

SUSTAINABLE ENERGY RECOVERY: SMART-AND-GREEN-BASED ENERGY SOLUTIONS

"Ukraine can be and, I am convinced, will definitely become a green energy hub for Europe. We have the capacity to substitute russia's dirty energy"

President Volodymyr Zelenskyy

BUILD BACK BETTER IN POST WAR RECOVERY

Ministry
of Energy
of Ukraine

Mid-term goals 2025-2032

Return under control and restoration of destroyed and damaged energy infrastructure

Grid modernization and strategic development

Strategic goals 2032-2050

Focus on low carbon and carbon-neutral capacities

- Replacing old-style TPP and CHP with modern biofuel and waste-to-energy facilities
- New green generation capacities - SPP and WPP - and storages
- Flexible generation based on gas turbine and gas piston units
- Launch two AP-1000 units and SMRs

Develop **commercial flows** potential and integrate with the **EU energy market**

UKRAINE – GREEN ENERGY HUB

01

Production
of carbon-neutral
electricity

02

EU Hydrogen
Hub

03

Certified
gas storages

04

Energy
equipment
manufacturing

**THANK YOU
FOR STANDING
WITH UKRAINE**
