Design

The art of progress. Beautifully expressed in visual form. In an exceptional vehicle. The Audi A8. Awe-inspiring and sporty, while staying true to one clear principle: concentration on the essential. Not a single line without a function. Distinctively structured surfaces. Exclusive materials. All finished to a supreme standard. And aspiring to something very special – brilliance down to the last detail.

Brilliant details.
Flawlessly styled
and timeless.

The fuel consumption and CO₂ emission figures can be found on page 96.

**Brilliant
design.**
Awe-inspiring
and dynamic.

Design

The fuel consumption and CO₂ emission figures can be found on page 96.

**Brilliant
charisma.**
Fascinating
and pioneering.

Design

The fuel consumption and CO₂ emission figures can be found on page 96.

Comfort

**Brilliant
comfort.**
Exclusive and
authentic.

Audi A8

Comfort

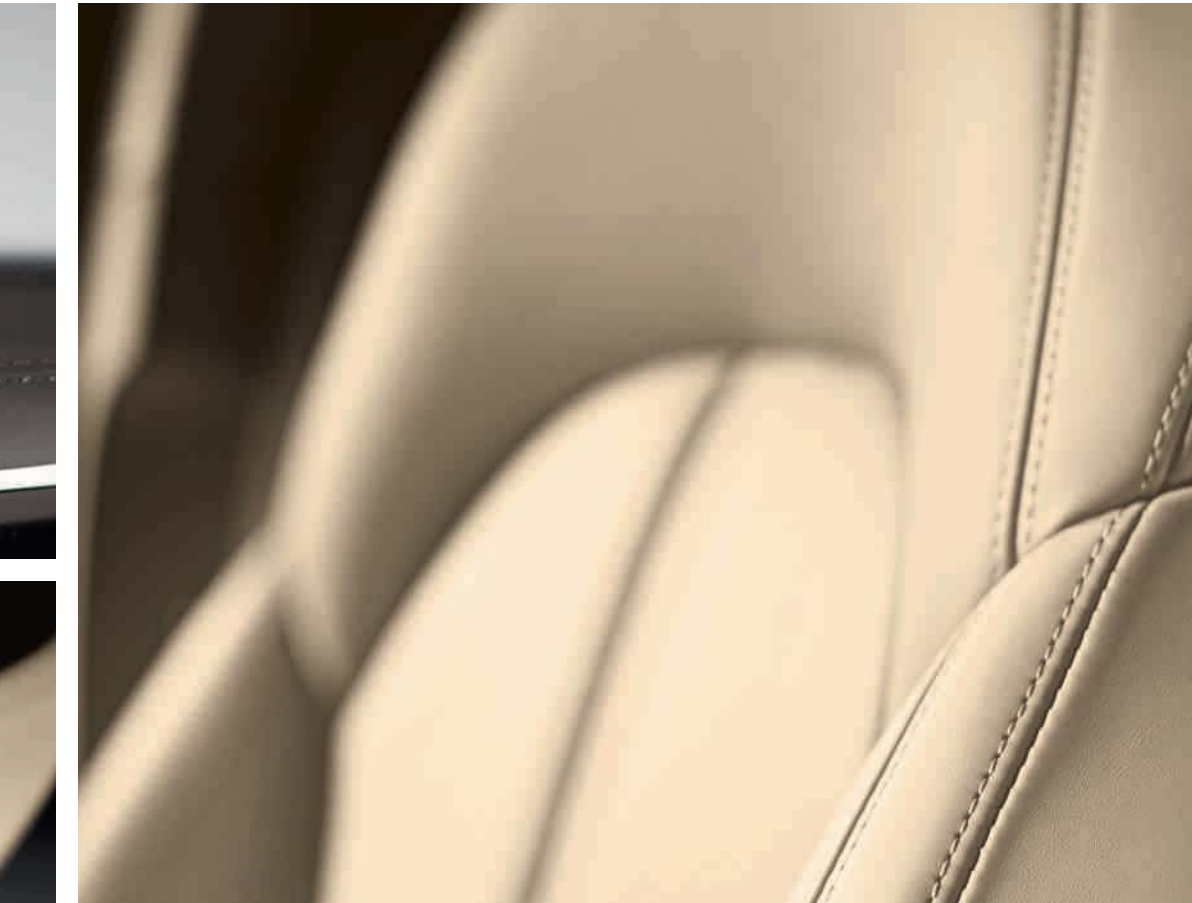

Comfort

3

Audi A8

Welcome aboard the Audi A8. A place where lavish spaciousness is blended with exquisite ambience. Choice materials lend a palpable sense of exclusivity. Top-class workmanship sets new standards. And innovative technology entertains and delights.

Such as the MMI® (1) with its clear layout and elegant design. And which can be operated perfectly with the optional MMI navigation plus with MMI touch (2). Or the optional head-up display (3) that provides eye-level information at all times. The Audi A8. Designed for complete and utter comfort.

Comfort

The Audi A8 L. Supreme power and poise on the outside. And room in abundance on the inside. This is thanks to a wheelbase 13 centimetres longer than on the Audi A8. The result is convincing: even more exclusive space.

Brilliant space.
Elegant and ample.

The fuel consumption and CO₂ emission figures can be found on page 96.

Comfort

Comfort that invites you to take a seat. Thanks to the larger rear doors. And noticeably more space in the interior. The Audi A8 L. Allow yourself and your ideas all the room you need. Enjoy increased legroom in the rear. For even more relaxed travel or concentrating even better while working. Surrounded by upholstery and trim that is truly in a class of its own: Unicum leather. Vegetable tanned. Breathable. Beautifully soft and yet water and dirt-repellent, too. Full of characteristic features. Unique. Tangible. Mirroring your own personality. In every detail.

The fuel consumption and CO₂ emission figures can be found on page 96.

Dynamics

Impressive performance. 368 kW of power. 625 Nm of torque. Palpable in every driving scenario. 0 to 100 km/h in 4.6 seconds. Achieved with poise and composure, thanks to the exceptionally smooth-running 12-cylinder engine. The Audi A8 L W12: proof that there truly is power in serenity.

**Brilliant
power.**
Thrilling
and serene.

The fuel consumption and CO₂ emission figures can be found on page 97.

Design

Styling accents which make all the difference. Which emanate strength. Discreetly. Integrated harmoniously into the overall work of art.

Brilliant details in chrome and stainless steel. The Singleframe with close-mesh grille structure and W12 emblem. At once distinctive and elegant. Air inlets with chrome inserts. Exterior mirrors with additional integrated chrome trim. Sophisticated radiance included. Audi Matrix LED headlights as standard. And creating a particularly exclusive look are the optional 20-inch forged aluminium wheels in 15-spoke structured design with a high-gloss polished finish*.

The fuel consumption and CO₂ emission figures can be found on page 97.

*Please note the special information relating to wheels on page 99.

Take your seat for a journey into a different dimension. In comfort seats featuring exquisite leather upholstery. Relax. Enjoy the 4-zone deluxe automatic air conditioning. Or the soothing massage function. In the optional electrically adjustable relaxation seat in the rear. Enjoy the fascinating sensation of space. Complete with LED ambient lighting. Luxury in a new light. Unique. Unmistakeable. The Audi A8 L W12.

Design

Charisma. Pure power. And technology of the highest standard. All combined in one of the sportiest saloons around. The Audi S8. Dynamic. Self assured. Visibly progressive. With innovative Audi Matrix LED headlights as an option. Excitingly sporty with a new brilliance.

**Brilliant
technology.
Emphatically
sporty.**

Attention to detail. With a sporty interpretation. With S8-specific 21-inch wheels as an option. Emphatically dynamic. A statement packed with power and confidence. In typical S8 fashion. Three-dimensionally architected Singleframe. Dominantly defined air inlets. The Audi S8. Expressive. Exclusive. Fascinating. A unique experience. Even before you get in.

**Brilliant
facets.**
Strikingly
dynamic.

The fuel consumption and CO₂ emission figures can be found on page 97.

The fuel consumption and CO₂ emission figures can be found on page 97.

Dynamics

High-performance athlete with the S factor. 382 kW that respond spontaneously. And thrill. From 0 to 100 km/h in 4.1 seconds. A fascinating build-up of power. An athletic 650 Nm of torque, from just 1,700 rpm. Impressive performance, intelligently controlled. Thanks to Audi cylinder on demand technology. Reduced fuel consumption. Lower emissions. Combined with a thoroughly brilliant performance. The Audi S8. Vorsprung durch Technik.

**Brilliant
performance.
Breathtakingly
athletic.**

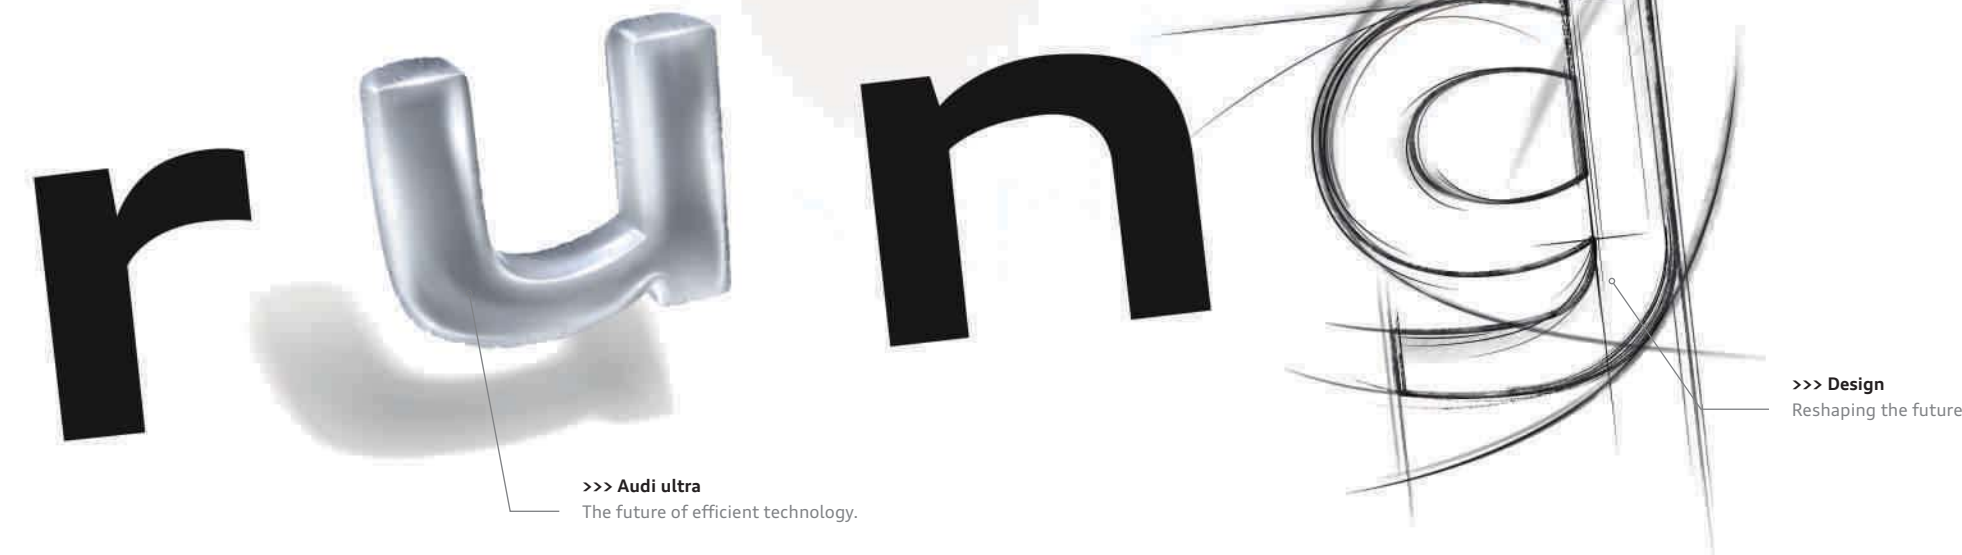

The fuel consumption and CO₂ emission figures can be found on page 97.

>>> Audi connect
The future of connected mobility.

>>> Audi tron
The future of CO₂-reduced mobility.

>>> quattro®
The future of all-wheel drive.

