Rivne – Kyiv High Voltage Line  
750 kV Zaporizhzhia–Kakhovska Line

Beskyd Railway Tunnel

# Outlook for EIB Support

New EIB support will be closely aligned with the priorities identified by the RDNAs and the Ukraine Plan.

It will be based on the EU4U Trust Fund and new budgetary guarantees and blending under the Ukraine Facility. EIB is also making advisory services available under its EU4U Advisory Programme.

## Public Sector Support

EIB will continue supporting essential public infrastructure operations with financing and TA.

This includes the transport (solidarity lanes), energy, and social infrastructure sectors.

## Private Sector Support

EIB is working on the whole range of financing solutions for MSME support (also through the EIF) through local banks and equity funds.

EIB is also planning to support private investors for strategic investment projects through direct lending, for instance in the agribusiness sector.
