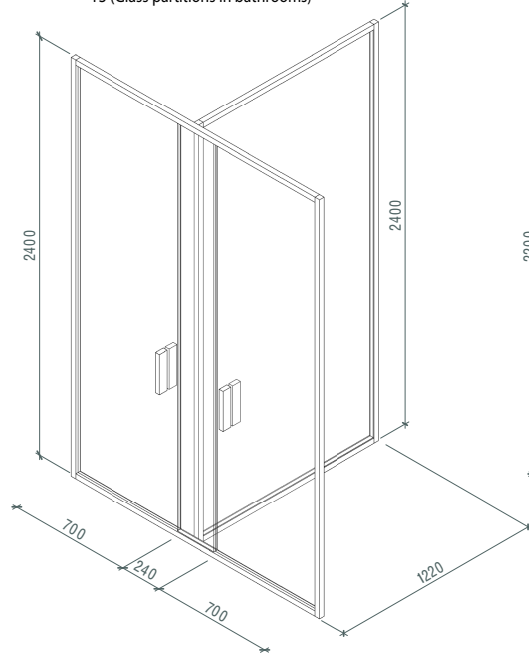

T1 (Glass shower partition)

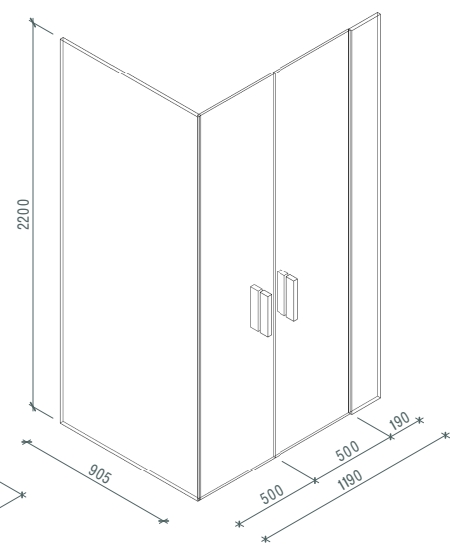

T2 (Glass wardrobe partition)

T3 (Glass partitions in bathrooms)