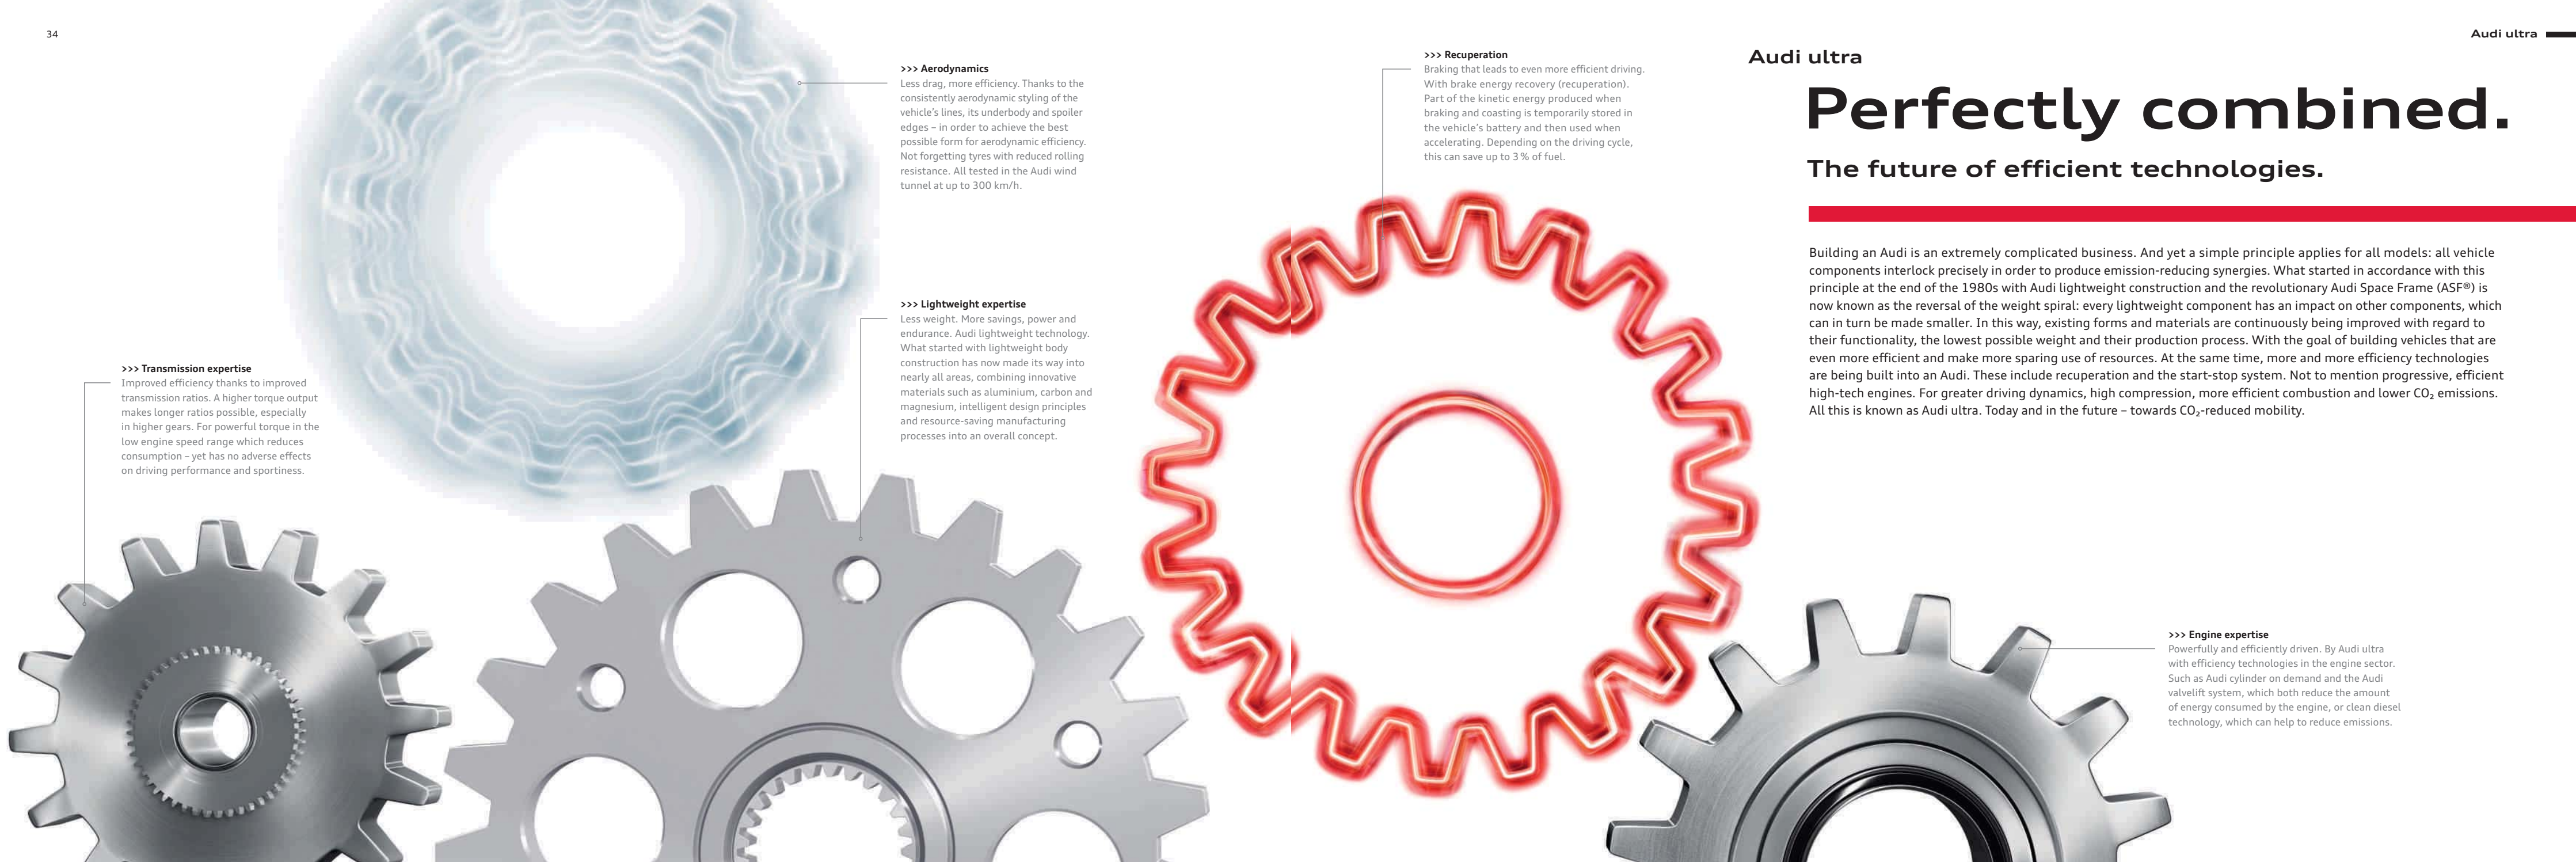

>>> Audi ultra
The future of efficient technology.

>>> Design
Reshaping the future.

... durch Technik.

The world is constantly changing. Technology is advancing at an ever faster pace. And in the process, more and more opportunities are opening up to you – nowhere more so than in the field of mobility. We are playing an instrumental role in shaping this progress with Vorsprung durch Technik. Striving to provide you with technology that enriches your life. Making sure that we don't just satisfy your expectations of mobility both today and in the future, but continue to surpass them.

>>> Transmission expertise

Improved efficiency thanks to improved transmission ratios. A higher torque output makes longer ratios possible, especially in higher gears. For powerful torque in the low engine speed range which reduces consumption – yet has no adverse effects on driving performance and sportiness.

>>> Aerodynamics

Less drag, more efficiency. Thanks to the consistently aerodynamic styling of the vehicle's lines, its underbody and spoiler edges – in order to achieve the best possible form for aerodynamic efficiency. Not forgetting tyres with reduced rolling resistance. All tested in the Audi wind tunnel at up to 300 km/h.

>>> Lightweight expertise

Less weight. More savings, power and endurance. Audi lightweight technology. What started with lightweight body construction has now made its way into nearly all areas, combining innovative materials such as aluminium, carbon and magnesium, intelligent design principles and resource-saving manufacturing processes into an overall concept.

>>> Recuperation

Braking that leads to even more efficient driving. With brake energy recovery (recuperation). Part of the kinetic energy produced when braking and coasting is temporarily stored in the vehicle's battery and then used when accelerating. Depending on the driving cycle, this can save up to 3 % of fuel.

Audi ultra

Perfectly combined.

The future of efficient technologies.

Building an Audi is an extremely complicated business. And yet a simple principle applies for all models: all vehicle components interlock precisely in order to produce emission-reducing synergies. What started in accordance with this principle at the end of the 1980s with Audi lightweight construction and the revolutionary Audi Space Frame (ASF®) is now known as the reversal of the weight spiral: every lightweight component has an impact on other components, which can in turn be made smaller. In this way, existing forms and materials are continuously being improved with regard to their functionality, the lowest possible weight and their production process. With the goal of building vehicles that are even more efficient and make more sparing use of resources. At the same time, more and more efficiency technologies are being built into an Audi. These include recuperation and the start-stop system. Not to mention progressive, efficient high-tech engines. For greater driving dynamics, high compression, more efficient combustion and lower CO₂ emissions. All this is known as Audi ultra. Today and in the future – towards CO₂-reduced mobility.

>>> Engine expertise

Powerfully and efficiently driven. By Audi ultra with efficiency technologies in the engine sector. Such as Audi cylinder on demand and the Audi valvelift system, which both reduce the amount of energy consumed by the engine, or clean diesel technology, which can help to reduce emissions.

Mobility & navigation

Point-of-interest (POI) search with voice control
in the Google™* database

Traffic information online
complements the dynamic route guidance with real-time traffic flow information for individual stretches of road

Fuel prices
the cheapest petrol stations at your destination or in the vicinity

Parking information
Help with looking for car parks and multi-storées, plus – where available – information on prices and currently vacant spaces

Country information
The legal regulations for a specific country, such as speed limits or whether it is compulsory to carry a high-visibility vest, can be called up at any time in the MMI at the push of a button.

Navigation with Google Earth™* and Google Street View™**
uses high-resolution aerial and satellite images, photos and address information to guide you to your destination even more easily

Destination entry via myAudi or Google Maps™**
If you want, you can plan your navigation destinations from your home computer. myAudi and Google Maps™** allow individual navigation destinations to be sent to the vehicle. When you start your journey, these can easily be loaded as your destination.

Communication

Wi-Fi hotspot
connects your mobile devices to the internet

If you want to experience the full diversity of Audi connect, scan this QR code using your smartphone. Or follow this link in your browser: www.audi.com/audiconnecta8

myAudi – your personal control centre
provides you with password-protected access to www.audi.com/myaudi where, following one-off registration, you are able to manage the services supported by Audi connect and configure them from the comfort of your own home

* Google and the Google logo are registered trademarks of Google Inc.
Availability, screen display and the cost of services vary depending on the country, model, device and tariff. For further legal information and notes on use, please see page 89 or visit www.audi.com/connect. The fuel consumption and CO₂ emission figures can be found from page 96 onwards.

Audi connect.

Audi connect

The future of connected mobility.

The world presents you with countless possibilities. Audi connect enables you to make the most of many of them in digital form directly from your Audi A8. At the push of a button. Tailored to you. Thanks to myAudi and the services supported by Audi connect in your Audi A8. In places all over the world. Intuitively, easily and conveniently.

Infotainment

Weather
forecasts and maps for the required destination

Audi music stream
access to global radio stations via smartphone app and Wi-Fi, plus access to your smartphone's media library

News online
text and images about current world events

City events
up-to-date information about events – e.g. at your destination

Travel information
sightseeing information – with a function for importing destination to the navigation system

Have the road completely under control, thanks to permanent distribution of the drive force to all four wheels. Variably controlled by the centre differential. Always depending on the situation. Experience handling stability, dynamism and agility as never before and combat the effects of over- and understeer with quattro with optional sport differential. For increased traction and superior propulsive power. Tame any road. And always keep your eyes set on where you're heading. In bends. On straights. Over any surface. For a fascinating experience that sticks. To the road – and in your mind.

quattro®
**Stick to
the road.**

With quattro®.

Audi Matrix LED headlights

See well.

Darkness is relative. The optional Audi Matrix LED headlights turn night into day. The all-new headlight technology produces a light colour similar to that of daylight. Bends are anticipated to illuminate them more clearly. Vehicles are detected and the light distribution of your Audi A8 adapts according to the situation. This is all made possible by an array of sensors and a camera. As well as dimmable LEDs in an innovative arrangement – which, incidentally, are quite a sight in their own right.

Convincingly illuminating – the video on the Audi Matrix LED headlights. Scan this QR code with your smartphone and see for yourself. Or follow this link in your browser: www.audi.com/a8matrixledscheinwerferfilm

Audi Matrix LED headlights won't thrill you only at night. The new lighting technology is quite a spectacle during the day, too, sometimes appearing as light points, sometimes as a dynamic light strip. Individually controllable LEDs. Perfectly adapted to the situation in hand. Showing the way ahead. An impressive sight, time and time again.

The fuel consumption and CO₂ emission figures can be found from page 96 onwards.

Look good.

Maximum power. Put to maximum use.

Every movement originates from something. Something that sets it off, an idea. The engine for your Audi A8 can also be traced back to an initial spark of inspiration: higher power with lower fuel consumption. These apparently conflicting aims are reconciled in two revolutionary drive technologies: TDI and TFSI. Get acquainted with both of them. And then opt for the drive system that you feel most moved by.

The fuel consumption and CO₂ emission figures can be found from page 96 onwards.

TDI®

With their combination of direct injection and turbocharging, Audi TDI engines promise exceptional performance – thanks to their high torque output over the entire engine speed range with constant power build-up. They are renowned for being fuel-efficient and for reducing emissions. But they are incredibly dynamic too – letting you get the maximum out of any road.

TFSI®

Audi TFSI engines attain a particularly high compression rate. The result: outstanding efficiency combined with optimum performance. Substituting supercharging for cubic capacity has the effect of considerably reducing engine size and weight – while performance remains as impressively dynamic as ever. For power delivery that will win you over from the word go.

Audi cylinder on demand

Even cylinder heads can be intelligent, as Audi cylinder on demand proves. Four of the eight cylinders of the 4.0 litre V8 TFSI engine and six of the twelve cylinders of the 6.3 litre W12 FSI engine automatically shut down in the partial-load range. This helps to lower fuel consumption at the same time as reducing emissions. Without the switchover even being noticed or impairing the driving dynamics.

hybrid

Brake to accelerate.

Get further ahead every time you use the brakes. Turn braking energy into fuel efficiency. First store it in a lithium-ion battery. Then put it to sustainable use. Experience efficient mobility. Purely on electricity if you want. Up to 3 kilometres at a constant 60 km/h. And even up to 100 km/h for a short period. Completely emission-free during coasting. When the vehicle is in overrun, the combustion engine is switched off and kinetic energy is all that is keeping you moving. Even at speeds of up to 160 km/h. Feel the additional benefit of high-torque dynamics when boosting. Just as soon as the combustion engine and electric motor work together. For faster acceleration, higher flexibility and greater driving enjoyment.

>>> Combustion engine

Among the hybrid engine versions in the Audi A8, the 2.0 litre TFSI engine is at once both efficient and powerful. The 155 kW engine has increased torque, direct fuel injection, turbocharging and the Audi valvelift system. In conjunction with the electric motor, which is also a high-torque unit, the dynamism produced is the equal of any other drive type.

