

ENERGY TRANSITION. Strategic advantages of Ukraine's gas storages and their contribution to the Europe's energy security

Roman MALIUTIN
Acting CEO of JSC Ukrtransgaz

UGS: 59 YEARS OF RELIABILITY AND SUSTAINABILITY

more than 80% of overall capacities are near Europe

30,95 bcm

overall working gas volume
29% vs EU UGS total capacity
(103 bcm)

10

underground gas storages
in operation

5

service branches
R&D, construction,
reconstruction, repairs,
technical&expert inspections,
certifications

25.3 bcm

working gas volume
near Europe

1234

customers

UKRTRANSGAZ AS A PART OF THE EUROPEAN ENERGY BALANCE

152 **+18%**
in 2023

non-resident customers

31

countries

1.8 EUR/MWh

approximate full gas storage tariff
until 01.04.2025

1095 days

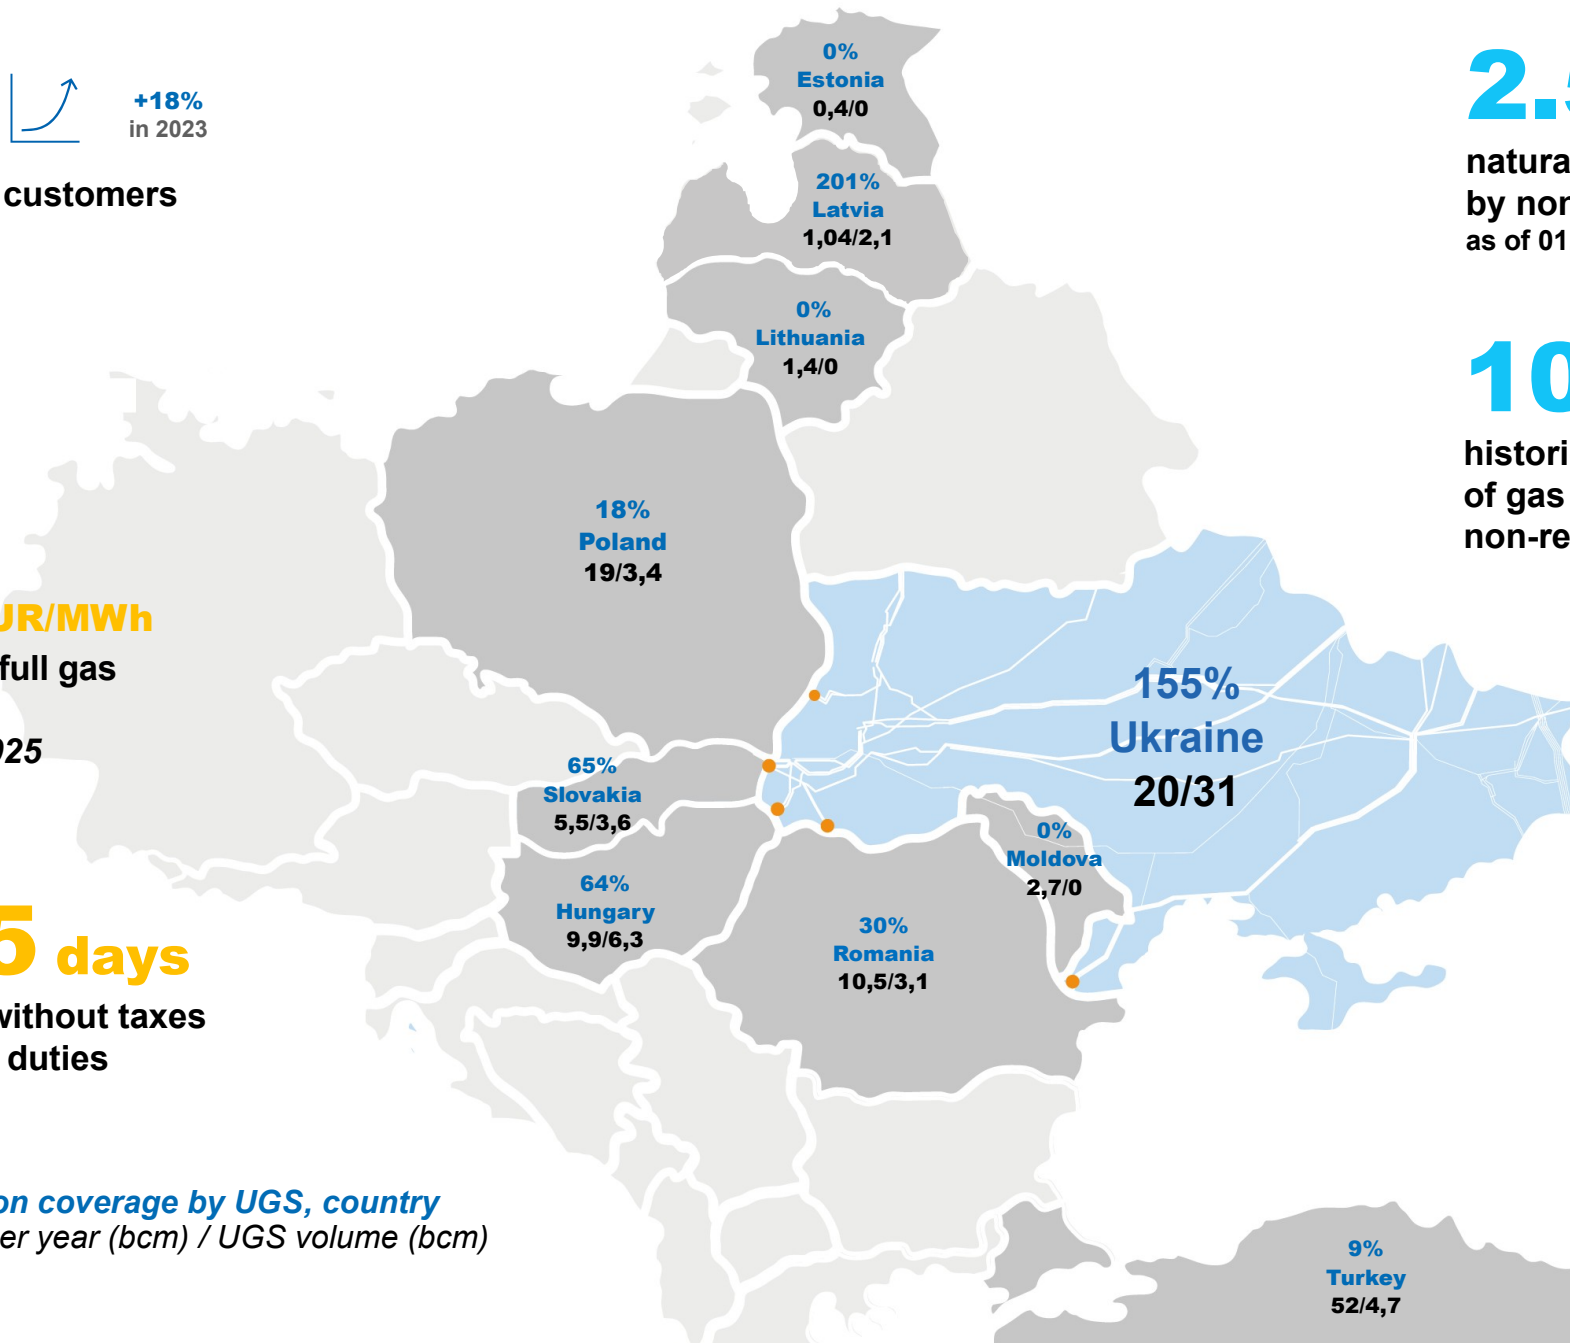

within CWR without taxes and customs duties

2.5 bcm

natural gas stored by non-residents as of 01.11.2023

10 bcm

historical maximum of gas stored by non-residents in 2020

% consumption coverage by UGS, country
consumption per year (bcm) / UGS volume (bcm)
2022

PROMISING ACTIVITY AREAS OF UKRTRANSGAZ

TRANSITION FUEL

Involvement of Ukraine's gas storages in implementation of energy security measures in Europe (possibility of storing strategic reserves)

Introducing a gas safety stock for Ukrainian gas supply companies

STORAGE AND PROVISION OF SERVICES

Biomethane storage
Provision of services in construction, repair and maintenance of biomethane plants

Development of regulatory documentation and expert examination, certification

STORAGE AND ENERGY SAVING

Substitution of fossil fuels in the Company's production activities

Hydrogen storage

CO₂ SEQUESTRATION

Creation of storages for CO₂ sequestration

**WE STORE ENERGY
FOR YOUR SAFETY**
