 **LEXUS**
EXPERIENCE AMAZING

ALL-NEW, ALL-ELECTRIC

THE LEXUS RZ

ELECTRIFY YOUR WAY

At Lexus, we listen to the Earth's unheard voice. For our Next Chapter, we developed the RZ on a BEV-specific platform to pursue a new joy of driving exclusive to Lexus. In the same way, we mixed the distinctive timbre of BEV driving – a pleasant medley of motor and gears and inverters to create the voice of the RZ, using its unadulterated sound.

It's a heart-to-heart conversation between our home planet and the driver for a future filled with joy and prosperity.

DISTINCTLY ELECTRIC

The Lexus Driving Signature is a uniquely Lexus driving experience that aims to deliver predictable, linear response according to the driver's intentions, providing an exhilarating feel of seamlessly connected acceleration, steering and deceleration in all driving conditions. Designers created a form that is instantly recognizable as a Lexus BEV by emphasizing a robust stance with a low center of gravity, a combination that expresses the excellent driving performance that is shaped by Lexus' 'spindle body design'.

TAKE CHARGE AND EXPERIENCE LEXUS ELECTRIFIED

The high-efficiency charging system features a compact, lightweight onboard charger that integrates a charging indicator and a charging inlet lamp to notify users that charging is in progress. A lid lock system prevents opening and tampering by third parties when the vehicle is parked, and a charging connector lock system prevents removal by third parties during or after AC/DC charging, enhancing a sense of security.