>>> Electric motor

Traction motor, alternator and starter in one: the compact and lightweight 40 kW electric motor in the Audi A8 hybrid and A8 L hybrid. It is connected to the crankshaft via a separating clutch, thus ensuring that the available power is transmitted directly. This parallel hybrid concept delivers convincing drive-off performance and acceleration in just about every driving situation. Together, the combustion engine and electric motor deliver a system output of 180 kW.

>>> Lithium-ion battery (including battery cooling)

The lithium-ion battery in the Audi A8 hybrid and A8 L hybrid allows you to drive purely on electricity for a certain period. It determines the range and output of the hybrid drive, and its high energy density means significantly more power. Its low weight and space-saving design are also bound to impress. Including active battery cooling, which improves the availability of the hybrid system and prolongs its operating life.

>>> adaptive air suspension
The electronically controlled air suspension acts individually at each of the 4 wheels and makes sure that the handling characteristics are barely affected, even when carrying heavy loads.

>>> Audi drive select
Audi drive select lets you adjust the driving characteristics of the A8 to suit your requirements. At the push of a button. Sportier, more comfortable, more balanced, more economical or even individually tailored as you please. It's entirely up to you.

>>> Dynamic steering
The dynamic steering enhances handling and driving comfort with speed-sensitive control of the steering ratio.

>>> Electromechanical power steering
The speed-sensitive power steering conveys a precise steering feel even at high speeds, helps you to countersteer and makes light work of parking.

>>> adaptive air suspension – sport
Depending on the mode, the sport version of the air suspension lowers the ride height by up to 10 mm compared to adaptive air suspension and has even stiffer damping.

>>> tiptronic
The 8-speed automatic transmission with Dynamic Shift Program (DSP) ensures faster gear changes without any perceptible break in propulsive power.

>>> quattro®
The permanent all-wheel-drive system distributes the drive forces to each individual wheel according to the driving situation for extra traction and dynamic performance.

>>> quattro® with sport differential
The quattro permanent all-wheel drive with electronically controlled sport differential guarantees superb agility and thrilling driving dynamics.

>>> Ceramic brake
The ceramic brakes available for the front and rear axles ensure excellent braking performance in any driving situation.

Dynamics

that will take a hold of you.

Get in. Buckle up. Start the engine. Wherever you're heading, enthralling driving dynamics will power you there. For as you know, the world is your oyster once you get behind the wheel of your Audi A8. You decide the direction. The driving style. The pace. And you enjoy the satisfaction of knowing you have plenty in reserve. More than enough to get the very best from every drive.

The fuel consumption and CO₂ emission figures can be found from page 96 onwards.
You can find out which equipment features are available as standard or optional in your model by referring to the index starting on page 102.

Assistance systems

Wherever you’re heading, peace of mind will be your constant companion.

With the assistance systems in your Audi A8.

Each drive is different. Yet they all have one thing in common – the feeling of being protected that you get from every Audi. All driver assistance systems in your Audi A8 help you during your journey and guarantee even greater comfort when you’re on the road. Get to know the most important driver assistance systems.

>>> Audi pre sense basic
initiates preventive occupant protection measures in the event of an impending accident

>>> adaptive cruise control with Stop&Go function and Audi pre sense front
monitors the traffic ahead and automatically maintains a constant distance wherever possible

>>> Camera-based speed limit display
recognises speed limits and notifies you of them via the driver information system and head-up display

>>> Audi Matrix LED headlights
track the road ahead and illuminate it according to the situation with their innovative LED layout for even greater safety

>>> Audi active lane assist
helps you to keep in lane by means of gentle steering intervention when lane boundary markings are detected

>>> Night vision assistant
improves convenience at night thanks to its integrated thermal imaging camera, highlighting any pedestrians and larger wild animals detected

>>> Audi side assist including Audi pre sense rear
helps you when changing lanes and initiates preventive protection measures when an impending rear-end collision is detected

>>> Head-up display
projects key information onto the windscreen at eye level so there is no need to take your eyes off the road

>>> Parking system plus with 360 degree cameras
provides a better overview for parking and manoeuvring by offering a choice of different camera angles all around the vehicle

>>> Park assist with display of surroundings
helps you to manoeuvre in and out of parking spaces by performing steering actions autonomously

>>> Audi connect

Use all the services supported by Audi connect with the MMI – quickly and easily. The intuitive operation of the MMI makes accessing the internet remarkably straightforward.

>>> Car

Control and alter driver assistance systems, vehicle settings as well as climate control and service functions quickly and easily using the MMI.

>>> Media

Browse through the covers of your music collection on all available media sources such as inserted SD cards, Audi music interface, CDs or DVDs.

>>> Navigation

Let yourself be guided to your destinations with even greater ease by the 3D map view and 3-dimensional display of places of interest and landmark buildings.

>>> Phone

Make phone calls safely and easily using the hands-free facility: simply select the number to dial from your contacts in the MMI or enter the number intuitively via the MMI touch.

>>> MMI® navigation plus with MMI touch

The MMI navigation plus with MMI touch in the Audi A8 makes operating the individual components of the Multi Media Interface even easier. The touchpad integrated next to the rotary/push-button control can even be operated using just one finger.

**Simplicity****The MMI® – intelligent, individual, intuitive.**

Streamlined. Simple. Logical. The world of mobile infotainment completely redefined: the Multi Media Interface (MMI). Phoning, navigating or surfing the internet via Audi connect: all highly intuitive, highly functional and highly convenient – not least thanks to voice control. With the MMI in your Audi A8, everything will be child's play for you.

As unique as you are. The equipment options.

Sportiness, comfort, design, functionality – whatever you demand of your Audi, it offers you a wealth of custom options. Here you will see just how much attention we pay to detail. And to quality that you can appreciate with all your senses. From exquisite inlays and the extended range of interior colours to superior quality leather: in an Audi A8 you can enjoy not just innovative technology, but also luxurious craftsmanship beyond your expectations.

Sportiness that can be seen and felt. Even when stationary.

S stands for sportiness. The Audi S8 is impressive proof of this. With extensive S-specific equipment. For a dynamic look. Sporty comfort. And superior performance. And you also have the option of further enhancing the S-factor. With optional equipment that is equally impressive to the senses.

The fuel consumption and CO₂ emission figures can be found on page 97.

S8-specific standard equipment

Cast aluminium wheels
in 5-parallel-spoke design (S design)
size 9 J x 20 with 265/40 R 20 tyres*

Black painted brake callipers
with S8 logo at front

Audi Singleframe
radiator protective grille in platinum grey with horizontal double chrome struts and S8 emblem

Front bumper
in a distinctive sporty design with honeycomb-structure air intake grilles and double chrome struts; includes aluminium-look blade

Exterior mirror housings
in aluminium look

Side sill trims
in body colour; distinctive, sporty design

Diffuser insert at rear
in platinum grey, edged with two-layer blade in aluminium look

Exhaust tailpipes
dual-branch design, 2 oval chrome surrounds on both left and right

Model name/logo
• S8 emblem in Audi Singleframe, on the luggage compartment lid and on the vehicle key
• V8 T logo on the front wings

Door sill trims with aluminium inlays
with S8 logo, illuminated

Pedals and footrest in stainless steel

S-specific instrument cluster
with grey dials, white needles and S8 logo in the rev counter; dynamic ready-check feature

Multifunction sport leather steering wheel in 3-spoke design with shift paddles in aluminium look
with S8 emblem and S-specific stitching

Selector lever in carbon Atlas
with shift-by-wire technology; in conjunction with Audi design selection Vermont brown in piano finish, black

Engine start-stop button, S-specific
with red ring

S8-specific analogue clock with grey dial

Comfort sport seats, front

Seat upholstery in Valcona leather, lunar silver/steel grey
with square perforations and diamond-patterned stitching

Upper/lower inlays
carbon Atlas/brushed aluminium, silver

adaptive air suspension – sport
with S8-specific tuning

quattro® with sport differential
with S8-specific tuning

Dynamic steering
with S8-specific tuning

S8-specific optional equipment

Paint finish in the special colour Daytona grey, pearl effect

Cast aluminium wheels
in 5-triple-spoke design (S design)
size 9 J x 21 with 265/35 R 21 tyres*

Cast aluminium winter wheels
in 5-parallel-spoke design (S design)
size 9 J x 20 with 265/40 R 20 tyres*

Audi design selection Vermont brown with inlays in carbon red

Sport exhaust system
for an even greater sound experience; dual-branch design with 2 oval tailpipes each left and right; high-gloss black surrounds

*You will find specifications on the technical characteristics of tyres on page 99.

The right driving force for every personality.

No matter which Audi engine you choose, they all have high compression ratios, highly efficient combustion and outstanding efficiency. In short, they deliver more power whilst using less fuel and producing fewer emissions.

4.2 TDI

TDI®

Audi TDI engines: high torque output over the entire engine speed range – with constant power build-up. They are renowned for being fuel-efficient and for reducing emissions. The 3.0 TDI clean diesel quattro, for example, has a power output of 190 kW, a regulated top speed of 250 km/h and accelerates from 0 to 100 km/h in 5.9 seconds.

- A8 3.0 TDI clean diesel quattro (190 kW)
- A8 4.2 TDI clean diesel quattro (283 kW)

The fuel consumption and CO₂ emission figures can be found from page 96 onwards.

4.0 TFSI

TFSI®

The Audi TFSI engines offer outstanding efficiency and improved performance whilst at the same time retaining their dynamism. The 4.0 TFSI quattro in the Audi A8, for example, has a power output of 320 kW, enabling the car to accelerate from 0 to 100 km/h in 4.5 seconds and reach a regulated top speed of 250 km/h.

- A8 3.0 TFSI quattro (228 kW)
- A8 4.0 TFSI quattro (320 kW)
- S8 4.0 TFSI quattro (382 kW)
- A8 hybrid 2.0 TFSI (155 kW)

6.3 FSI

FSI®

The Audi W12 engine combines superb acceleration and powerful torque with exceptionally quiet operation. The Audi A8 L W12 6.3 FSI quattro has an impressive power output of 368 kW and accelerates from 0 to 100 km/h in 4.6 seconds. Its regulated top speed is 250 km/h.

- A8 L W12 6.3 FSI quattro (368 kW)

As unmistakeable as your standards: the Audi design selection.

The Audi design selection offers you an attractive pre-selection of exclusive materials and colours for the interior. Our designers have combined inlays of fine woods or carbon and brushed aluminium with exquisite leather seats featuring attractive contrasting stitching. First-class comfort functions complete the exclusive range of Audi design selection.

The fuel consumption and CO₂ emission figures can be found on page 97.

Audi design selection Vermont brown

The Audi design selection Vermont brown includes the following:

- Comfort sport seats in Valcona leather, Vermont brown with accordion pleats, contrasting stitching and piping in granite grey
- Seat belts in black
- Headlining, upper pillar trim and sun visors in Alcantara, lunar silver (optionally available in Alcantara, black)
- Rear parcel shelf in Alcantara, black
- Multifunction sport leather steering wheel in 3-spoke design in black with S-specific contrasting stitching in Vermont brown, S8 emblem and aluminium-look shift paddles
- Selector lever in piano finish, black
- Top side of dashboard in black with stitching in black
- Underside of dashboard in black
- Door armrest, centre console and knee pad in black with contrasting stitching in Vermont brown
- Door trim inserts in Alcantara, black
- Centre console and wood trim on the back of the front seats in piano finish, black
- Carpet and floor mats in velour, black
- Upper inlay in carbon red

Additional equipment:

- Metallic or pearl effect paint finish
- Seat heating, front and rear
- Seat ventilation and massage function, front
- Comfort head restraints, rear
- 4-zone deluxe automatic air conditioning
- Full-leather package including headlining and rear parcel shelf in Alcantara as well as electric sunblinds on the rear window and on the rear door windows
- design selection emblem in the door trims

Audi design selection sycamore grey

The Audi design selection sycamore grey includes the following:

- Comfort seats in Valcona leather, sycamore grey with accordion pleats, contrasting stitching and piping in brass gold
- Seat belts in black
- Headlining, upper pillar trim and sun visors in Alcantara, snow white
- Rear parcel shelf in Alcantara, sycamore grey
- Multifunction leather steering wheel in marble grey with shift paddles
- Selector lever in leather, marble grey
- Top side of dashboard in marble grey with contrasting stitching in sycamore grey or brass gold
- Underside of dashboard in sycamore grey
- Door armrest, centre console and knee pad in sycamore grey with contrasting stitching in brass gold
- Door trim inserts in Alcantara, sycamore grey
- Centre console and wood trim on the back of the front seats in fine grain ash, natural pearl grey
- Carpet and floor mats in velour, sycamore grey
- Upper inlay in fine grain ash, natural pearl grey
- Lower inlay in brushed aluminium, silver

Additional equipment:

- Metallic or pearl effect paint finish
- Comfort centre armrest, front
- Seat heating, front and rear
- Seat ventilation and massage function, front
- Comfort head restraints, rear
- 4-zone deluxe automatic air conditioning*
- Ambient lighting
- Full-leather package including headlining and rear parcel shelf in Alcantara as well as electric sunblinds on the rear window and on the rear door windows
- Extended aluminium-look interior
- design selection emblem in the door trims

Audi design selection Balao brown

The Audi design selection Balao brown includes the following:

- Comfort seats in Valcona leather, Balao brown with accordion pleats, contrasting stitching and piping in snow white
- Seat belts in black
- Headlining, upper pillar trim and sun visors in Alcantara, snow white
- Rear parcel shelf in Alcantara, Balao brown
- Multifunction leather steering wheel in mocca brown with shift paddles
- Selector lever in leather, mocca brown
- Top side of dashboard in mocca brown with contrasting stitching in snow white or mocca brown
- Underside of dashboard in Balao brown
- Door armrest, centre console and knee pad in Balao brown with contrasting stitching in snow white
- Door trim inserts in Alcantara, Balao brown
- Centre console and wood trim on the back of the front seats in fine grain ash, natural balsamic brown
- Carpet and floor mats in velour, Balao brown
- Upper inlays in fine grain ash, natural balsamic brown
- Lower inlay in brushed aluminium, silver

Additional equipment:

- Metallic or pearl effect paint finish
- Comfort centre armrest, front
- Seat heating, front and rear
- Seat ventilation and massage function, front
- Comfort head restraints, rear
- 4-zone deluxe automatic air conditioning*
- Ambient lighting
- Full-leather package including headlining and rear parcel shelf in Alcantara as well as electric sunblinds on the rear window and on the rear door windows
- Extended aluminium-look interior
- design selection emblem in the door trims

* For A8 hybrid and A8 L hybrid with 3-zone deluxe automatic air conditioning.

