 **LEXUS**
EXPERIENCE AMAZING

THE NEW UX

DISCOVER NEW HORIZONS

When there's so much to experience in life, why let anything get in the way? Expand your horizons in redefined urban luxury, comfort, and elegance with the new Lexus UX - the first Lexus Electrified model in the Philippines to have a fully hybrid electric lineup. The wide field of view opens up a new way for you to travel the world. Agile handling, intuitive technology and a refined interior let you take on the city with sharp precision and absolute class. Whatever horizons you want to discover, you'll get there in electrifying style with the new Lexus UX.

BREAKING DESIGN BOUNDARIES

The new Lexus UX challenges design boundaries with its elegantly sculpted exteriors that bring a strong aesthetic. A uniquely designed car, the UX is sure to make heads turn on the road. Experience exhilaration with performance and style combined in the UX 250h F SPORT design. The UX has been purposefully designed to be extremely agile and responsive thanks to a very rigid body and low center of gravity. It is reassuringly stable around bends and over uneven surfaces. From the brave front end reflected in the signature Lexus grille to the sporty silhouette and bold rear design, the UX gives you a new perspective on an SUV. The interior is just as electric, inspired by traditional Japanese 'engawa' verandas that seamlessly blend the inside and outside, resulting in an absolute freedom to pursue whatever horizon you seek - whether you're in or out of the city.

"Our aim for the new UX was not to conform to the established crossover look, but to break with convention and create something more distinctive and dynamic."

UX CHIEF ENGINEER
CHIKA KAKO

DISCOVER AMAZING CRAFTSMANSHIP

We believe that a beautiful exterior can inspire, but it is the quality and thoughtfulness of the interior that ensure the relationship will deepen over time. Inside the UX, we have crafted the feeling of home. One of the optional interior trims, for example, was inspired by the grain pattern of Japanese hand-made paper known as 'washi', helping to create a mood of calm and warmth. The Japanese concept of 'engawa', or the harmonious melding of indoor and outdoor spaces, is most evident in the driver's seat, where the instrument panel appears to continue through the windscreen into the bonnet. This enables the driver to have a better command of the car on the road. When combined with the best-in-class front visibility, it makes it easy to maneuver both inside the city and outside it. With the new Electrified UX, you get the best view of the road, and beyond it.

EXTERIOR & INTERIOR COLORS

The concept behind the captivating colors of the UX is 'Toughness yet Luxury,' expressing the toughness of a crossover and the luxury of Lexus-style textures. A fresh and contemporary palette of exterior and interior colors is complemented by the unique textures and premium quality of the upholstery and trim.