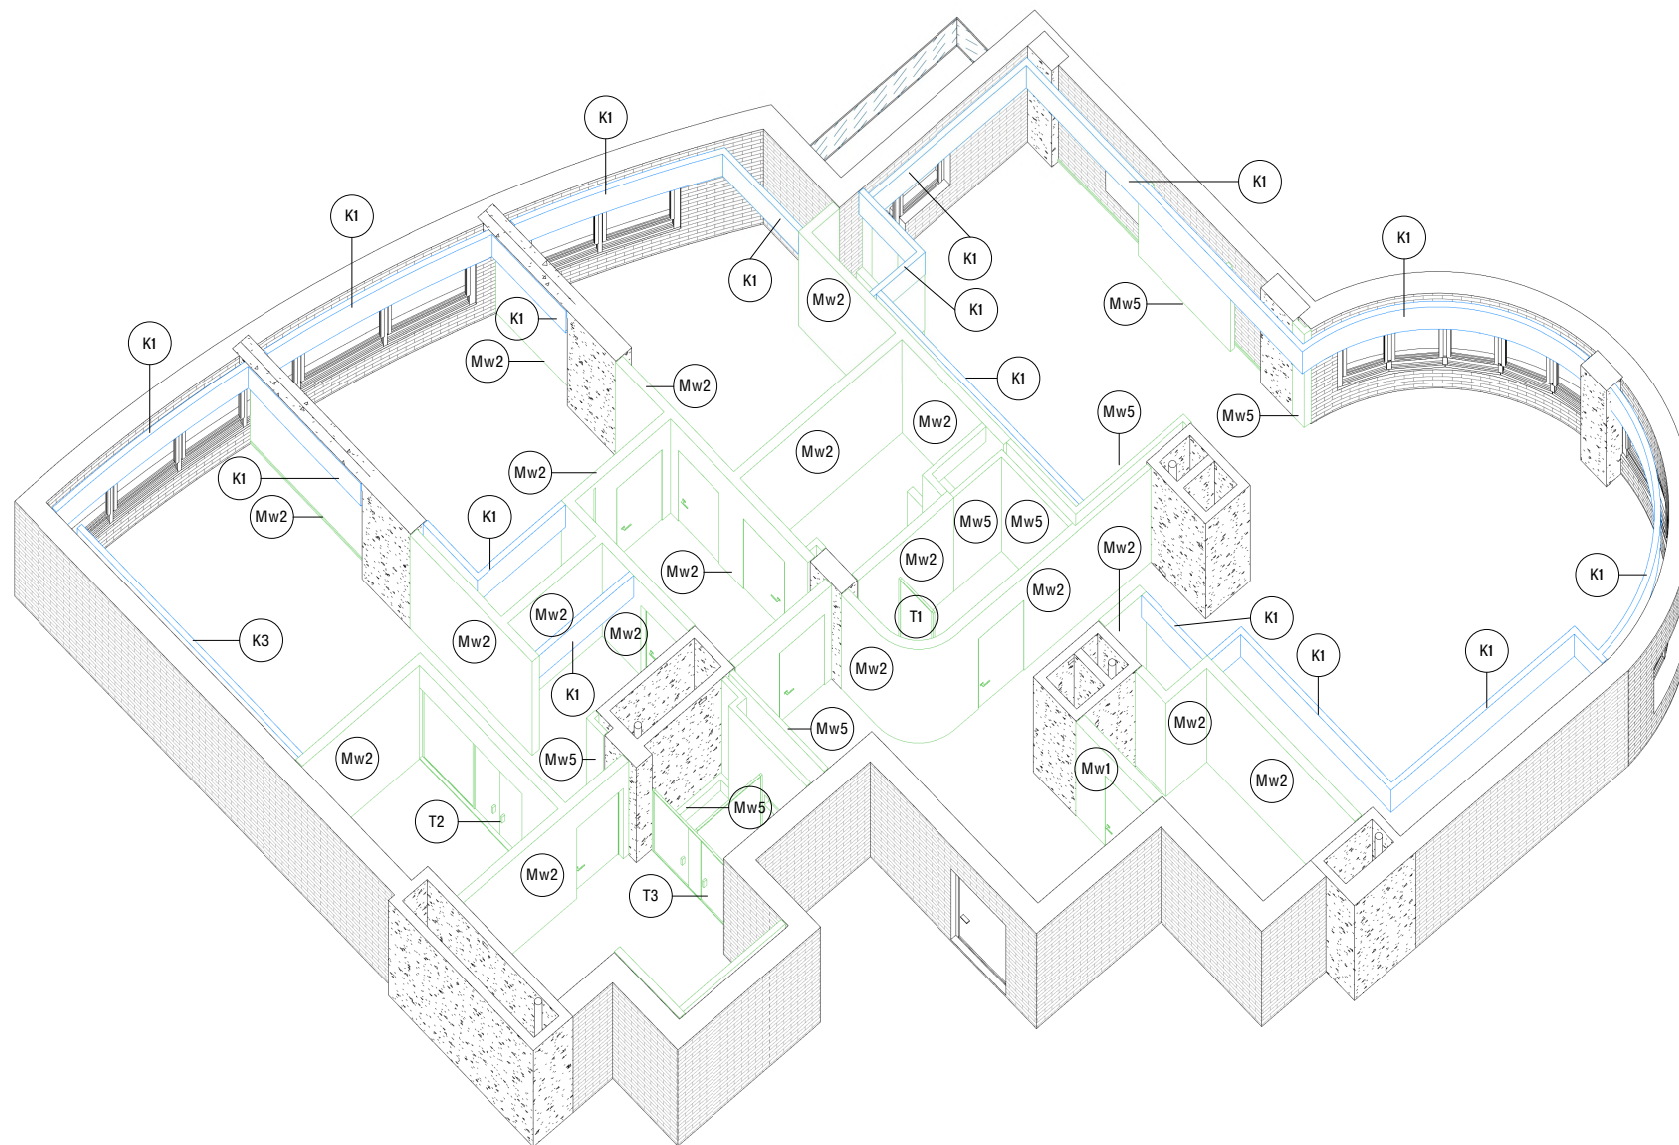

T4 (Glass partitions for plants)