You have an exclusive character. So why shouldn't your Audi have one too?

That the Audi exclusive range aspires to exclusivity is already evident from its name. Selected décors and coloured leather can be combined with customised paint finishes from the large selection of Audi exclusive colours to suit your own personal preferences. So you can highlight your car's exceptional character to even better advantage. Your Audi partner and the Audi exclusive Studio of the Audi Forum Neckarsulm await your wishes.

Audi A8 L with Audi exclusive customised paint finish in saddle brown, pearl effect

Audi Sport cast aluminium wheels in 5-arm structured design

Audi exclusive leather upholstery and trim (package 4) in magnolia/chestnut brown

Comfort sport seats, front in Valcona leather, magnolia; stitching, accordion pleats and seat side bolsters in chestnut brown

Upper inlay in piano finish, black and lower inlay in high-gloss black

Audi exclusive carpet and floor mats in magnolia with leather piping in chestnut brown

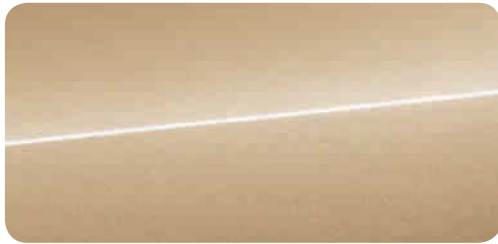

The selector lever in leather, colour-coordinated with your choice of interior colour, sits pleasantly softly in the hand. The inlays in piano finish, black create a sporty yet elegant look. The exquisite ambience is rounded off by the comfort sport seats in magnolia with accordion pleats and stitching on seat side bolsters and head restraints in chestnut brown. The shaped seat side bolsters provide for comfortable lateral hold, the seat centre panels in diamond-patterned stitching for pleasant seating comfort.

These are just a few ideas for how you can customise your A8. Find out more: your Audi partner and the Audi exclusive Studio of the Audi Forum Neckarsulm await your wishes.

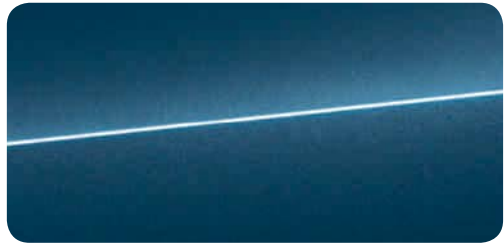

The fuel consumption and CO₂ emission figures can be found on page 96.

Brilliant character. Exquisite and unique – the A8 Audi exclusive concept.

The strictly limited-edition Audi A8 L W12 combines outstanding material quality with brilliant individuality. Exquisite leather from the Italian luxury design house Poltrona Frau and fine wood trim combine to turn this already peerless vehicle into a unique one. The natural grain of the leather, for example, mirrors the car’s distinctive character. Experience a new definition of exclusive comfort. In a car of which only fifty will ever exist in the entire world. A unique definition of personal comfort.

The A8 Audi exclusive concept from quattro GmbH.

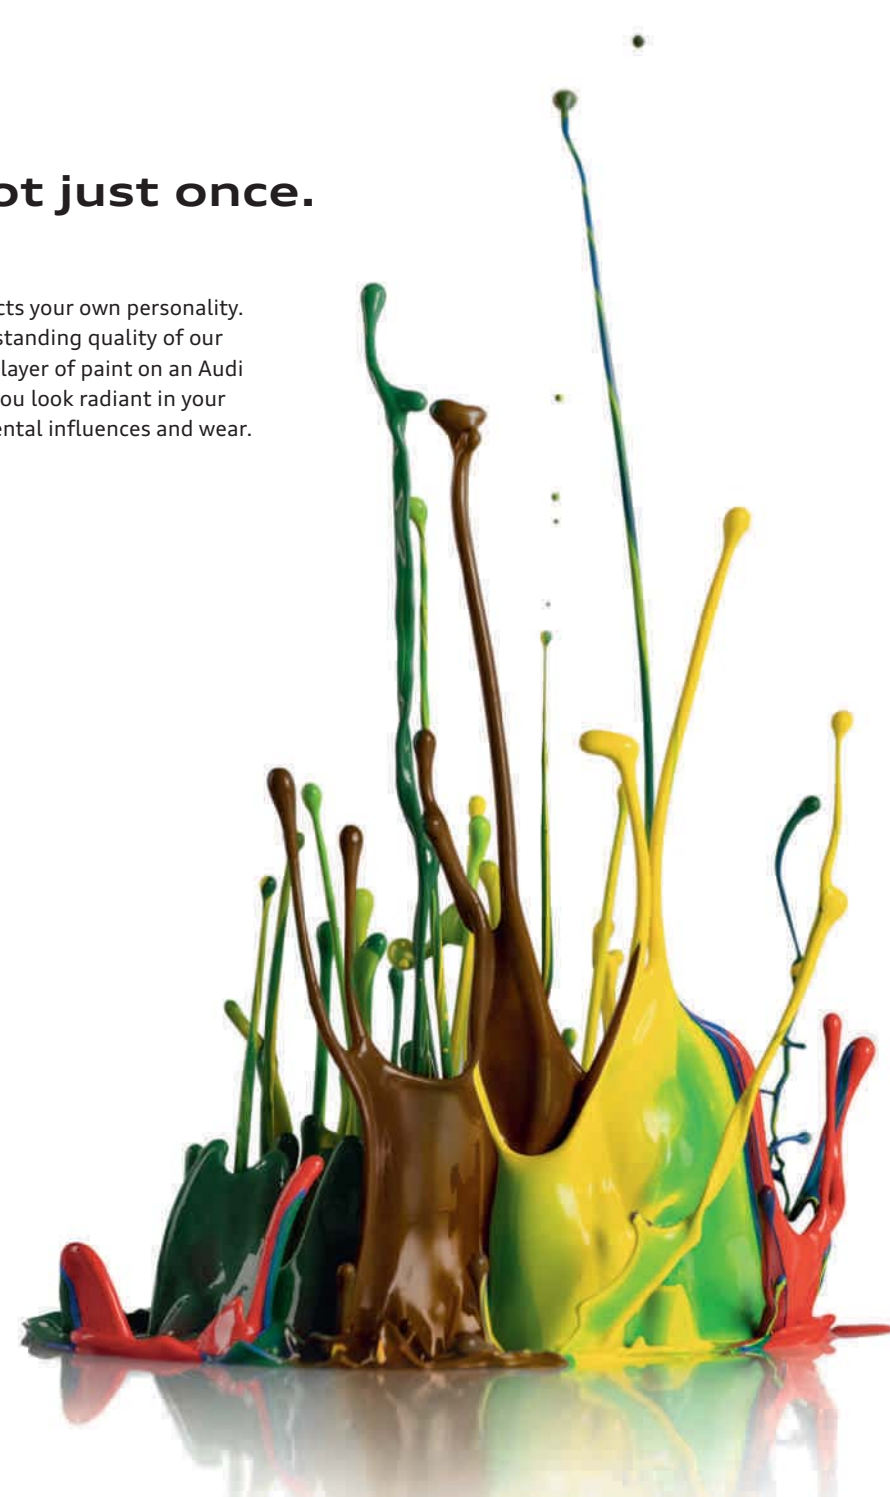

- Highlights**
- Audi exclusive mineral grey, metallic customised paint finish.
 - Leather upholstery and trim from Poltrona Frau in Agatha cognac and Valcona leather in granite grey with diamond-patterned stitching on the seat centre panels in Agatha cognac
 - Seat side bolsters with Poltrona Frau embossing
 - Inlays in fine grain ash, olive-patterned natural silver brown
 - Headlining in Alcantara, snow white
 - Audi exclusive carpet and floor mats in jet grey; leather piping on floor mats from Poltrona Frau in Agatha cognac with contrasting stitching in jet grey
 - Audi exclusive seat belts in Agatha cognac
 - Audi exclusive concept door sill trims with corresponding limited-edition number (1/50)
 - Includes a leather care kit

The fuel consumption and CO₂ emission figures can be found on page 97.

Your Audi is painted not just once. But four times.

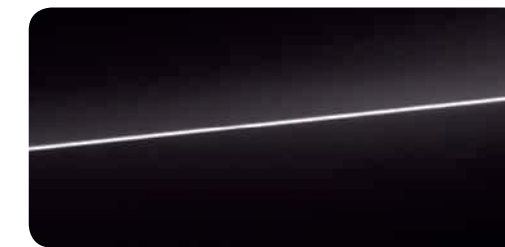

When you choose a paint colour, choose one that best reflects your own personality. But whichever colour you opt for, you can count on the outstanding quality of our painting process. Though no thicker than a human hair, the layer of paint on an Audi is actually made up of four different coats. So not only do you look radiant in your Audi A8, the car is also optimally protected from environmental influences and wear. For its entire lifetime.

Quality given form. And a brilliant finish. Audi wheels.

To make sure you have peace of mind for every metre of your drive, Audi puts its wheels through an exacting series of specialised test procedures. Hardness tests, for example, aim for maximum stability, while a copper accelerated salt spray test – or CASS for short – using acetic acid guarantees the greatest possible corrosion protection. Thanks to these and many other measures, we can ensure that every Audi wheel offers maximum quality – even after scores of kilometres. No matter which of the numerous designs you choose.

Fixedated on quality.

With Audi seats, you can rely not only on elegant materials and top-class workmanship, but on comprehensive testing procedures as well. Audi tests the quality of all seat leather in its own laboratory, for instance. 45 tests are used to determine durability alone. Clamped in automatic jigs, the leather samples have to show how evenly they stretch, where they start to tear and when they start to develop folds, how abrasion proof and flame resistant they are. Only leather that passes all the tests with flying colours is used for Audi seats.

| Leather packages

Leather package
centre console including knee pad, door armrest upholstery and steering wheel airbag cover in leather with stitching

Extended leather package
in addition to the contents of the leather package, includes: lower door trim including door pockets, underside of instrument panel including glove compartment, and MMI fascia in leather with stitching

| Audi exclusive

Audi exclusive leather upholstery and trim*
Individual choice of colour for leather/stitching/piping. An extract from the range of Audi exclusive leathers can be found from page 64 onwards.

| Seat upholstery

Valcona leather
high-quality leather which contributes to the elegant charisma of the interior. The low use of lacquer allows the material to breathe whilst the non-grained surface underlines the sophisticated character. Tanned without the use of chromium, dyed through and treated with non-fading colour pigments.

Natural leather
The natural characteristics of the leather and an excellent seating climate impart a luxurious character. Low use of lacquer and a non-grained surface. Over time, characteristic signs of use create a typical patina. Tanned without the use of chromium, dyed through and treated with non-fading colour pigments.

Unicum leather
Unicum leather is an exclusive natural leather. The leather is tanned using only plant extracts, is completely dyed through, is not coated with lacquer and yet is water- and dirt-repellent. The new combination of tanning agents creates a special microclimate that ensures exceptional moisture control. This method enables the natural characteristics of the leather to be shown off to their best advantage, the result being excellent breathability, softness and an incomparable natural feel. The typical natural features of the leather and any surface irregularities are also allowed to come through. A very special aura is created thanks to the agreeable feeling of warmth, the exquisite classic leather aroma and the natural feel of the material. Over time, characteristic signs of use create a typical patina.

| Seat variants

- 1 Standard seats, front
- 2 Comfort seats, front
- 3 Comfort seats, front with seat ventilation
- 4 Comfort sport seats, front
- 5 Comfort sport seats, front with seat ventilation

| Headlinings

Headlining and rear parcel shelf in Alcantara
in black, lunar silver, Atlas beige or silk beige to match the selected interior colour; headlining, upper pillar trim, sun visors and rear parcel shelf in Alcantara. Interior colours velvet beige and titanium grey come with matching rear parcel shelf.

Audi exclusive headlining in Alcantara¹
headlining, pillar trims, sun visors and headlining roof panel in Alcantara. Available in all Audi exclusive Alcantara colours. Grab handles, coat hooks and light unit are colour coordinated.

Audi exclusive rear parcel shelf in Alcantara¹
available in all Audi exclusive Alcantara colours

| Seating comfort

Seat heating, front
heats the seat and backrest centre panel, seat and backrest side bolsters, as well as thigh support; can be individually adjusted for the driver and front-passenger seats in 3 stages via a direct selection button on the air-conditioning controls

Seat heating, front and rear
functions as for seat heating, front; also for the outer rear seats, can be regulated separately

Seat ventilation, front
By drawing in air, the system ensures a pleasant seating climate can be enjoyed even in high temperatures; seat ventilation for the seat and backrest centre panels, the seat and backrest side bolsters as well as the thigh support for the driver and front-passenger seats (can be adjusted in 3 stages); automatic seat heating to prevent cold seats

Seat ventilation, front and rear
functions same as for seat ventilation, front plus ventilation for the seat and backrest centre panels of the outer rear seats

Massage function, front
massages the muscles of the driver and front passenger using 10 pneumatic cushions; 5 different programs (Wave, Tapping, Stretch, Back, Shoulder) and 5 levels of intensity can be selected via multifunction switches on the seat; display in MMI

Massage function, front and rear
same functions as massage function for the front seats, plus, for the outer rear seats, a choice of 2 different programs (Wave, Tapping) and 3 levels of intensity; relaxation seats have a choice of 4 different programs (Wave, Tapping, Stretch, Back) and 5 levels of intensity; can be selected from the centre armrest in the rear

Comfort centre armrest, front
with fold-open storage compartments; divided for driver and front passenger; infinite vertical/horizontal adjustment

Memory function for standard seats, front
memory function for driver and front-passenger seat, steering wheel, both exterior mirrors, head restraint height and seat belt height at front; includes electric adjustment of the front head restraint and belt height

| Rear seats

Comfort head restraints, rear
Manually adjustable side bolsters provide enhanced comfort and good lateral support

Footrests, rear
for comfortable travel in the rear; available in pairs

Audi exclusive rear footrests¹
colour-coordinated with the Audi exclusive carpet

Rear seat package in sport seat look¹
electrically adjustable rear bench seat combined with comfort sport seat look

Rear seat system
3 seats, with fold-out centre armrest including 2 cup holders and one storage compartment. (The image shows rear seat system in conjunction with comfort seats, front.)

