SUMMARY

IT Recruiter with 6 months of professional experience. I was working with technical and non-technical positions of different levels from Junior Developer to Team/Tech Lead.

I'm a results-driven person, a resourceful team player with superb communication skills. One of the most important things in my work is to build trusting relationships with colleagues and candidates.

A combination of improvement of your skills, getting new knowledge, and hard working for your own experience is a way to becoming a true professional and one of the A-players on market.

I'm always looking for new challenges and opportunities. Interesting in recruitment, psychology, and modern technologies.