Symbols and notation

-  - boxes
-  - installation of new walls

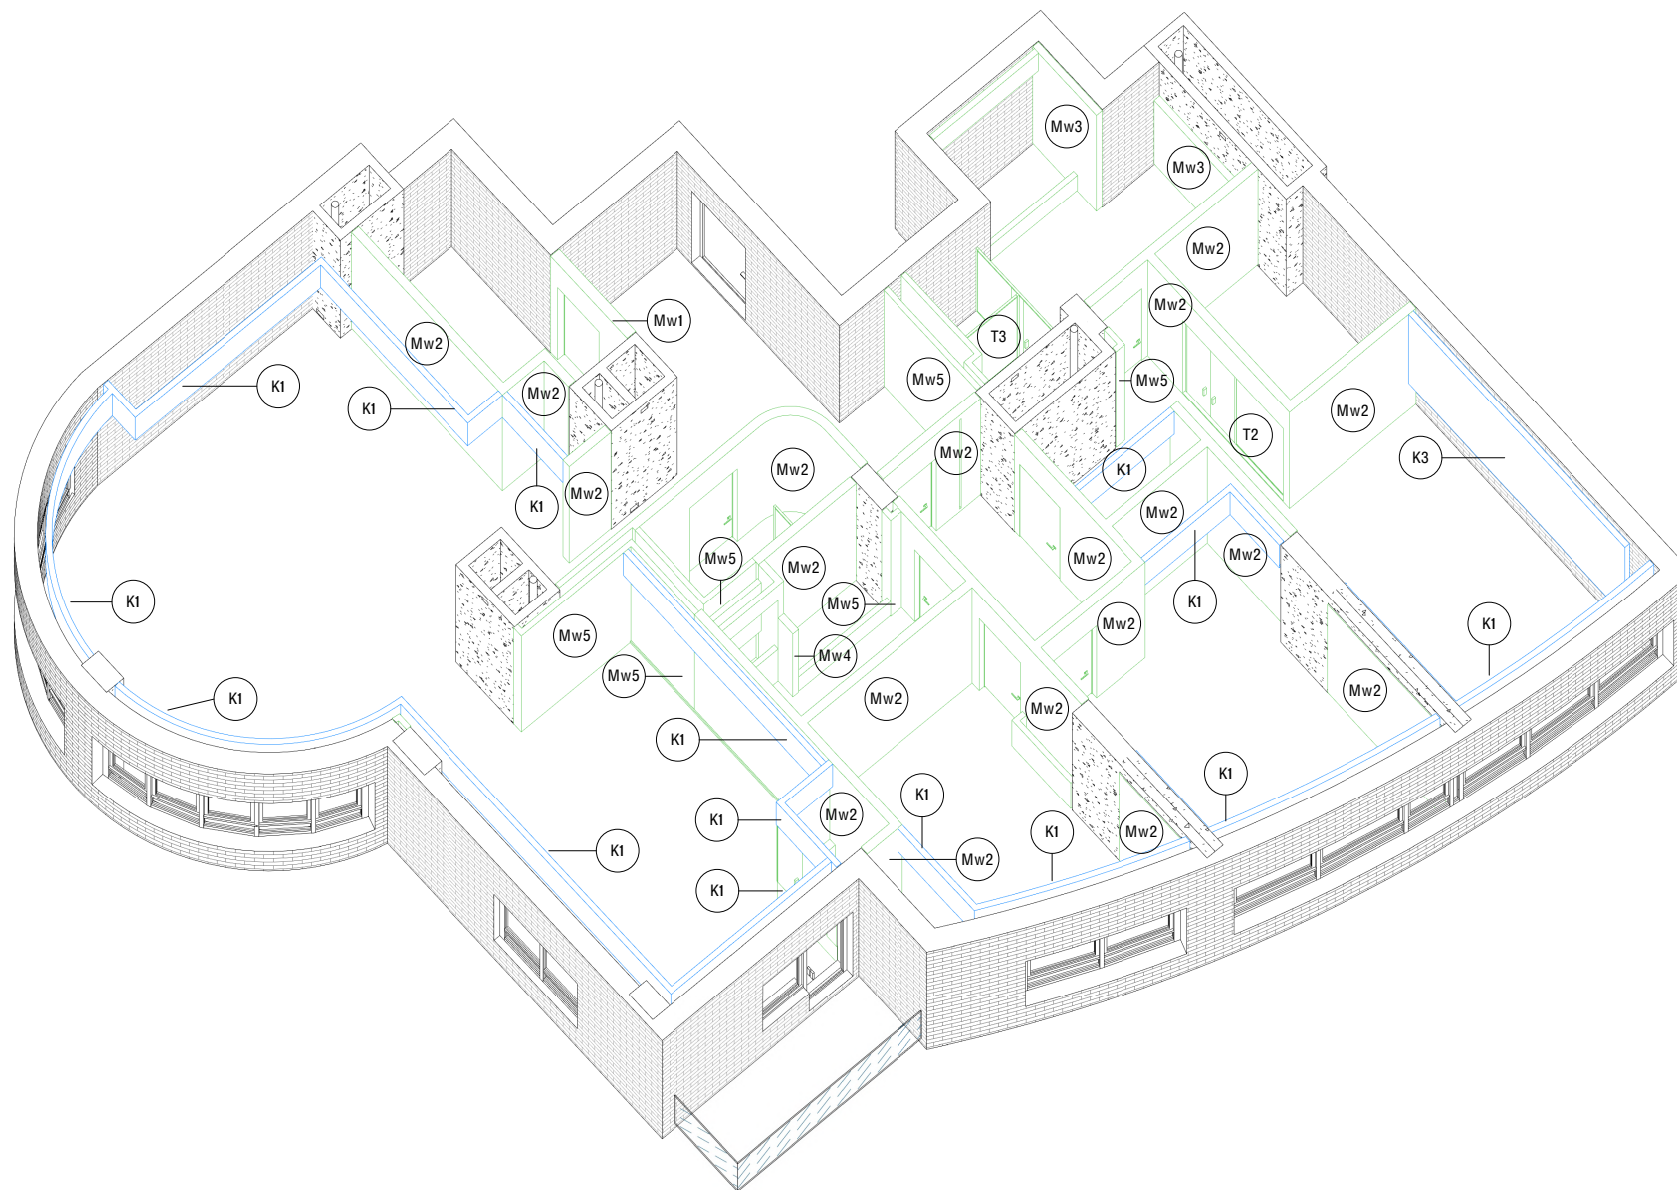

Isometric installation diagrams

Design Project / Apartment / "Park Avenue VIP" Residential Complex, Kyiv, Holosiyivsky Avenue, 58-A

- Notes:
1. The blue colour of the G/C boxes is used for more information
 2. The installation sheet should be considered together with the plan of the ceiling and boxes