Individual seat package, rear
• 3-seater rear seat system with 2 electrically adjustable individual seats
• adjustment of fore/aft position, seat and upper backrest angle
• pneumatic lumbar support
• memory function for the individual seats
• comfort head restraints, rear
• 4-zone deluxe automatic air conditioning²
• comfort centre armrest, rear, with wood or carbon trim and controls
• electric sunblinds for the rear window and rear door windows
• fore/aft position of front-passenger seat electrically adjustable from the rear
(The image shows individual seat package, rear in conjunction with comfort seats, front.)

Individual seat package, rear with full-length leather-covered centre console
2 individual seats in rear, electrically adjustable; includes the following features in addition to the contents of the individual seat package, rear:
• full-length leather-covered centre console with armrest, wood trim, controls and 230V socket, leather package and ambient lighting
• seat ventilation and massage function, front and rear
• additional storage possibilities in the centre console
(The image shows individual seat package, rear with full length leather-covered centre console in conjunction with comfort sport seats, front, Audi exclusive leather upholstery and trim (see page 64 onwards) and the optional Rear Seat Entertainment)

Relaxation seat package, rear with full-length leather-covered centre console
2 individual seats in rear, electrically adjustable; Same as the individual seat package, rear with full-length leather-covered centre console but with the following additional features:
• luxurious relaxation seat behind the front-passenger seat with footrest on the back of the front-passenger seat backrest
• pneumatic massage as well as seat ventilation and seat heating front and rear
• extending table in the centre console
• Rear Seat Entertainment
(The image shows the relaxation seat package, rear with full-length leather-covered centre console in conjunction with comfort seats, front.)
Please note: Front-passenger seat available only with restricted functions: without adjustable upper backrest, head restraint height, lumbar support, seat and backrest side bolsters; seat ventilation only for the seat cushion, massage function not available

Experience fascination. Down to the last detail.

Exclusive ambience is a question of style. Your style. A style you can refine right down to the last detail. Create tangible accents with high-quality Audi inlays. Take pleasure in smooth wood that radiates a natural warmth. Experience the fascination of open-pore wood whose exclusivity you can literally feel. Or make a personal statement with combinations of fine woods and aluminium trim – and allow your own personal taste to determine the character.

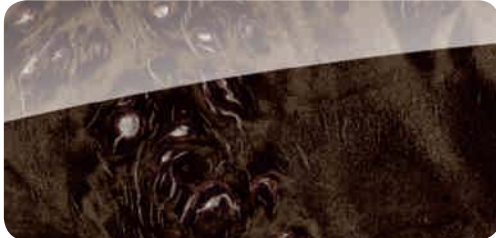

| Upper inlays

Walnut, dark brown
choice of lower inlay in high-gloss black or brushed aluminium, silver

Vavona, Assam grey
choice of lower inlay in high-gloss black or brushed aluminium, silver

Poplar, brown silver
choice of lower inlay in high-gloss black or brushed aluminium, silver

A fine finishing touch.

Not just any wood is allowed to adorn the interior of your Audi. The fine veneers for the inlays are stripped from the trunks and so-called root burls. Normally, a set of veneers for one car comes from just one burl or trunk to minimise variation. The production process utilises both state-of-the-art machines and the oldest tool in the world – the human hand, with some parts being crafted and polished manually to give them a unique feel.

*From quattro GmbH.

| **Headlights**

Xenon plus
intensive illumination of the road, good uniformity and range, both close up and in the distance thanks to headlights utilising durable gas discharge technology for dipped and high beam. Automatic-dynamic headlight range control prevents oncoming traffic from being dazzled. LED daytime running light strip, all-weather light and headlight cleaning system are integrated into the system.

Audi Matrix LED headlights
This innovative technology combines a camera system with LED light sources for adaptive light distribution control. If other road users are detected, the system selectively dims just the area of light falling in front of these vehicles but remains on high-beam in the other areas. Maximum illumination is therefore available at all times, within system limits. The main light functions performed when the vehicle is unlocked (coming home/ leaving home function), when the driving lights are activated and when the respective light distribution patterns are switched, as well as the control process when oncoming traffic passes by, are visible in the headlight as dynamic processes and are tailored to provide the driver with optimum lighting comfort and convenience. The conventional division between dipped and high beam, therefore, is virtually dispensed with. The familiar convenience functions such as the static turning light, all-weather light, dynamic cornering light, variable headlight range control and high-beam assist, junction light, motorway light and travel mode are integrated into the LED technology. They allow near-daylight illumination of the road with minimum energy requirements, a long service life and excellent recognition by other road users thanks to the crisp Audi lighting pattern with day and night design configurations. The daytime running lights and dynamic indicators are implemented in the same light guide and together create the striking Audi lighting signature. Includes headlight cleaning system. The lighting assistant's convenience functions are supplemented by the travel mode, with GPS-assisted switching between left- and right-hand drive modes, and the marking light which, in conjunction with the night vision assistant, illuminates detected pedestrians.

LED rear lights
brake lights, tail lights, indicators and rear number plate lights in low-energy LED technology. Faster activation of the brake lights facilitates earlier recognition by the driver behind. Also included are 2 rear fog lights, reversing lights in white and a 3rd high-mounted brake light in the rear window

LED rear lights with dynamic indicators
same functions as the LED rear lights, but additionally feature a dynamic and quickly recognisable lighting pattern for the indicators. The segments of the LED light band are illuminated in turn within milliseconds, creating a pulse of light that runs outwards in the direction in which the car is turning. When operated, the indicators send a distinctive, innovative signal to other road users

| **Interior lighting**

Ambient lighting
anti-glare background lighting during the journey, passenger compartment lighting in LED technology; consisting of a light band in the roof module, lighting for door pockets, footwells, rear and door sill trims; surround lighting for centre console (floating effect); brightness can be adjusted in 4 zones, each with 20 dimming stages; choice of 3 colour moods can be selected in the MMI

Interior and exterior lighting package
interior lighting with glove compartment lighting; reading lights in the roof module, footwell lighting, front, inside door handles, vanity lights, light bands at the sides in the headlining, side-mounted reading lights in the rear and luggage compartment lighting in LED technology; exterior lighting with courtesy lighting on the underside of the door handles and handle recess lighting in LED technology

Additional reading lights in the rear
2 additional LED reading lights integrated into the vehicle headlining

Vanity mirrors and additional reading lights in the rear
2 additional LED reading lights integrated into the vehicle headlining and 2 illuminated vanity mirrors

| **Interior design**

Audi exclusive cardan reading lights in the rear*
2 additional swivelling reading lights with LED technology, integrated into the vehicle headlining. Cone of light from reading lamps can be manually adjusted

Door sill trims with aluminium inlays
with illuminated quattro logo in combination with ambient lighting; with model-specific illuminated logo for the A8 hybrid, A8 L hybrid, S8 and A8 L W12

Audi exclusive personalised door sill trims, front and rear*
The aluminium inlay on the front and rear door sill trims can be personalised with a logo.

Audi exclusive floor mats*
Individual choice of colour for the floor mats, the leather piping and the stitching from the range of Audi exclusive colours.

Audi exclusive carpet and floor mats*
Individual choice of colour for the carpet, the floor mats, the leather piping and the stitching from the range of Audi exclusive colours.

| Steering wheels/controls

Multifunction leather steering wheel in 4-spoke design with shift paddles
for operation of installed infotainment equipment; electrically adjustable in height and reach, with full-size airbag; shift paddles for manual gear changing; colour-coordinated with the selected colour for the top side of the dashboard

Multifunction leather steering wheel in 4-spoke design with shift paddles, heated
same functions as multifunction leather steering wheel in 4-spoke design with shift paddles but steering wheel rim additionally heated

Multifunction sport leather steering wheel in 3-spoke design with shift paddles
for operation of installed infotainment equipment; electrically adjustable in height and reach, with full-size airbag; shift paddles for manual gear changing; colour-coordinated with the selected colour for the top side of the dashboard

Multifunction sport leather steering wheel in 3-spoke design with shift paddles, heated
same functions as multifunction sport leather steering wheel in 3-spoke design with shift paddles but steering wheel rim additionally heated

Selector lever in leather
colour-coordinated with the selected vehicle interior colour and to match the top side of the dashboard; with shift-by-wire technology

Selector lever in wood
matched to the selected inlay; with shift-by-wire technology

Audi exclusive selector lever in wood¹
available in a choice of 6 different Audi exclusive woods (not available in tamo ash, natural dark brown); with shift-by-wire technology

Selector lever in carbon Atlas
with shift-by-wire technology

Steering wheel rim with wooden segments¹
for multifunction leather steering wheel in 4-spoke design with shift paddles; available in walnut, brown, vavona, Assam grey, fine grain ash, velvet brown, as well as fine grain birch, pearl beige

Audi exclusive steering wheel rim with wooden segments¹
for multifunction leather steering wheel in 4-spoke design with shift paddles; customised with Audi exclusive wood and leather; individual choice of various Audi exclusive colours for stitching; specific Audi exclusive seam detail

Audi exclusive leather steering wheel¹
leather for the steering wheel rim and airbag cover available in all Audi exclusive colours; individual choice of colour for stitching in various Audi exclusive colours with specific Audi exclusive seam detail

Audi exclusive leather controls¹
leather for the steering wheel rim, selector lever and airbag cover available in all Audi exclusive colours; individual choice of colour for stitching in various Audi exclusive colours; stitching on the steering wheel rim with specific Audi exclusive seam detail

| Roof systems

Slide-and-tilt glass sunroof
electric, with tinted single-glazed safety glass and infinitely adjustable sun screen; wind deflector extends automatically in stages depending on roof opening and speed; convenience closing from outside via the vehicle key

Solar slide-and-tilt glass sunroof
Solar cells in the roof provide the power to generate a continuous flow of air to reduce passenger compartment temperature when the vehicle is parked. Operated like the slide-and-tilt glass sunroof, but has no infinitely adjustable sun shield

Panoramic glass sunroof
2 sections; electric activation to raise and open the front glass section as well as to raise the rear glass section, opens and closes automatically; with tinted glass insert and 2 electrically operated sunblinds as well as convenience closing via the vehicle key; ensures that the interior is flooded with light; good acoustics and low wind noise when the sunroof is extended or fully opened; improves the interior climate by means of efficient ventilation whilst at the same time reducing draughts; vanity mirrors and additional reading lights in the rear. With selected exterior colours², the surrounding roof is painted in black.

| Glazing

Dark-tinted windows (privacy glazing)
dark-tinted rear window, rear door windows and rear side windows. Optionally with windscreen heater

Double/acoustic glazing
provides improved exterior noise insulation and theft protection thanks to the 2 panes of glass bonded together by a plastic film

Insulating/acoustic glass
provides improved exterior noise insulation and theft protection thanks to the 2 panes of glass bonded together by a plastic film. An additional reflective coating reduces the build-up of heat in the interior. Viewing window for automatic toll collection devices in the upper right-hand corner, to the side of the interior mirror

Windscreen heater
heats insulating/acoustic glass windscreens. Full surface of windscreen heated without heating wires that might impair visibility, makes rapid defrosting easier and ensures that the windscreen stays mist free; heating is controlled via the deluxe automatic air conditioning

Sunblinds
optionally:

electrically operated for the rear window

electrically operated for the rear window and rear door windows

| Climate control

Deluxe automatic air conditioning
separate temperature and air flow control for head area and footwell for both driver and front passenger with indirect ventilation and sunlight-dependent control; air intake control and recirculation mode, residual heat utilisation, combined/fine particulate filter, air quality and humidity sensor and key-coded setting; choice of 3 climates: gentle, medium and intensive

3-zone deluxe automatic air conditioning
in addition to deluxe automatic air conditioning: air-conditioning controls for rear-compartment climate control in the rear centre armrest with separately adjustable temperature and blower settings and air distribution; rear-compartment A/C functions can also be adjusted from the air-conditioning controls in the front

4-zone deluxe automatic air conditioning
greater comfort for the rear passengers and enhanced heating and cooling performance through the use of a second air-conditioning unit; same as deluxe automatic air conditioning but with the following additional features: air conditioning controls for rear-compartment climate control in the rear centre armrest with separately adjustable temperature and blower settings and air distribution for the right- and left-hand sides

Auxiliary heating/ventilation
The auxiliary heating warms up the interior and removes ice from the windows without starting the engine. The auxiliary ventilation system supplies fresh air and reduces the temperature of the interior. Intelligent control function with timer and departure time programming for time- and energy-efficient calculation of heating duration. Separate radio-operated remote control with illuminated display

Ioniser
can help to improve wellbeing and attentiveness. Ionisation reduces harmful particles and germs in the air, thus improving the air quality in the vehicle interior. Activation by means of a button on the right-hand B-pillar

Lights Design Steering wheels/controls

| Closing systems

Power-assisted door closing
automatically pulls doors that are not completely closed into the lock; includes electric child-proof locks on the rear doors

Remote control key
unlocks and locks doors, luggage compartment lid and tank flap; includes keyless go function and convenient closing/opening of the windows

Luggage compartment lid, electrically opening and closing
opening via button on the vehicle key or in the driver's door or via the soft touch button in the luggage compartment lid handle; additionally by means of foot gesture (kicking motion) if convenience key with sensor-controlled release of luggage compartment lid is ordered; closing via button on the inside of the luggage compartment lid, the button in the driver's door or the convenience key (long press). In conjunction with the convenience key, it is possible to close the luggage compartment lid and simultaneously lock the car via an additional button on the inside of the luggage compartment lid. Includes power-assisted closing

Comfort Infotainment Assistance systems Technology/safety Audi Extended Warranty

| Storage Transport

Convenience key with sensor-controlled release of the luggage compartment lid
Doors and luggage compartment lid can be unlocked and locked without actuating the vehicle key you are carrying with you; doors are unlocked automatically by touching the door handles, the luggage compartment by operating the handle strip on the luggage compartment lid. Moving your foot (in a kicking motion) below the rear bumper causes the luggage compartment lid to swing open automatically. The luggage compartment lid can also be opened separately when the vehicle is locked

Garage door opener (HomeLink)
programmable radio-operated remote control with operating buttons integrated into the front roof module; can be used to open many garage doors and exterior gates; allows control of security systems and lighting systems; code identification guidance and set-up assistance provided by the MMI. For further information please contact your Audi partner or visit www.eurohomelink.com.

