Netpeak Group

Netpeak Group is a group of **Ukrainian IT companies** started as internal startups within Netpeak Agency and now we operate not only in the field of performance based marketing, but also make our own SaaS products and mobile apps.

Netpeak Group is also an operations platform that contributes to the development of existing businesses and promotes the founding of new IT companies. We are operating in the following areas: digital marketing services, SaaS businesses, product development, online education, and social projects since 2006.

15

| Corporate social responsibility

Except for developing businesses, Netpeak Group also invests in social projects:

- **My City** is a crowdfunding platform for solving local urban problems. During last 6 years more than 100 projects have been completed, 50+ of which are still operating today.
- **GladPet** is one of My City's projects that is a platform which helps homeless cat and dogs find loving families.

Create a strong & efficient **team** for your **business**

We have been working with [Netpeak Group](#), which includes 14 businesses, for years. This challenge became too simple. **Now we are ready to find talents for your company.**

recruiting.netpeak.group/en

We cooperate with SaaS-businesses, tech product companies, creators of content projects, and mobile apps developers

We can find a wide range of technical experts, for example **Developers (Java, JS, PHP, iOS, Python), UI/ UX Designer, DevOps, QA Engineer, VoIP Engineer** and so on. Not to mention managers of any level and specialization.

We also help companies operating in the areas of digital and E-commerce technologies

It's about SEO, PPC та Content Marketing Specialists, Sales Development Representative, Project Manager, C-Level Managers, etc.

| New projects: **Kiss My Apps**

[Kiss My Apps](#) is a co-founding company that helps to build new products from idea to worldwide launch and growth together.

In cooperation with ambitious founders, we are creating mobile apps loved by millions of users.