Symbols and notation

- - boxes
- - installation of new walls

Isometric
installation
diagrams

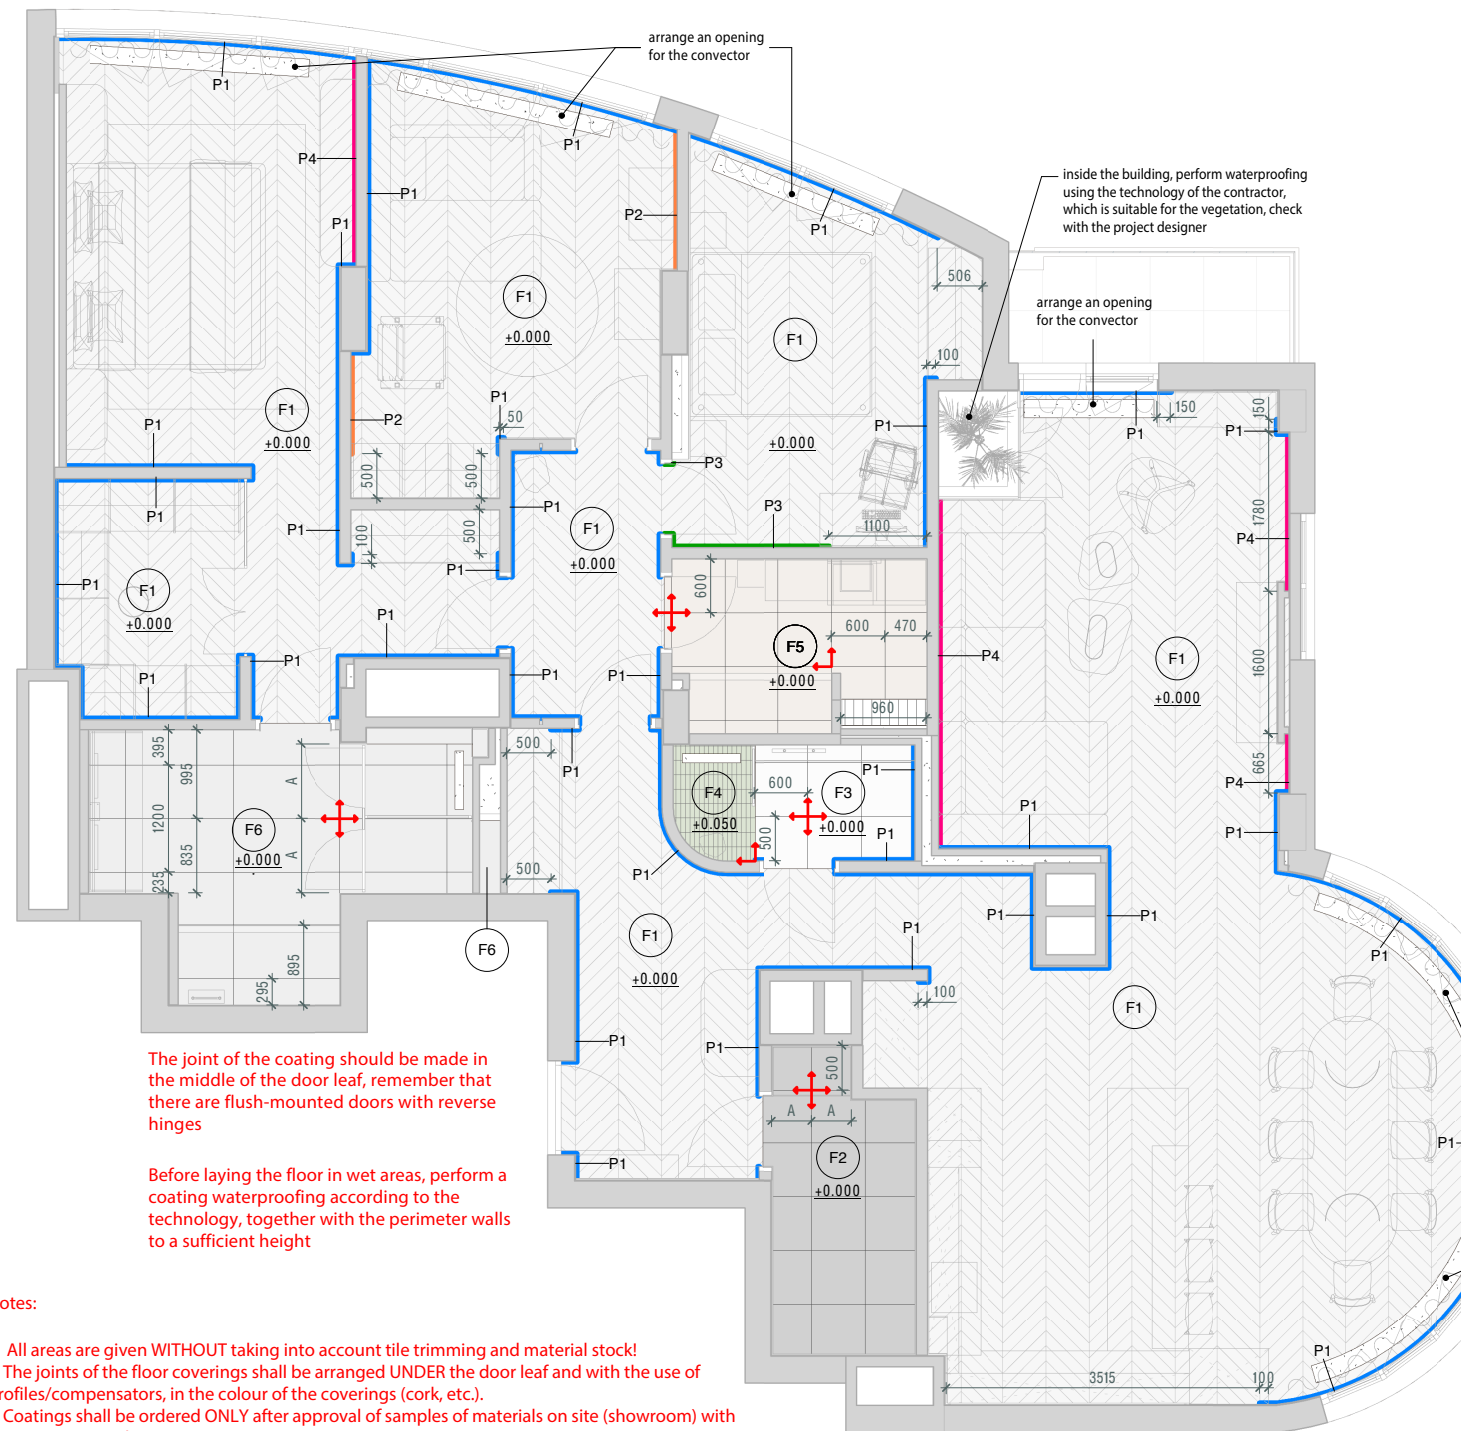

Design Project /
Apartment / "Park
Avenue VIP"
Residential
Complex, Kyiv,
Holosiyivsky
Avenue, 58-A

Notes:

1. The blue colour of the G/C boxes is used for more information
2. The installation sheet should be considered together with the plan of the ceiling and boxes

Floor covering information			
Not.	Floor covering materials	Square (m2)	Example
F1	Parquet board, "French herringbone" layout	124.06	
F2	Grey tiles 600x600	5.30	
F3	Marble tiles 600x600	2.42	
F4	Green tiles 50x160	1.05	
F5	Terazzo tiles 600x600	5.11	
F6	Beige tiles 600x1200	10.73	

Skirting boards listing			
Not.	Type	Moulding (lin.m)	Example
P1	Flush-mounted skirting board, h=60 mm, colour - white, RAL-9010	70.52	
P2	Flush-mounted plinth, h=60 mm, colour - grey, RAL-7047	2.71	
P3	Flush-mounted skirting board, h=60 mm, colour red-brown, RAL-8004	2.12	
P4	Shadow seam, h=30mm, colour black	8.73	

The joint of the coating should be made in the middle of the door leaf, remember that there are flush-mounted doors with reverse hinges

Before laying the floor in wet areas, perform a coating waterproofing according to the technology, together with the perimeter walls to a sufficient height

Notes:

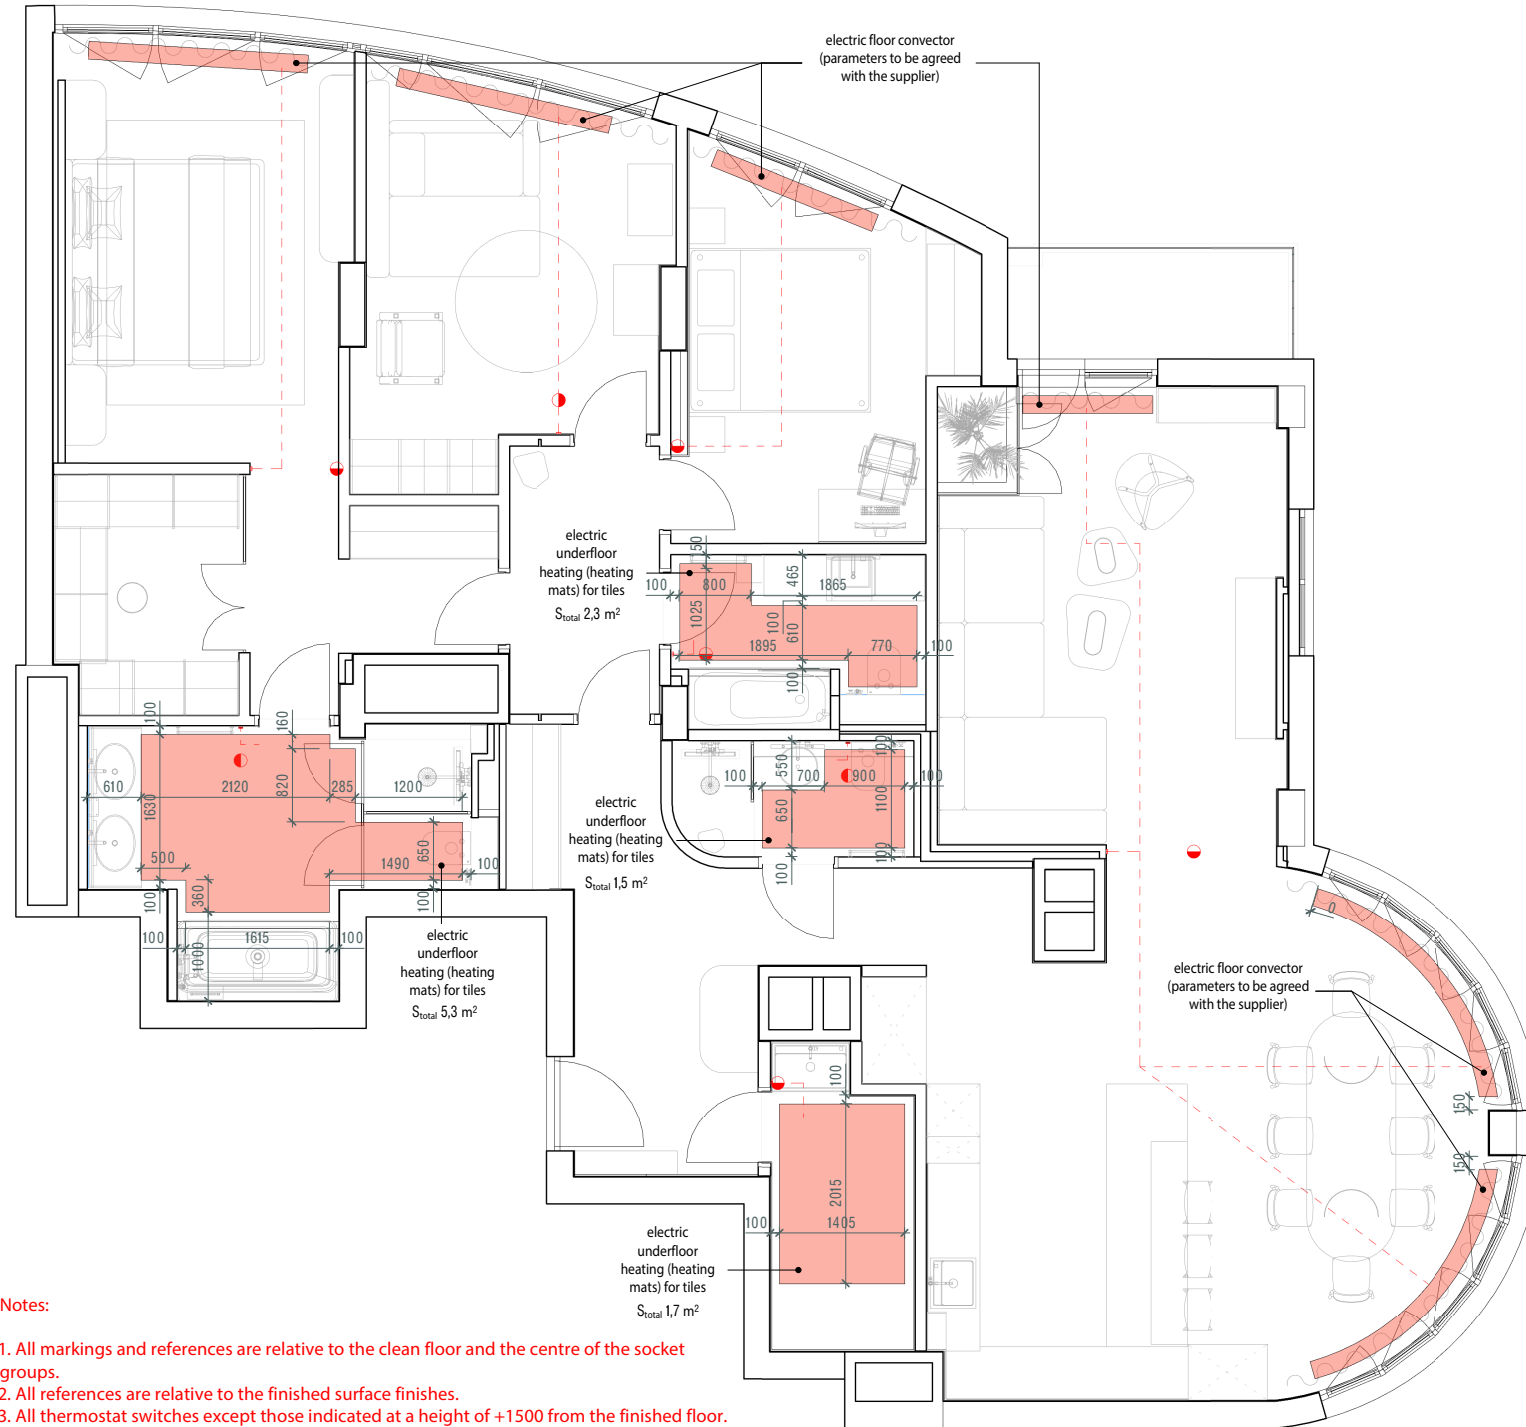

1. All areas are given WITHOUT taking into account tile trimming and material stock!
2. The joints of the floor coverings shall be arranged UNDER the door leaf and with the use of profiles/compensators, in the colour of the coverings (cork, etc.).
3. Coatings shall be ordered ONLY after approval of samples of materials on site (showroom) with the Customer/Architect.