Anti-theft alarm
monitors doors, bonnet and luggage compartment lid; includes interior monitoring (can be deactivated), tow-away protection via a vehicle angle of inclination sensor and signal horns independent of the vehicle electrical system; with safe-locking function: prevents the doors from being opened from the inside once the vehicle has been locked with the vehicle key

Through-loading facility
enables extended loading possibility for the practical transportation of long objects

Through-loading facility with removable ski/snowboard bag
for the practical transportation of long objects, e.g. up to 2 pairs of skis or 1 snowboard

| Storage Transport

Audi exclusive coolbox¹
storage compartment for two 1 litre bottles lying down and additional storage compartment for cans and glasses; with compressor cooling technology and 2 possible temperature settings: -6 °C freeze, +6 °C cool; interior LED lighting

230V/115V/100V socket
for direct operation of electrical consumers such as power adapters for laptops, mobile phones, games consoles or other AC equipment with a power output of up to 150 watts; works when the ignition is switched on; replaces 12V socket/cigarette lighter in rear

Audi exclusive storage compartment¹
additional lockable storage compartment, integrated into the full-length centre console.

Audi exclusive bar compartment¹
additional storage compartment for 2 glasses, integrated into the full-length centre console.

Non-smoker package
Omission of ashtray in the front centre console

Cigarette lighter and ashtray
illuminated, front and rear

Audi exclusive foldaway table¹
with fine wood inlay, on the back of the driver's and/or front-passenger seat backrest; operated manually

Personalisation of the Audi exclusive foldaway table¹
customisation of the fine wood folding table with lettering, a logo or a coat of arms. The feature is visible when the table is closed and folded out.

| MMI®/navigation

A8 hybrid luggage set
customised for the A8 hybrid and A8 L hybrid luggage compartment. Set comprises 2 suitcase trolleys (each 63 l) and 2 cabin trolleys (each 40 l) featuring polycarbonate shells with nylon fabric and telescopic handles, smooth running wheels and handle application made of cowhide; 1 shoe bag (20 l) made from grey nylon fabric for holding up to 2 pairs of shoes

Luggage compartment package
for flexibility and convenience when transporting items and travelling; comprises a luggage net for securing to the lashing points on the luggage compartment floor, 2 fold-out bag hooks integrated into the top of the luggage compartment, a 12V socket on the side wall and an umbrella holder on the inside of the luggage compartment lid

Trailer towing hitch
electrically swivelling, ball head and ball joint coupling made from special steel; operated via buttons in the luggage compartment; includes trailer stabilisation system via the Electronic Stabilisation Control (ESC) The integrated swivelling system socket enables continuous operation of electrical equipment in the trailer or caravan during a journey.

Driver information system with colour display
displays a host of useful information on a high-resolution 7-inch colour display in the instrument cluster. Attention assist warns the driver, in the form of an acoustic signal and a visual warning, if it has evaluated that the driver's attention is lapsing. Integrated efficiency program provides assistance in the form of fuel consumption summaries. A8 hybrid and A8 L hybrid models have an additional display of the flow of energy

MMI®
integrated operating concept consisting of MMI terminal as the control unit and MMI display for showing various menus. The high-resolution 8-inch colour display in high-quality piano finish look is retractable. 6 freely programmable radio station presets enable fast retrieval

MMI® touch
context-related entry of letters, characters and numbers on touch-sensitive control panel with handwriting recognition for intuitive operation of the MMI; selection from address book and entry of navigation destinations or phone numbers with acoustic acknowledgement allows drivers to keep their eyes on the road; simple movement of navigation map, selection of points of interests and retrieval of 6 freely programmable radio stations; part of MMI navigation plus

MMI® navigation plus with MMI touch

- hard drive navigation² with topographical map display and display of many places of interest and city models in 3D.
- choice of 3 alternative routes, scrolling along the route and manoeuvring within the map
- dynamic route guidance with TMCpro and read-aloud function for traffic messages
- route information displayed in split-screen format. Detailed intersection map, motorway exits and lane recommendations also in driver information system
- vehicle support based on navigation data and speed limit display
- intuitive operation via MMI touch with handwriting recognition for entry of letters and numbers; can be controlled without the need for drivers to divert their eyes from the road
- voice control system enables operation by means of whole-word entry of address in one sentence
- Bluetooth interface, 20 GB music storage and Audi music interface
- use of services supported by Audi connect³

The display in A8 hybrid and A8 L hybrid models features an additional display of the energy flow and the consumption diagram

Powermeter in the instrument cluster
for displaying the operating modes in the A8 hybrid and A8 L hybrid (pure electric driving, driving with combustion engine only, recuperation, coasting, boost) as well as the availability of the hybrid system

The model-specific standard and optional equipment can be found in the index from page 102 onwards.

¹ From quattro GmbH. ²The navigation data for several countries is stored on the hard disc. ³Requires the optional Audi connect including car phone.

| Entertainment

MMI® radio plus
can be operated via MMI; equipped with triple tuner with phase diversity for improved sound and reception; dynamic station list and TP memo function (automatic storage of traffic messages) whilst driving; music and videos played via the single-DVD drive, the 2 SDHC memory card readers and the jukebox with 20 GB storage capacity; each supports audio formats (MP3, WMA and AAC) and video formats (MPEG-1 to MPEG-4, WMV, Xvid) and playlists. Music and video files can be copied to the integrated hard disc. Files with digital rights management (DRM) cannot be played.

Digital Audio Broadcasting
in addition to the range of analogue stations, reception of digitally broadcast radio stations¹ broadcast according to DAB standards, including DAB+ and DMB audio; display of information accompanying the programme (e.g. artist and track, if provided by the radio station) as well as additional information in the form of a slide show (e.g. cover and weather)

Digital TV reception
reception of digitally broadcast (DVB-T), uncoded television stations¹ (MPEG-2 or MPEG-4 standard), DVB-T audio stations, teletext and Electronic Programme Guide (EPG); external AV-IN connection via adapter cable; no picture is possible when the vehicle is moving

Audi music interface
enables connection of portable media players², such as an Apple iPod/iPhone (music functionality) and USB storage media and MP3 players, by means of special adapter cables from Audi Genuine Accessories. In the centre console; operated via MMI or multifunction leather steering wheel; part of MMI navigation plus with MMI touch. In conjunction with the Audi music interface, the separate AUX-IN connection is omitted.

DVD/CD changer
for 6 DVDs or CDs, supports e.g. audio CDs, video DVDs, MP3, WMA, AAC, MPEG-4 and playlists as well as up to 4,000 tracks per medium. Files with digital rights management (DRM) cannot be played. Shock-resistant location in glove compartment. Can be operated via MMI

Audi sound system.
6-channel amplifier with a total output of 180 watts and 10 loudspeakers, including centre speaker and subwoofer

Bang & Olufsen Advanced Sound System
captivating surround sound reproduction with 19 loudspeakers, including subwoofer, each with its own amplifier channel. The highly efficient all-digital 5-channel ICE Power amplifier for woofer and subwoofer and the 14-channel DSP all-digital amplifier have a total output of over 1,400 watts. 5.1 surround sound reproduction is possible. Polished loudspeaker covers in aluminium and automatically extending acoustic lenses for excellent sound performance and perspective in any seat; with noise-dependent volume adjustment. Privacy function provided by encapsulated loudspeaker casings which minimise the escape of sound to the outside of the vehicle and provide privacy, for example when making phone calls.

Bose Surround Sound
impressive surround sound reproduction thanks to 12-channel amplifier with total output of over 600 watts and 14 loudspeakers, including centre speaker and subwoofer; AudioPilot® for noise-dependent volume adjustment and 5.1 surround sound reproduction; powerful and accurate bass reproduction thanks to Acoustic Wave loudspeaker technology

Rear Seat Entertainment
superb entertainment facility for the rear passengers, with 2 high-resolution adjustable-angle 10.2-inch LCD displays; access to numerous audio and video sources; use of navigation functions; shared or separate video and audio playback for each seat; sound output via the vehicle sound system or separate headphones; includes Audi music interface and MMI control panel in rear

| Communication

Audi connect including car phone
Use of Audi connect and more convenient phoning thanks to integrated car phone. The vehicle is connected to the internet by means of an integrated data module. Import of phone book entries and call list management possible.

The following services supported by Audi connect are available in your model:

Mobility & navigation

- Point-of-interest (POI) search with voice control
- Traffic information online
- Fuel prices
- Parking information
- Country information
- Navigation with Google Earth™³ and Google Street View™³
- Destination entry via myAudi or Google Maps™³

Communication

- Wi-Fi hotspot

Infotainment

- Weather
- Audi music stream
- News online
- City events
- Travel information

Use of the services supported by Audi connect is possible only with the optional MMI navigation plus with MMI touch and Audi connect including car phone. You also require a SIM card with data option – in the case of the car phone, a SIM card with phone and data option – or a Bluetooth-capable smartphone⁴ with remote SIM Access Profile (rSAP). There is a reader for your SIM card in the surround of the MMI navigation plus with MMI touch. The services are available only in conjunction with an existing or separate mobile phone contract and only within the range of the respective the mobile phone network. Additional costs may be incurred when receiving data packets from the internet, depending on the terms of your mobile phone contract, particularly when used abroad. Because of the high data volumes involved, a data flat rate is strongly recommended. The availability of the services supported by Audi connect varies from country to country. The services are provided for at least one year from vehicle delivery. 24 months after vehicle delivery, the Audi connect services will be extended free of charge once for 12 months. Ask your Audi partner about a subsequent extension of the Audi connect services.

Please visit www.audi.com/connect or contact your Audi partner for more detailed information about Audi connect; contact your mobile services provider for information about contract conditions.

¹ Reception depends on local digital network availability. ² Please contact your Audi partner or visit www.audi.com/mp3 for information on compatible media players.
³ Google and the Google logo are registered trademarks of Google Inc. ⁴ Please contact your Audi partner or visit www.audi.com/bluetooth for information on compatible mobile phones.

| Communication

Audi phone box¹
allows phone calls to be made in the vehicle by placing the mobile phone in the universal mobile phone holder in the front centre armrest; includes a hands-free facility and voice control for the telephone functions; includes an integrated coupling aerial for connection of the mobile phone with the external aerial, thus reducing radiation inside the vehicle and improving signal quality; operation via the MMI, multifunction leather steering wheel or voice control system; can be charged via USB port

Bluetooth interface
enables hands-free calls in the vehicle via the micro-phone and Bluetooth audio streaming² (depending on mobile phone compatibility). Bluetooth-capable mobile phones can be connected to the vehicle via the interface which is part of the MMI navigation plus with MMI touch

Handset in the front for car phone
for making private phone calls; easy writing of text messages thanks to automatic word recognition; cordless handset with colour display and integrated SIM card reader housed in the front centre armrest

Handsets in the front and rear for car phone
in addition to the handset in the front for car phone, a further cordless handset with colour display and integrated SIM card reader is provided; located respectively in the front centre armrest and the rear centre armrest

| Assistance systems

Parking system plus³
acoustic and visual parking system for the front and rear; provides assistance when parking and manoeuvring. Information shown in the MMI display; measurement by ultrasonic sensors concealed in the bumpers; activated when reverse gear is selected or via button on the centre console

Reversing camera³
image of area behind the vehicle shown on the MMI display, with dynamic display modes showing the calculated path (steering angle dependent); includes auxiliary lines and guidelines and identification of the point at which to apply opposite lock when parallel parking, reversing camera integrated discreetly in the handle strip of the luggage compartment lid; activated when reverse gear is selected or via button on the centre console

Park assist with display of surroundings³
uses ultrasonic sensors to search for suitable parking spaces along the side of the road and helps the driver to park and exit a parking space by performing autonomous steering manoeuvres. Calculates the ideal parking path for bay parking spaces and the ideal parking and exiting paths for kerb-side parking spaces. The driver has to accelerate, apply the brakes and monitor the parking process. The display of the surroundings warns the driver of any obstacles at the side of the vehicle, depending on the steering angle. Also additionally available with reversing camera or 360 degree cameras; activated via button on the centre console

Cruise control³
Between speeds of around 30 km/h and 250 km/h, the system maintains the desired speed provided engine power output and engine braking effect permit; automatic braking function, e.g. when driving downhill; operated via separate steering column stalk. Set speed displayed in the driver information system

Audi pre sense basic³
automatically initiates preventive passenger protection measures when required; these include: belt tensioning, activation of the hazard warning lights and closing of sunroof and windows; categorises different driving situations through the networking of the various vehicle systems

360 degree cameras³
safe pulling out of narrow parking spaces. Various display options for the area around the vehicle, including a virtual top view, can be selected on the MMI display. The driver can select between different image views in the MMI display: reversing image, front camera image, front and rear side view and bird's eye view. Includes the features of the reversing camera; activated when reverse gear is selected or via button on the centre console

Head-up display
Information relevant to the driver from assistance systems, navigation instructions and warnings is projected as required onto the windscreen in the driver's direct field of vision. The height-adjustable head-up display provides a multicoloured display with good contrast and minimal distraction from the road.

adaptive cruise control with Stop&Go function including Audi pre sense front³
detects vehicles ahead with the aid of radar sensors. The distance from the vehicle ahead is kept more or less constant by braking or accelerating (control range 0–250 km/h). Braking to a stop and automatic restart at driver's request are possible. Choice of 4 distance levels/driving modes (efficiency, comfort, dynamic and auto). Includes Audi pre sense front: enhanced brake assist function warns the driver of an imminent risk of a collision with the vehicle ahead. Can initiate partial braking if required or increase the level of braking already being provided by the driver. In addition, maximum braking is initiated at speeds below 30 km/h if there is a danger of collision with a stationary or moving vehicle in order to reduce the speed of the collision or to avoid the collision if possible. adaptive cruise control is operated via separate steering column stalk; Audi pre sense front can be deactivated via the MMI Car menu

Audi side assist including Audi pre sense rear³
emits a warning in the form of an LED display in the respective exterior mirror if a situation arises which the system deems will compromise a lane change. 2 radar sensors record the vehicle approaching at the side from behind and measure the distance and the difference in speed. The lane change assistant provides support in the speed range from about 30 to 250 km/h. To detect a possible rear-end collision, Audi pre sense rear also uses the rear sensors of Audi side assist, in addition to Audi pre sense basic. Activated via button in the mirror quadrant

Audi active lane assist³
helps to keep you in lane by applying gentle corrective steering movements. Audi lane assist is activated if the car starts to cross detected road markings and the driver has not operated an indicator. The system provides assistance in the speed range from about 60 km/h to 250 km/h. Steering wheel vibration can be adjusted if the driver wants; activated via button on the indicator steering column stalk

Night vision assistant³
assists the driver when driving at night by displaying a thermal image of the surroundings. Persons and larger wild animals are highlighted in yellow in the driver information system. If they move or if the system determines from their position that there is a potential risk, the highlighting changes to red, a warning triangle appears and a warning tone is emitted.

