<sup>4</sup>Specified voltage and current values refer to network infrastructure and can be limited by the vehicle. Times are from 10–100% charge using a wallbox (three-phase) or standard socket (single-phase)  
<sup>5</sup>The certified electrical consumption is generally determined at maximum AC charging capacity using a Mode 3 cable. It is therefore recommended that vehicles with a HV battery preferably be charged at a wallbox or an AC charging station with a Mode 3 cable in order to achieve shorter charging times and improved charging efficiency

## Concertina load sill protector

The concertina load sill protector not only protects the boot, but also protects the bumper and boot sill from becoming scratched. The load sill guard can be attached via hooks to the lifting eyes or can be attached via a velcro strip to the reversible mat or roof box.
