

SECOND LIFE FOR YOUR ADVERTISING

Custom upcycled merch made from
banners and advertising materials.

We transform used materials into
designer accessories for your team,
clients and partners.

WHY STANDARD MERCH NO LONGER WORKS

- After events, campaigns and exhibitions, companies are often left with banners that are difficult to reuse.
- Standard corporate merch often has little emotional value: it is quickly forgotten, stored away or thrown out.
- 3,14BAN offers a different approach: we create products that are practical, visually unique and connected to the real story of your company.

THE 3,14BAN SOLUTION

- We turn your banners into custom upcycled merchandise, fully managed from start to finish.
- Banner after the event → material cleaning →
- manual print selection → product sewing →
- story label → ready corporate gift.
- It can be used for:
 - team merch
 - partner gifts
 - conference gift sets
 - welcome packs
 - ESG / CSR communication

TRUSTED BY

We have already worked with companies, organizations and teams that choose a non-standard and responsible approach to corporate merchandise.

HOW WE CREATE VALUE

Material preparation

We receive your banners or help select materials from our own archive. The material is cleaned and prepared for production.

Custom design and cutting

Each product is created individually: we manually select banner fragments so that the final item looks complete, distinctive and recognizable.

Story-label

Inside each product, we place a story label with a short description of the material's origin and your company logo.

Final result

You receive not just merch, but products that can be gifted to your team, clients or partners and used in your brand communication.

CUSTOM PROJECTS

Each project is calculated individually based on:

- product format,
- quantity,
- available materials,
- branding,
- packaging,
- timeline
- and international shipping.

We prepare a custom proposal after a short brief and banner review.

PROJECT ORGANIZATION

We work officially and provide the necessary project documentation.

If needed, we can prepare a material transfer document for banners sent into production.

To start a project, we need:

- product format,
- estimated quantity,
- deadline,
- information about banners or materials,
- logo
- and branding preferences.