In conjunction with one of the following lighting systems, a highlighted person is also illuminated with 3 successive brief flashes of the headlights (marking light):

- LED headlights
- Audi Matrix LED headlights

Additional display of warning messages in the optional head-up display. Activated via button next to the light switch

¹ Please contact your Audi partner or visit www.audi.com/bluetooth for information on compatible mobile phones. ² Please contact your Audi partner or visit www.audi.com/bluetooth for information on adapters and compatible mobile phones. ³ Please note: The systems work only within system limits and assist the driver. However, the driver remains responsible for driving the vehicle and is required to be attentive at all times.

| Assistance systems

Camera-based speed limit display¹
recognition and display of speed limits, including temporary speed limit displays; a situational evaluation is carried out when driving in the wet, when there are speed limits for certain times of day, or when towing a trailer²; if a sign has not been recognised by the camera, the speed limit taken from the current navigation data (if available) is displayed via Audi connect; displayed automatically in the driver information system, additional display in the optional head-up display. The system has purely informative character, there is no intervention and no warning if the displayed speed is exceeded.

Assistance package including Audi pre sense plus¹
combines the following assistance systems:

- Parking system plus
- Audi active lane assist
- Audi side assist
- adaptive cruise control with Stop&Go function
- Audi pre sense front
- Audi pre sense rear

In addition, the last functions are supplemented by a maximum deceleration function provided by Audi pre sense plus. The systems in the assistance package complement each other and provide mutual assistance. Details of how to activate or adjust assistance systems can be found in the relevant system description.

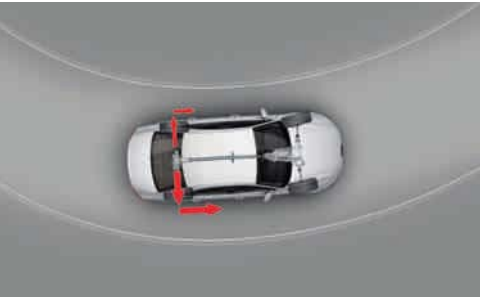

| Driving dynamics/brakes

Audi drive select
Different modes – comfort, dynamic, auto, efficiency (not for A8 hybrid and A8 L hybrid) and individual – allow you to change the vehicle’s characteristics, for example by adapting the power steering assistance, engine and gear changing characteristics and the adaptive air suspension. In addition, the system can influence the settings of other optional equipment and in efficiency mode shifts the engine, transmission, adaptive cruise control (optional) and climate control to a more fuel-efficient basic setting.

adaptive air suspension
automatically regulates the vehicle height and damping by means of the electronically controlled air suspension with infinitely variable adaptive damping system on all 4 wheels; includes ride height control and manual lift function; various modes can be selected via Audi drive select

adaptive air suspension – sport
The sport suspension based on the standard adaptive air suspension has stiffer damping. Compared to adaptive air suspension, the vehicle ride height is lowered by up to 10 mm, depending on mode.

quattro®
permanent all-wheel drive with self-locking centre differential and asymmetric/dynamic torque distribution, as well as wheel-selective torque control and Electronic Differential Lock (EDL) on all driven wheels; quattro emblem in Audi Singleframe (only for A8 and A8 L), on the luggage compartment lid and in the dashboard on the passenger side

quattro® with sport differential
The electronically controlled sport differential distributes variable amounts of drive force to each rear wheel and ensures outstanding acceleration performance in corners and stabilises the vehicle’s response to load change. It also improves direct steering characteristics and provides more agile handling due to the lower steering effort required.

tiptronic
8-speed automatic transmission with Dynamic Shift Program (DSP); option of manual control via shift paddles on the multifunction leather steering wheel; includes additional sport program

Electromechanical power steering
combines precision and comfort with exceptional energy-saving technology. The electromechanical steering system with speed-sensitive steering assistance ensures stability at high speeds whilst also being light and precise when parking and manoeuvring. With active countersteering to provide steering assistance to the driver for enhanced vehicle stability

Ceramic brake³
19-inch high-performance brake system with carbon-fibre reinforced ceramic brake discs and brake callipers painted in high-gloss anthracite and featuring the “Audi ceramic” logo at front and rear; ventilated and perforated brake discs with special cooling channels

Secondary collision brake assist
Following an accident, uncontrolled continued vehicle motion is prevented in certain situations. In these cases secondary collisions can be avoided.

Dynamic steering
improves handling and ride comfort by dynamically regulating the steering according to the driving situation, for example when cornering, changing lanes or parking; in addition to adaptation of the steering effort, the steering angle (steering ratio) is also adapted by up to 100 % depending on the steering wheel angle, the speed and the Audi drive select setting. Vehicle stabilisation via ESC is further supported by the system’s lightning-quick steering movements.

| Technology/safety

Active Noise Cancellation
can compensate noises from individual frequencies depending on the engine speed

Audi Space Frame (ASF®) body
The lightweight Audi Space Frame is an innovative combination of materials featuring a high degree of rigidity. This provides a high level of safety with an agile driving sensation – and reduced fuel consumption. The body is made almost entirely of aluminium. Because every gram less extends the lead. New, high-strength aluminium alloys are used for panels, castings and profiles and further reduce weight. For the first time, hot-formed steel panels are also integrated into the body structure in order to further improve its function. They are located in the region of the B-pillar.

Start-stop system
helps to reduce fuel consumption and CO₂ emissions by switching off the engine automatically when the vehicle is stationary, e.g. at traffic lights. The start process is initiated as soon as the foot brake is released. Can be deactivated at any time via a button

Audi cylinder on demand
This technology helps to lower fuel consumption significantly and also reduces CO₂ emissions. If the full power of the engine’s 8 or 12 cylinders is not required, for example when operating in the partial-load range or when coasting, 4 or 6 of the cylinders are shut down. On the 4.0 litre V8 TFSI engine, this involves automatically closing the intake and exhaust valves and switching off fuel injection and ignition on 4 of the cylinders. The 6.3 litre W12 FSI engine uses a special variant of the Audi cylinder on demand technology. The system first switches off fuel injection and ignition for all cylinders of the left bank, so that the engine is operating on six cylinders. Before the temperature on this side of the engine and in the associated catalytic converter drops too much, the left bank is fired again, and the right bank is then deactivated. During extended deactivation phases, the two cylinder banks are alternately active and inactive. A display in the driver information system shows which cylinders are active

Audi TDI clean diesel
In addition to the standard equipment with catalytic converter and diesel particulate filter, the exhaust aftertreatment system installed in the models with TDI clean diesel leads to low exhaust emissions and consequently complies with the EU6 emission standard which comes into force in September 2014. This technology significantly reduces nitrogen oxides by injecting small amounts of the biodegradable additive AdBlue®⁴ into the exhaust flow. The nitrogen oxides are then split into nitrogen and water in the nitrogen-oxide catalytic converter (DeNOx catalytic converter). The separate AdBlue tank is refilled as indicated by the information in the display of the instrument cluster. We recommend having the AdBlue tank refilled at your Audi partner.

Audi exclusive seat belts⁵
Individual choice of colour for seat belt from the range of Audi exclusive colours.

ISOFIX child seat mounting and top tether for the outer rear seats
Standard bracket for the practical fastening of ISOFIX child seats; including additional fastening point (top tether).

Recommended child seats are available from your Audi partner.

| Audi Extended Warranty

Audi Extended Warranty
The Audi Extended Warranty provides extended risk cover and cost control beyond the first 2 years of the manufacturer’s warranty for a variety of claims. It can be ordered directly and only on purchase of a new car. Choice of 9 service life/total mileage combinations. Ask your Audi partner for more detailed information.

¹ Please note: The systems work only within system limits and assist the driver. However, the driver remains responsible for driving the vehicle and is required to be attentive at all times.
² Only applies to factory-fitted trailer towing hitches. ³ Please consult your Audi partner or national Audi website to find out more about the special features of the ceramic brake.
⁴ Registered trademark of the Verband der Automobilindustrie e.V. (VDA). ⁵ From quattro GmbH

Audi Genuine Accessories. As individual as the life you lead.

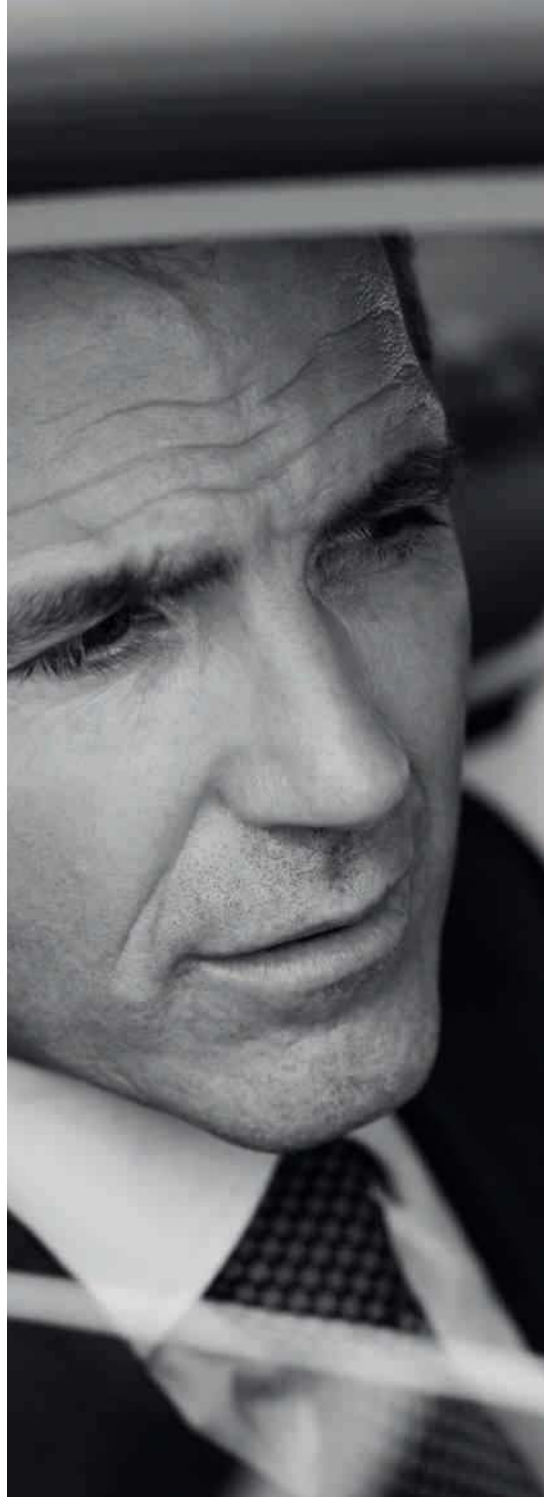

An Audi is an expression of your personality. And Audi Genuine Accessories build on this concept in the truest sense of the word, with a range of high-quality products that are coordinated with your Audi. Noted for their perfect fit, safety credentials and functionality, they serve to add even more individuality to your car and to tailor it to your own personal requirements. So that your Audi becomes your own personal Audi. These two pages contain just a small selection from the extensive range of Audi Genuine Accessories on offer.

Detailed information can be obtained from the Audi A8 accessories catalogue, at www.audi.com, and from your Audi partner.

Cast aluminium wheels in 5-arm parabola design

Exceptional design, perfectly matched to your Audi A8. With arms¹ in a gloss turned finish, size 9 J x 20. For tyre size 265/40 R 20².

Ski and luggage boxes

New Audi design with improved aerodynamics thanks to flatter, sportier lines; platinum grey roof box with brilliant black side blade and chrome-plated Audi rings; high-quality look with no visible rivets. Lockable and can be opened from both sides for easy loading and unloading. With interior handle for closing the box. Simple quick-release fastening system including torque control. Advanced position allows better access to the luggage compartment. Available in three sizes: 300 l (illustration above), 360 l and 405 l. Maximum permissible load: 75 kg

Adapter cables for Audi music interface³

Enable music and data from various mobile phones and other media players to be transferred to the optionally available Audi music interface. Can be operated via the infotainment system.

Audi child seat youngster plus

Offers superior comfort thanks to intelligent belt guidance. The backrest is adjustable in height and width. Adaptations can be made via a viewing window for size adjustment. Suitable for children from 15 to 36 kg (approximately 4 to 12 years).

