- Critical damage / destroyed

**53%** Residential buildings damaged

**41%** Residential buildings destroyed

# Construction of a modern residential quarter

## Project goal

Construction of a modern residential quarter of a complex type for comfortable living of 1000 families consisting of multi-storey panel houses of rapid construction, a school and a kindergarten.

## We offer

Build in the first stage

- A residential complex of 5 multi-storey buildings that are being built rapidly;
- A modern school for 1500 students of the entire district, regardless of where it will be located;
- A kindergarten for 300 children.

The location is at the site of the greatest destruction in the Livoberezhnyi district. The construction period is 8-10 months.

## Implementation period

**2024 – 2027** years

## Budget

**55 000** thous.€

## Project indicators

■ **From 10** hectares

Area of the plot

■ **5 – 18** floors

Buildings

■ **1000** units

Number of new apartments, families

■ **84 000** thous. m<sup>2</sup>

Total area of residential buildings

■ **1500** students

Design capacity of the school

■ **11 000** thous. m<sup>2</sup>

Total area of the school

■ **350** children

Design capacity of the kindergarten

■ **3 300** thous. m<sup>2</sup>

Total area of the kindergarten

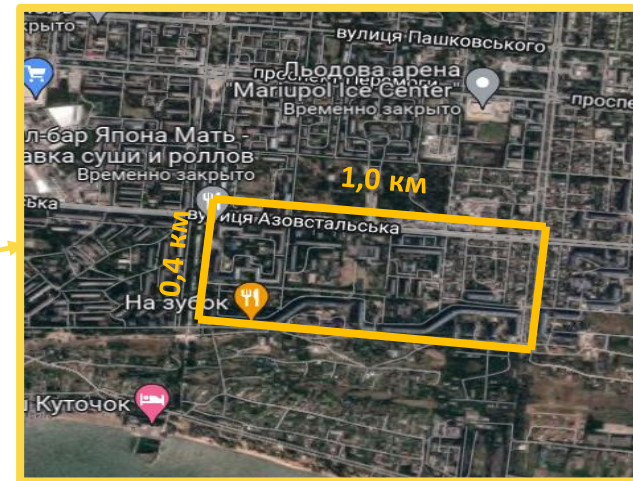

# Construction of a modern residential quarter

## Location

The Livoberezhnyi district of the city suffered the greatest destruction of the housing stock. Almost all buildings that had a facade view of the Azov Sea coast were destroyed. Considering that the Azov Sea coast is the largest magnet for both tourism and recreation, we propose to create a new modern residential quarter on Morskiy Boulevard.

## Land plot area

■ **40,0 hectares**

Total area of the site

■ **10,0 hectares**

1<sup>st</sup> stage of the construction

## Advantages for construction

- flat area
- developed transport network
- availability of locations for recreation
- availability of sea coast and beach
- a large plot with the possibility of locating sports and children's infrastructure.

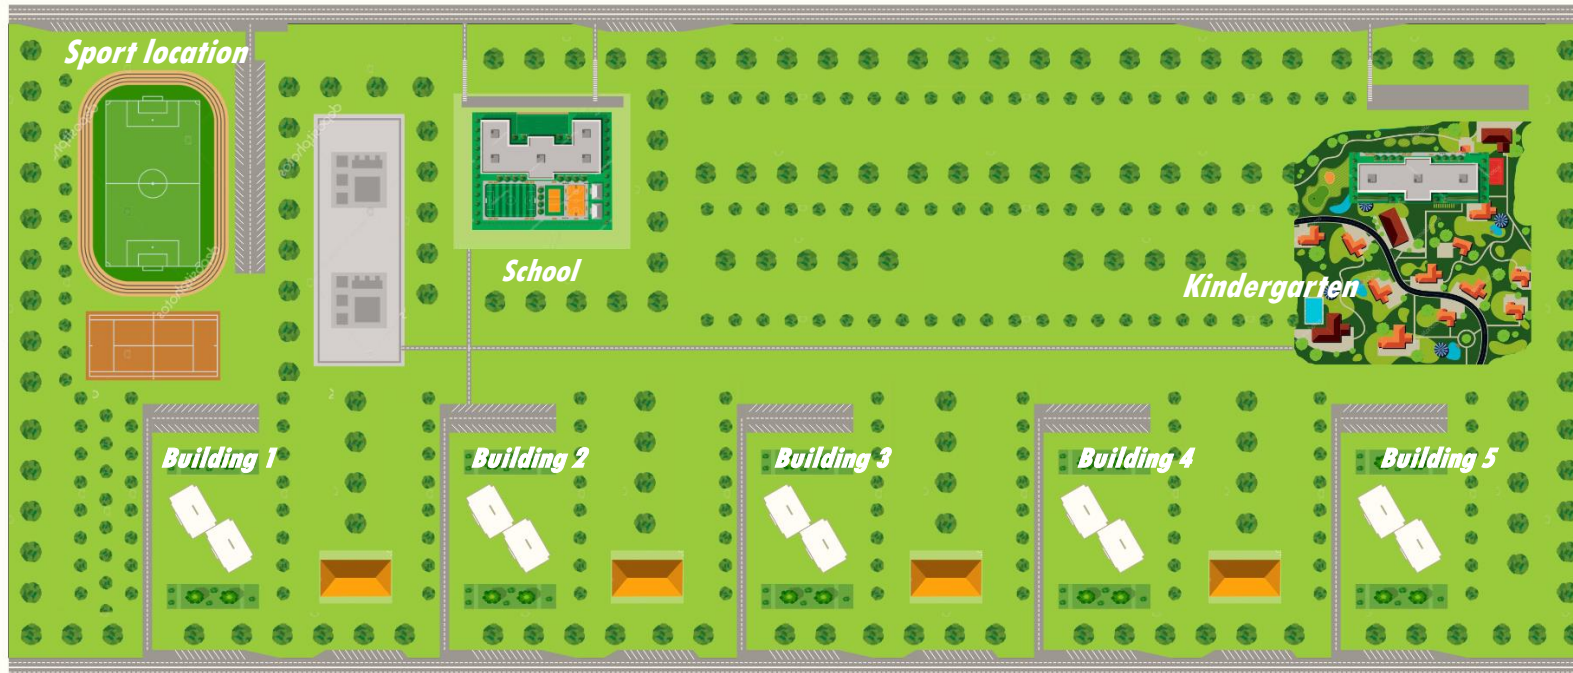

# Construction of a modern residential quarter

## Cost

The use of panel construction technology during construction ( for example) allows to quickly build housing that meets all the requirements of energy efficiency and modern design.

We are ready to consider the use of other technologies that are currently used by European society.

The cost of residential buildings  
**42 000 thous. €**

The cost of school  
**5 500 thous. €**

The cost of kindergarten  
**3 500 thous. €**

Energy supply, landscaping and sports infrastructure  
**5 000 thous. €**

Total cost of construction  
**55 000 thous. €**

# Other projects

**Education**

Overhaul of the city lyceum and construction of a technological lyceum

**Quantity**

**15** units

**Budget**

**8 000** thous.€

**Water supply**

Purchase and installation of modular pumping stations with DSMDS

**55** units

**7 000** thous.€

**Vehicles**

Purchase of 100 units of large-capacity buses and 100 units of specialized vehicles

**200** units

**35 500** thous.€

**Heat supply**

Purchase of block modular boiler houses, first stage 2023

**68** units

**24 000** thous.€

**Medical facilities**

Renovation of primary care hospitals

**11** units

**12 500** thous.€
