Drawing their energy from 90s rock, **Bullets & Knives** pick up where the decade left off. Their latest single **'Fuel'** is another offering of their distinctive energetic heavy rock sound. Taking its inspiration from the band's founder Julien Delaye's day job at a petrol station, **'Fuel'** exposes the frustration felt towards this job. Feeling that music is his true vocation, Julien is chasing down his dream with renewed vigour.

Based in Gembloux, Belgium **Bullets & Knives** are a hard hitting rock band, citing Muse, Placebo and Tool as their main influence. The band's aesthetic is *"all about bullets & knives, elements taken from a tortured dream of frontman Julien."* The music of Bullets & Knives emphasises a dark, nostalgic cityscape, sometime melodic, sometimes dynamic, but always melancholic. Their debut album 'The Art of Dying' is an ode to the destruction of the 21st century man.