Navigation update³

Map data containing upgraded contents, e.g. new roads, points of interest and restaurants. For added convenience and a more relaxed driving experience. We recommend that you combine the update with your next vehicle service.

Audi tracking system plus³

Enables a stolen vehicle to be located and tracked via GPS/GSM technology in 27 European countries. With automatic driver recognition and intelligent restart inhibitor.

¹ Please note the special information relating to wheels on page 99. ² You will find specifications on the technical characteristics of tyres on page 99. ³ For more detailed information, please contact your Audi partner. The fuel consumption and CO₂ emission figures can be found from page 96 onwards.

Explanatory notes

- ¹ The figure given was calculated using the specified measuring procedure (current version of UN-R 85).
- ² You will find specifications on the technical characteristics of tyres in the adjacent table.
- ³ Unladen weight includes driver (75 kg) and fuel tank 90 % full, calculated in accordance with the current version of Reg. (EU) 1230/2012. Optional equipment may increase the car’s unladen weight and drag coefficient, whereupon the possible payload limit and the top speed will be reduced accordingly.
- ⁴ The engine’s power output always decreases with increasing altitude. At 1,000 m above sea level, and for every additional 1,000 m, deduct 10 % from the weight of the outfit (trailer load limit + gross weight of the towing vehicle). Figure for trailer load limit applies to factory-fitted trailer towing hitch. If using the vehicle with a trailer towing hitch for commercial purposes, a digital tachograph may be required under certain conditions.
- ⁵ A vehicle’s fuel consumption and CO₂ emissions as well as deviations from the figures given do not just depend on how efficiently the vehicle uses the fuel, but are also influenced by driving behaviour and other non-technical factors. The figures given for fuel consumption and CO₂ emissions refer to the relevant standard wheel/tyre combination represented and could change if a different wheel or tyre dimension is chosen. CO₂ is the greenhouse gas primarily responsible for global warming.
- ⁶ Regulated.
- ⁷ We recommend using sulphur-free super unleaded RON 95 fuel complying with DIN EN 228. If this is not available, use sulphur-free regular unleaded RON 91 fuel complying with DIN EN 228; power output will be slightly reduced. Unleaded RON 95 fuel with a maximum ethanol content of 10 % (E10) can generally be used. Fuel consumption details refer to operation with RON 95 fuel complying with 692/2008/EC.
- ⁸ We recommend using sulphur-free super plus unleaded RON 98 fuel complying with DIN EN 228. If this is not available, use sulphur-free super unleaded RON 95 fuel complying with DIN EN 228; power output will be slightly reduced. Unleaded RON 95 fuel with a maximum ethanol content of 10 % (E10) can generally be used. Fuel consumption details refer to operation with RON 95 fuel complying with 692/2008/EC.
- ⁹ We recommend using sulphur-free diesel complying with DIN EN 590. If this is not available, use diesel complying with DIN EN 590.
- ¹⁰ The figures given were calculated using the specified measuring procedures. The figures do not refer to one individual vehicle and do not form part of any offer, but rather should be used purely for purposes of comparison between the different vehicle models.
- ¹¹ Refill the separate AdBlue* tank as indicated by the information in the display of the instrument cluster. We recommend having the AdBlue tank refilled by your Audi partner.
- ¹² Briefly.

Important note

Special information about the wheels: wheels with gloss turned finish as well as polished or partly polished aluminium wheels may not be used in wintry road conditions. For manufacturing reasons, the wheel rim surface does not have sufficient corrosion protection and it can be permanently damaged by road salt or similar.

Classifications of tyre parameters

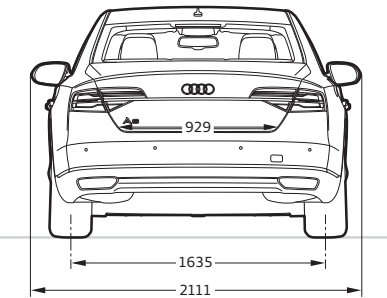

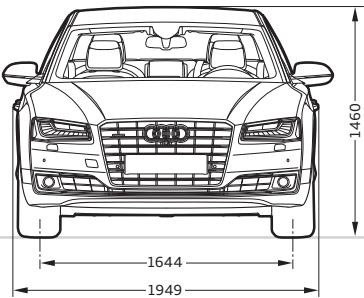

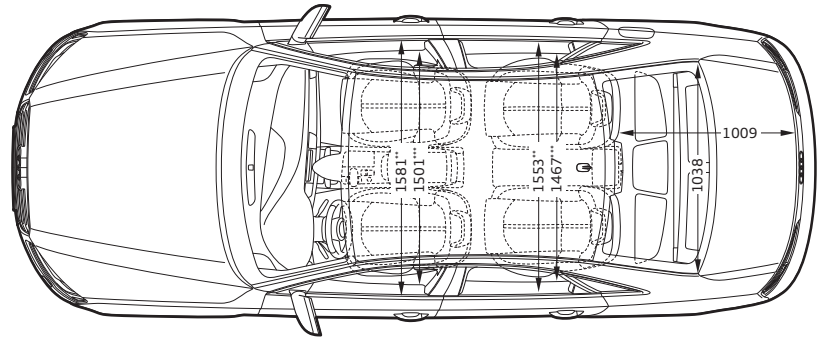

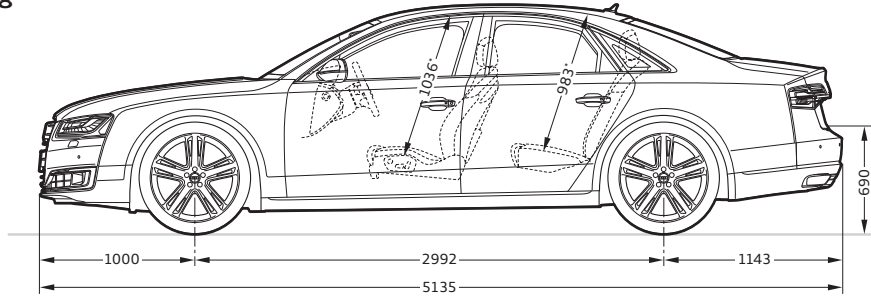

The table shows the range of fuel efficiency, wet grip and exterior noise emission classes for the different tyre sizes of the Audi A8, A8 hybrid, A8 L, A8 L hybrid, A8 L W12 and Audi S8.

	Tyre size	Fuel efficiency class	Wet grip class	Exterior noise emission class
Summer tyres	235/60 R 17	F–E	B	71 
	235/55 R 18	E–C	C–B	72–68  – 
	255/45 R 19	E	C–B	73–68  – 
	265/40 R 20	E–C	B	74–71  – 
	265/35 R 21	E	B	73 
Winter tyres	275/35 R 21	F–E	B	73–71 
	235/60 R 17	F–E	E	73–72  – 
	235/55 R 18	E–C	C–B	72–70 
	235/50 R 19	E	C	69–68 
	265/40 R 20	E	C	70 

It is not possible to order a specific tyre.
Ask your Audi partner about the range of tyres available in your country.

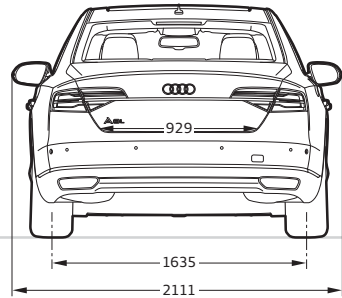

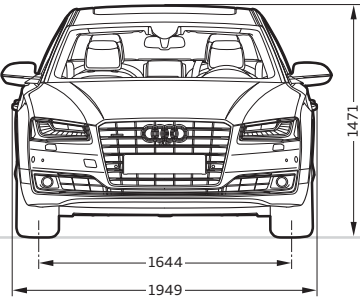

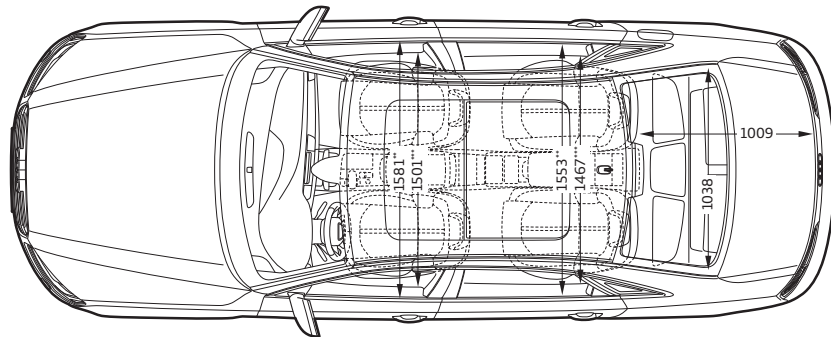

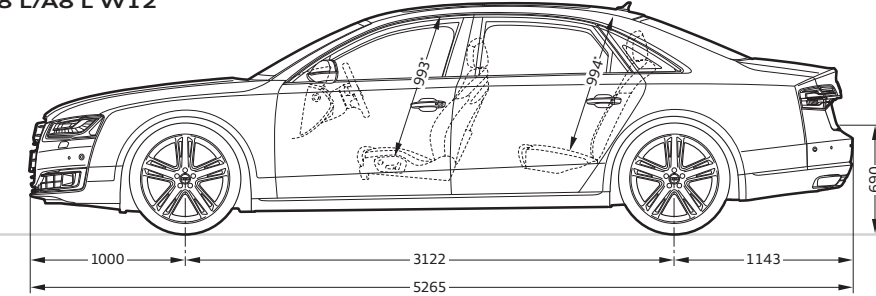

* Registered trademark of the Verband der Automobilindustrie e. V. (VDA).

Audi A8

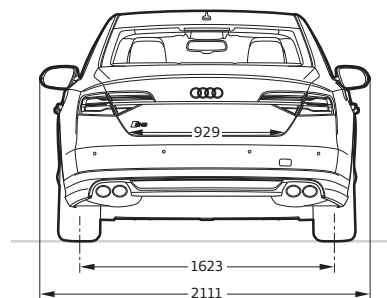

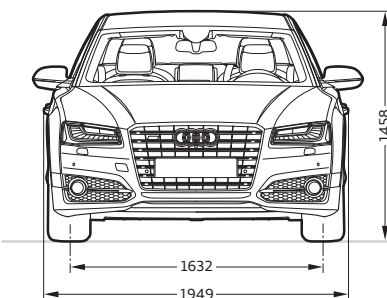

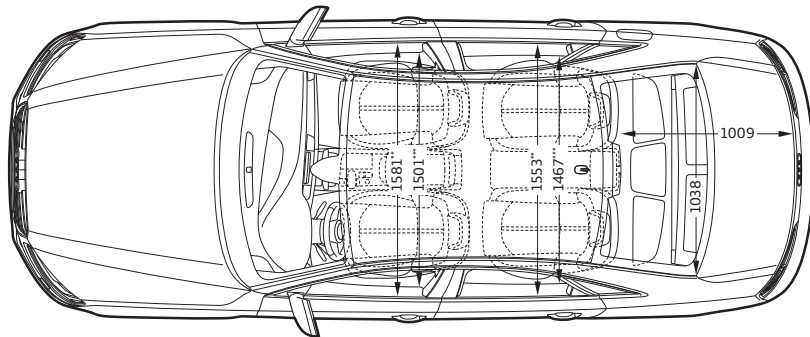

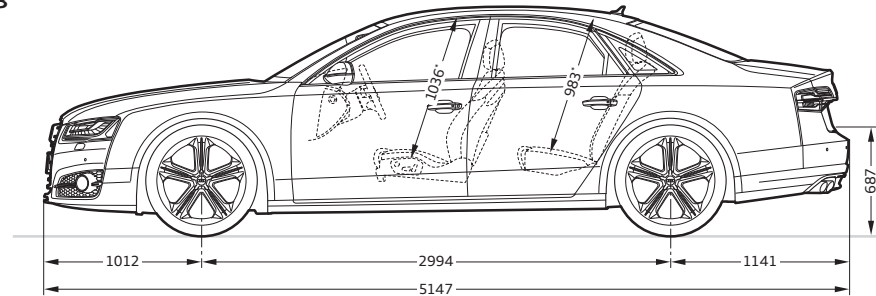

Dimensions in millimetres.
Dimensions were measured with vehicle at unladen weight, ground clearance measured with vehicle carrying its maximum load. Luggage compartment volume for the A8 520 l and for the A8 hybrid 335 l. Usable luggage space may be reduced by optional features.
Diesel models with AdBlue¹ tank have 30 l less luggage space.
Turning circle approx. 12.3 m.
*Maximum headroom, depending on equipment. **Elbow room width. ***Shoulder room width.

Audi A8 L/A8 L W12

Dimensions in millimetres.
Dimensions were measured with vehicle at unladen weight, ground clearance measured with vehicle carrying its maximum load. Luggage compartment volume for the A8 L/A8 L W12 520 l and for the A8 L hybrid 335 l. Usable luggage space may be reduced by optional features.
Diesel models with AdBlue¹ tank have 30 l less luggage space.
Turning circle approx. 12.7 m.
*Maximum headroom, depending on equipment. **Elbow room width. ***Shoulder room width.

Audi S8

Dimensions in millimetres.
Dimensions were measured with vehicle at unladen weight, ground clearance measured with vehicle carrying its maximum load. Luggage compartment volume 520 l. Usable luggage space may be reduced by optional features.
Turning circle approx. 12.7 m.
*Maximum headroom, depending on equipment. **Elbow room width. ***Shoulder room width.

The models and equipment versions illustrated and described in this brochure and some of the services listed are not available in all countries. Some of the cars illustrated are equipped with optional features for which an extra charge is made. Details concerning the delivery specifications, appearance, performance, dimensions and weights, fuel consumption and running costs of the vehicle were correct to the best of our knowledge at the time of going to press. Deviations from the colours and shapes shown in the illustrations may occur. No liability is accepted for errors and printing errors. The right to introduce modifications is reserved. Not to be reproduced, including in part, without the written approval of AUDI AG.

This brochure is printed on paper made from pulp bleached without the use of chlorine.
