

LM LIFTMECHANICS

Design book

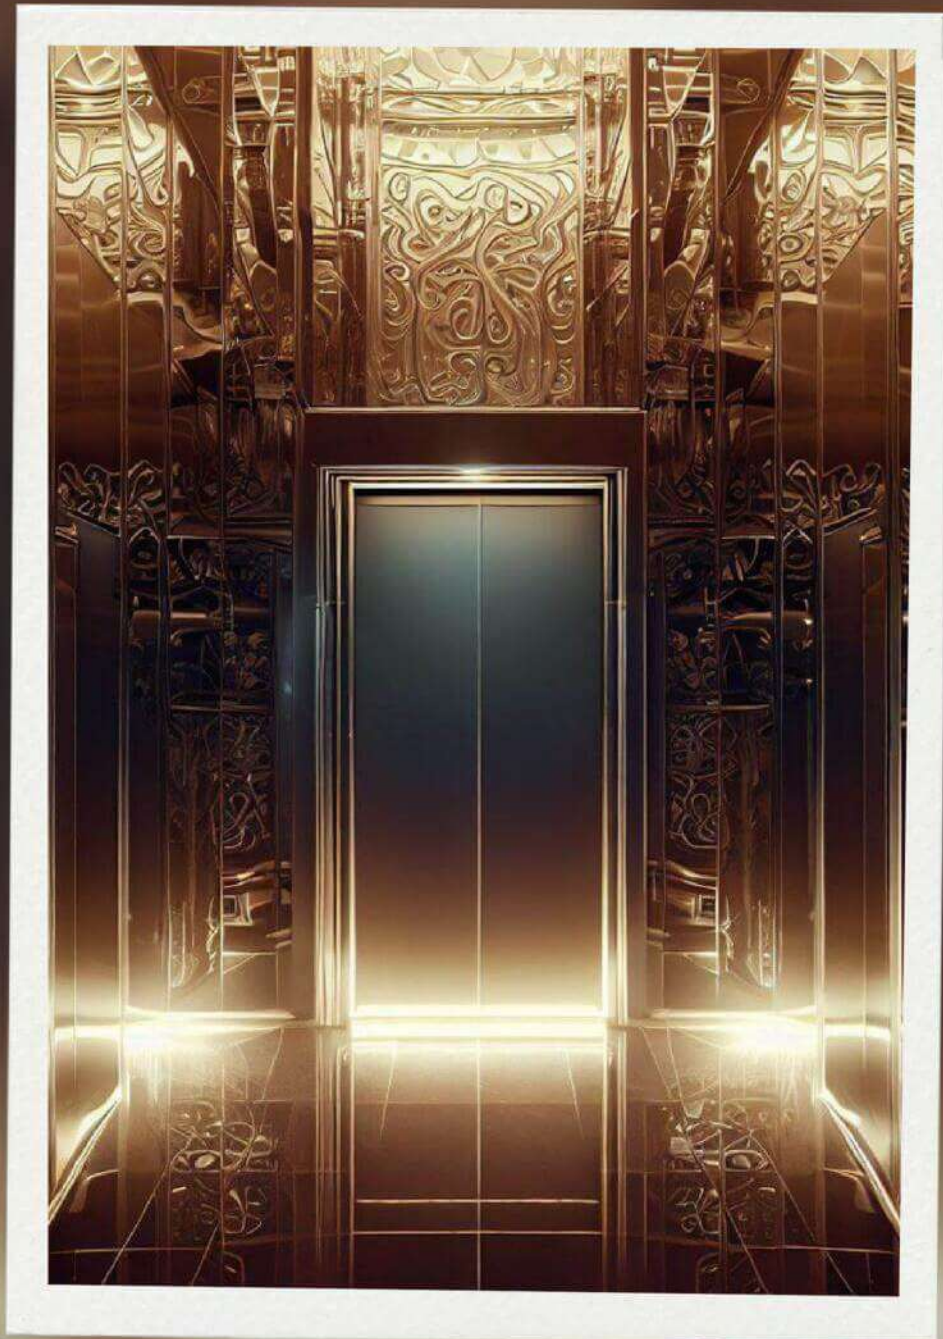

"Дизайн – це не те, як він виглядає чи відчувається. Дизайн полягає в тому, як це працює." – Стів Джобс

"The design is not just what it looks like and feels like. The design is how it works" – Steve Jobs

Дизайн кабіни ліфта - це один з найважливіших елементів, що визначає комфорт та естетичний вигляд ліфта. Він повинен відповідати стилю будівлі, бути функціональним та безпечним для користування.

Сучасні технології дозволяють створювати кабіни ліфтів в найрізноманітніших стилях та формах, що надає можливість дизайнерам реалізувати найсміливіші та найоригінальніші ідеї.
