Development projects

Creation of modern educational complex for exceptional children

Need: 20 units of special equipment; 10 units of office equipment; tires, batteries

4,1 million EURO

During the temporary occupation of the city, the occupying authorities stole and took away all equipment

Today, due to the lack of equipment, the cleaning road surface and anti-icing treatment are carried out in manual mode.

Complex provision of administrative and social services to the population of starosta districts

38 000 people will be able to receive quality services at their place of residence

4,2 million EURO

The implementation of this project will allow to unite the administrative buildings of the starosta districts and institutions for the administrative and social services provision.

Development projects

Restoration of equipment for maintaining the street and road network

Safety, development and education of exceptional children

2,4 million EURO

School building was damaged by artillery shelling

The project is designed to create safe environment for the development and education of children with special needs, to increase the level of social adaptation of such children to the educational process.

Reconstruction of the oil refinery complex

This will create new jobs: 6.5 thousand – during the reconstruction of the facility, more than 1 thousand – after the start of the complex.

1 billion EURO

Due to the occupation and military activities, there is practically no own oil refining in Ukraine, and the creation of a modern enterprise in Kherson will significantly affect the energy independence of the state, the pricing policy of operators, will allow entering international markets and receiving foreign exchange earnings.