Take into account the presence of tiles on the walls, see the scans and the specification of finishes
 F6 also takes into account the amount of filling of the niche above the toilet
 Skirting boards are given without cutting

arrange an opening for the convector

Floor covering plan

Design Project / Apartment / "Park Avenue VIP" Residential Complex, Kyiv, Holosiyivsky Avenue, 58-A

Notes:

1. All markings and references are relative to the clean floor and the centre of the socket groups.
2. All references are relative to the finished surface finishes.
3. All thermostat switches except those indicated at a height of +1500 from the finished floor.
4. To be read with the socket and switch binding sheet and the scan sheet.

C9	Suspended ceiling G/C sheet + Mirror finishing	Min.wool filling, G/C sheet in one layer	0.4	3500 MM
C10	Suspended ceiling G/C sheet + paint in RAL-3012	Min.wool filling, G/C sheet in one layer	2.3	2800 MM

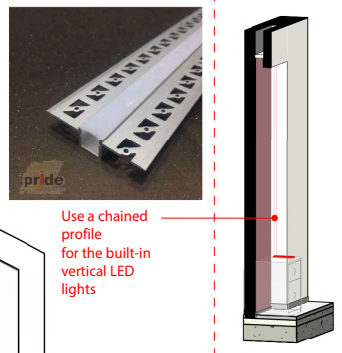

All colours and finishing materials shall be approved by the Customer and the developer of the project on the spot.
The area of ceiling painting is NOT included in the total bill of materials!

- Notes:
1. Check the overall dimensions after installing the partitions and false walls!
 2. Use moisture-resistant G/C plasterboard in wet rooms.
 3. If necessary, provide inspection hatches in the places of G/C plasterboard sewing of communications.
 4. Installation of plasterboard structures shall be performed AFTER plastering the walls.
 5. ALL surfaces shall be level (horizontal/vertical) and have angles of 90°.
 6. The level of the CLEAN floor shall be taken as the 0.000 mark.
 7. Shadow joints MUST be arranged around the perimeter of the suspended ceiling.
 8. Provide all the necessary embedded elements for the installation of structures.

Ceiling plan

Design Project / Apartment / "Park Avenue VIP" Residential Complex, Kyiv, Holosiyivsky Avenue, 58-A

