PROFILE

I am a sound engineer from Ukraine. Tech-savvy and result-oriented, I pay great attention to details so the completed track not only blends well with other elements but emphasizes the dramatic component of a film, TV series, or commercial. I believe in the continuous self-growing process as the driving force behind any progress.

I've worked in various professional roles. Each position has given me a more versatile understanding of the sound itself. I'm a great team player with well-developed leadership skills, high-stress resistance, and the ability of multitasking.