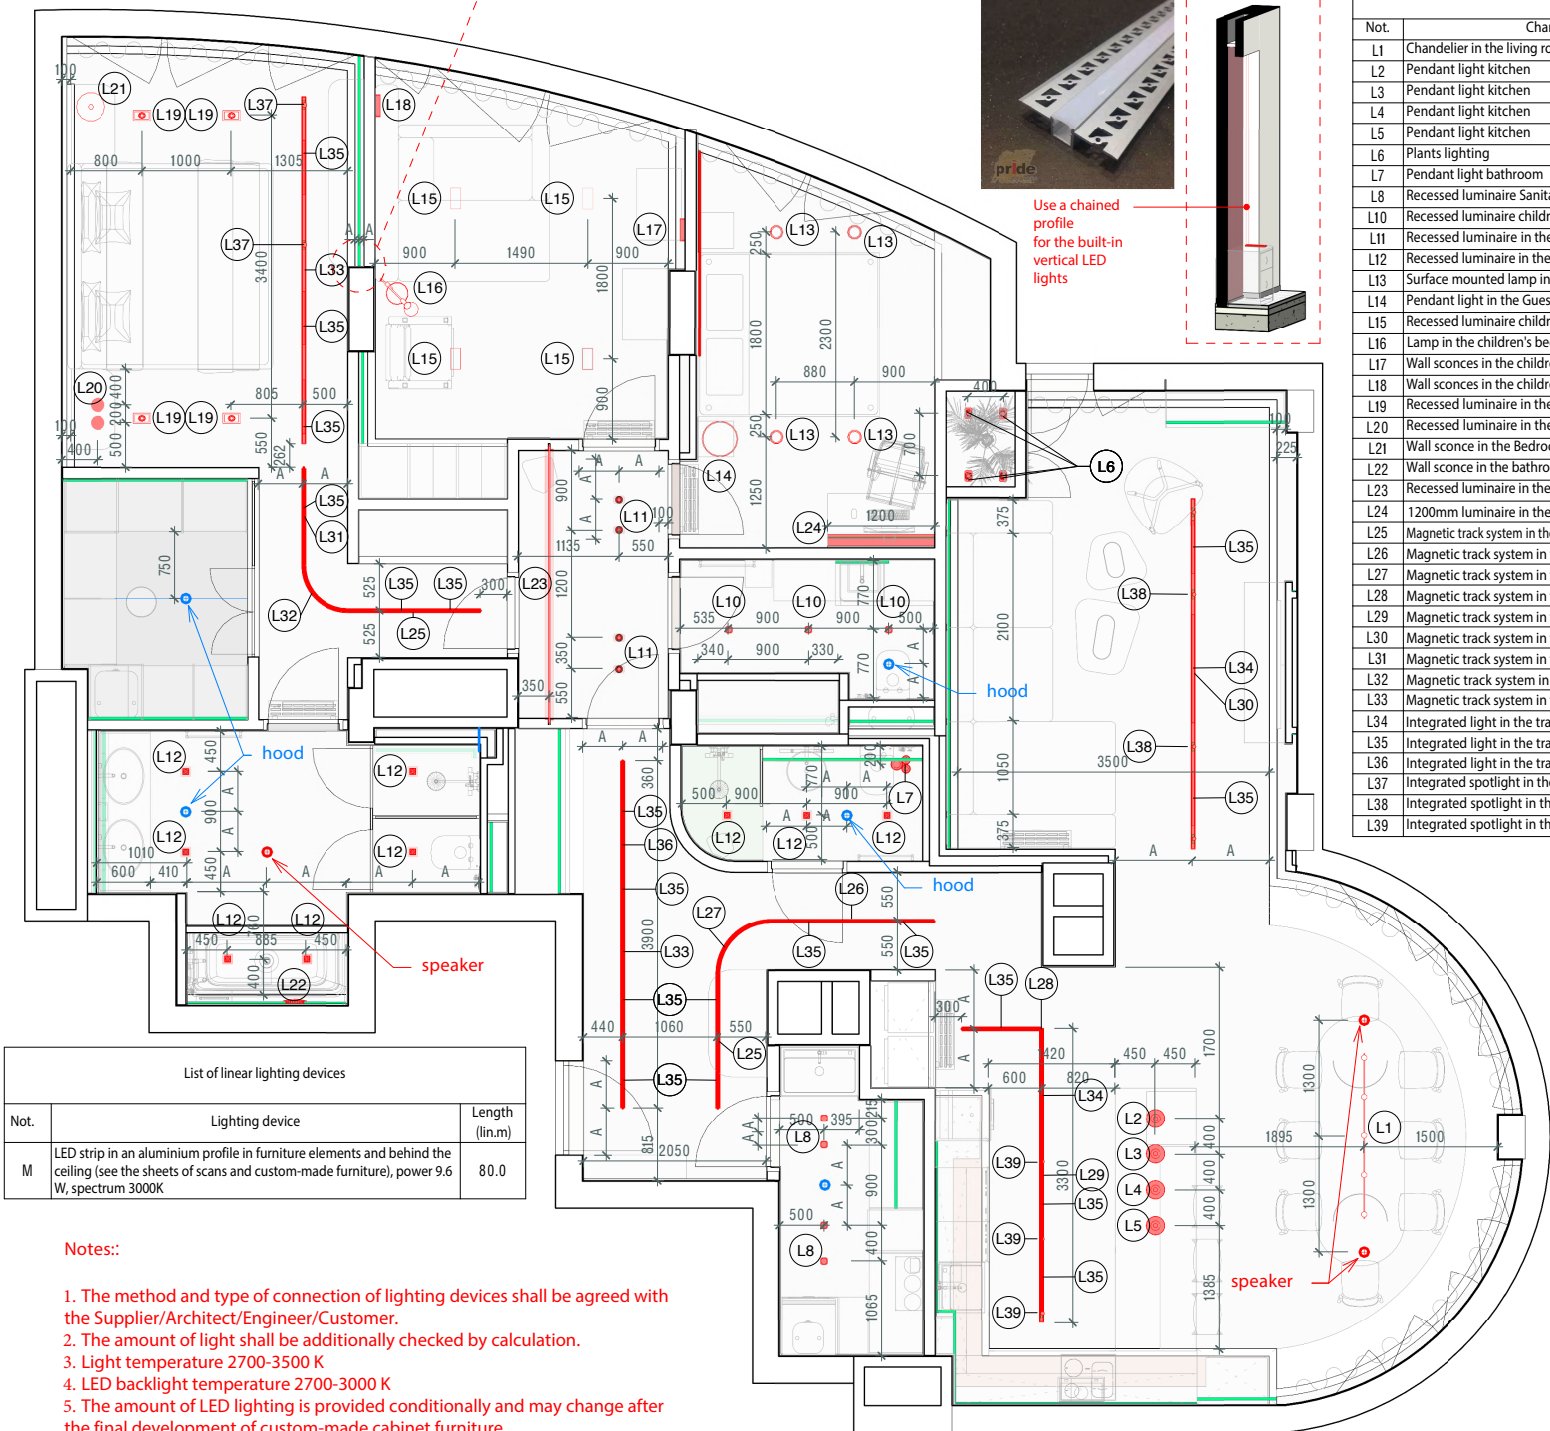

Use a chained profile for the built-in vertical LED lights
