History and modernity

1363 founding of Vinnytsia

The city was an important outpost on the border with the Wild Field

In 1640, the city received Magdeburg Law. For centuries, Vinnytsia has preserved and developed the traditions of local self-government

The end of the XIX century saw a rapid economic breakthrough. It is related to the construction of the Kyiv-Odesa railway. The center of Vinnytsia gets a modern look thanks to the work of Mayor Mykola Ovodov and architect Hryhorii Artynov.

1917-1921 Vinnytsia, three times the temporary capital of the Ukrainian People's Republic

1920-1960 - center of the food and machine-building industry

Since 1992, the headquarters of the Air Force has been located in Vinnytsia

2020 - creation of Vinnytsia City Territorial Community through the accession of 7 villages and 1 settlement

Reconstruction of the water treatment plant and reconstruction of water pumping stations in Vinnytsia

ASSUMED:

1. Reconstruction of the receiving chamber and pumping station of the first lift:

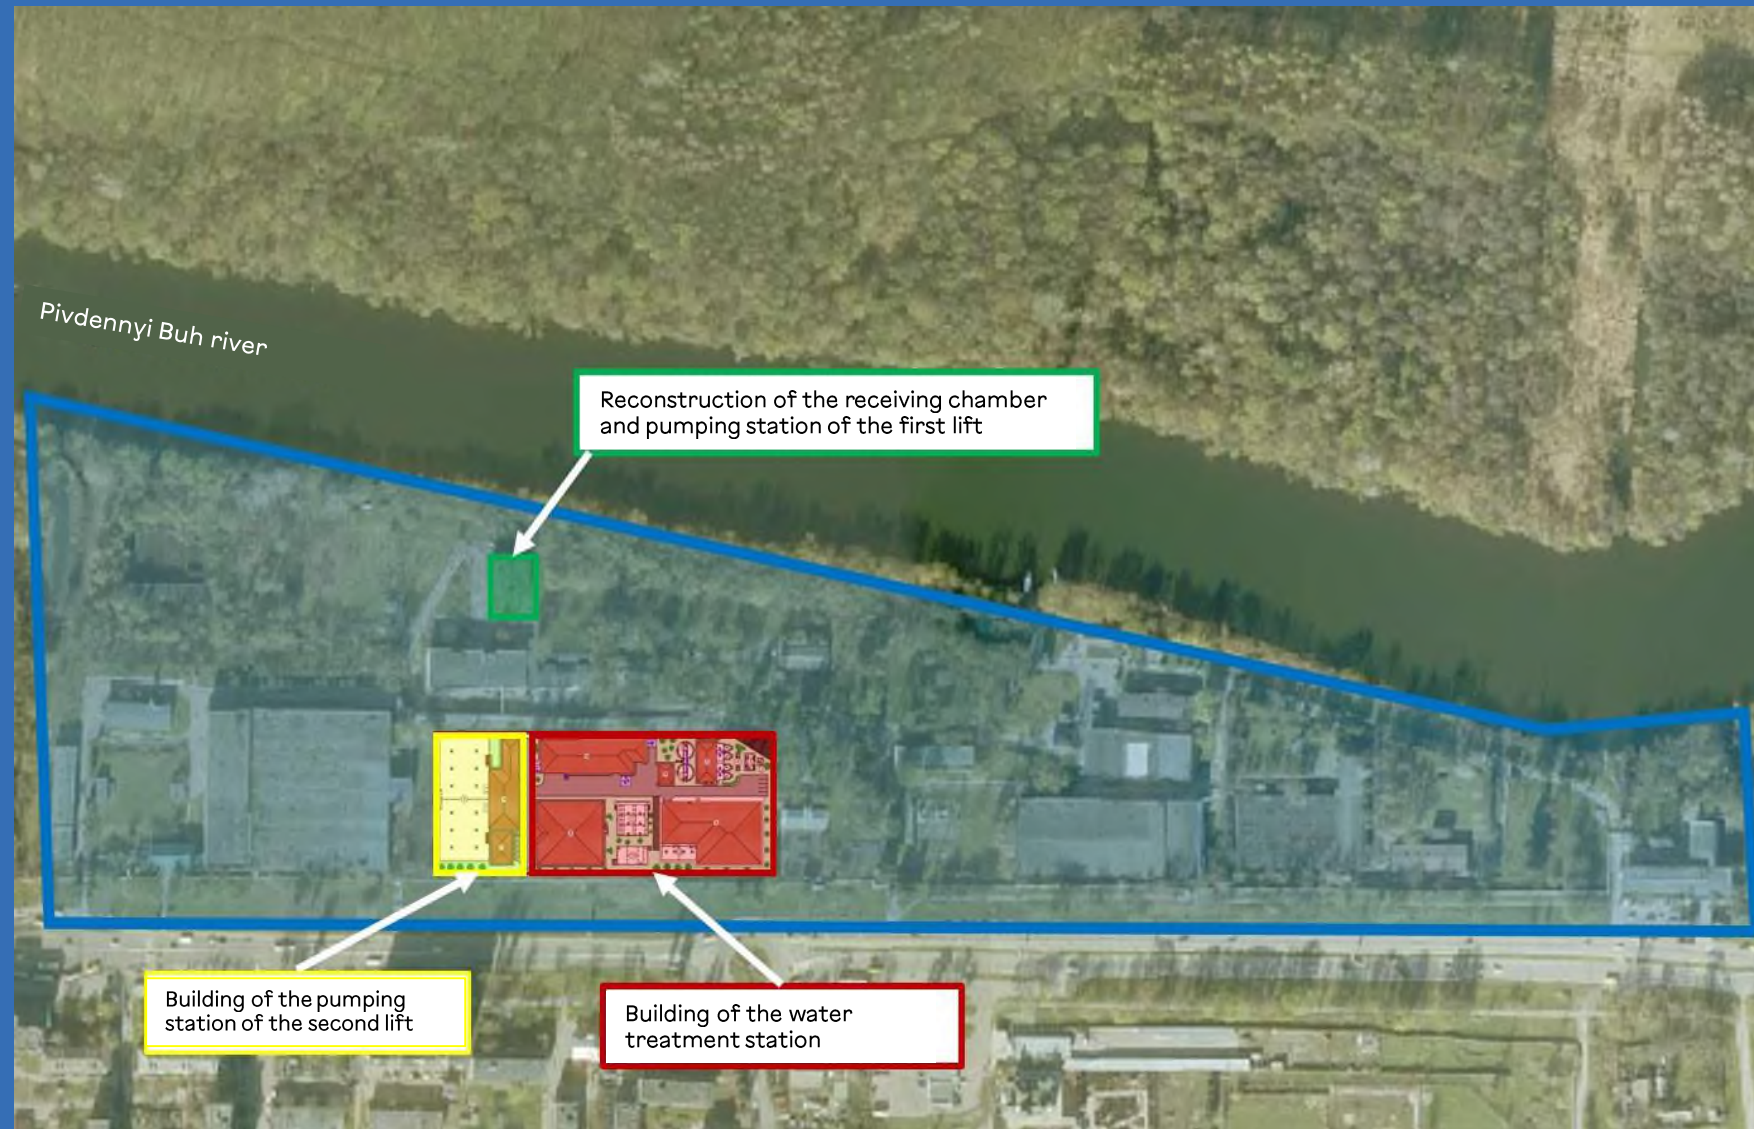

- Water intake
- Pumping station of the first lift
- Distribution chamber

2. Building of the water treatment station

3. Building of the pumping station of the 2nd lift

PROJECT OBJECTIVE:

comprehensive reconstruction of the water treatment plant and pumping stations, which will involve the use of modern drinking water purification technologies and alternative energy sources

Reconstruction of the water treatment plant and reconstruction of water pumping stations in Vinnytsia

Building of the water treatment station

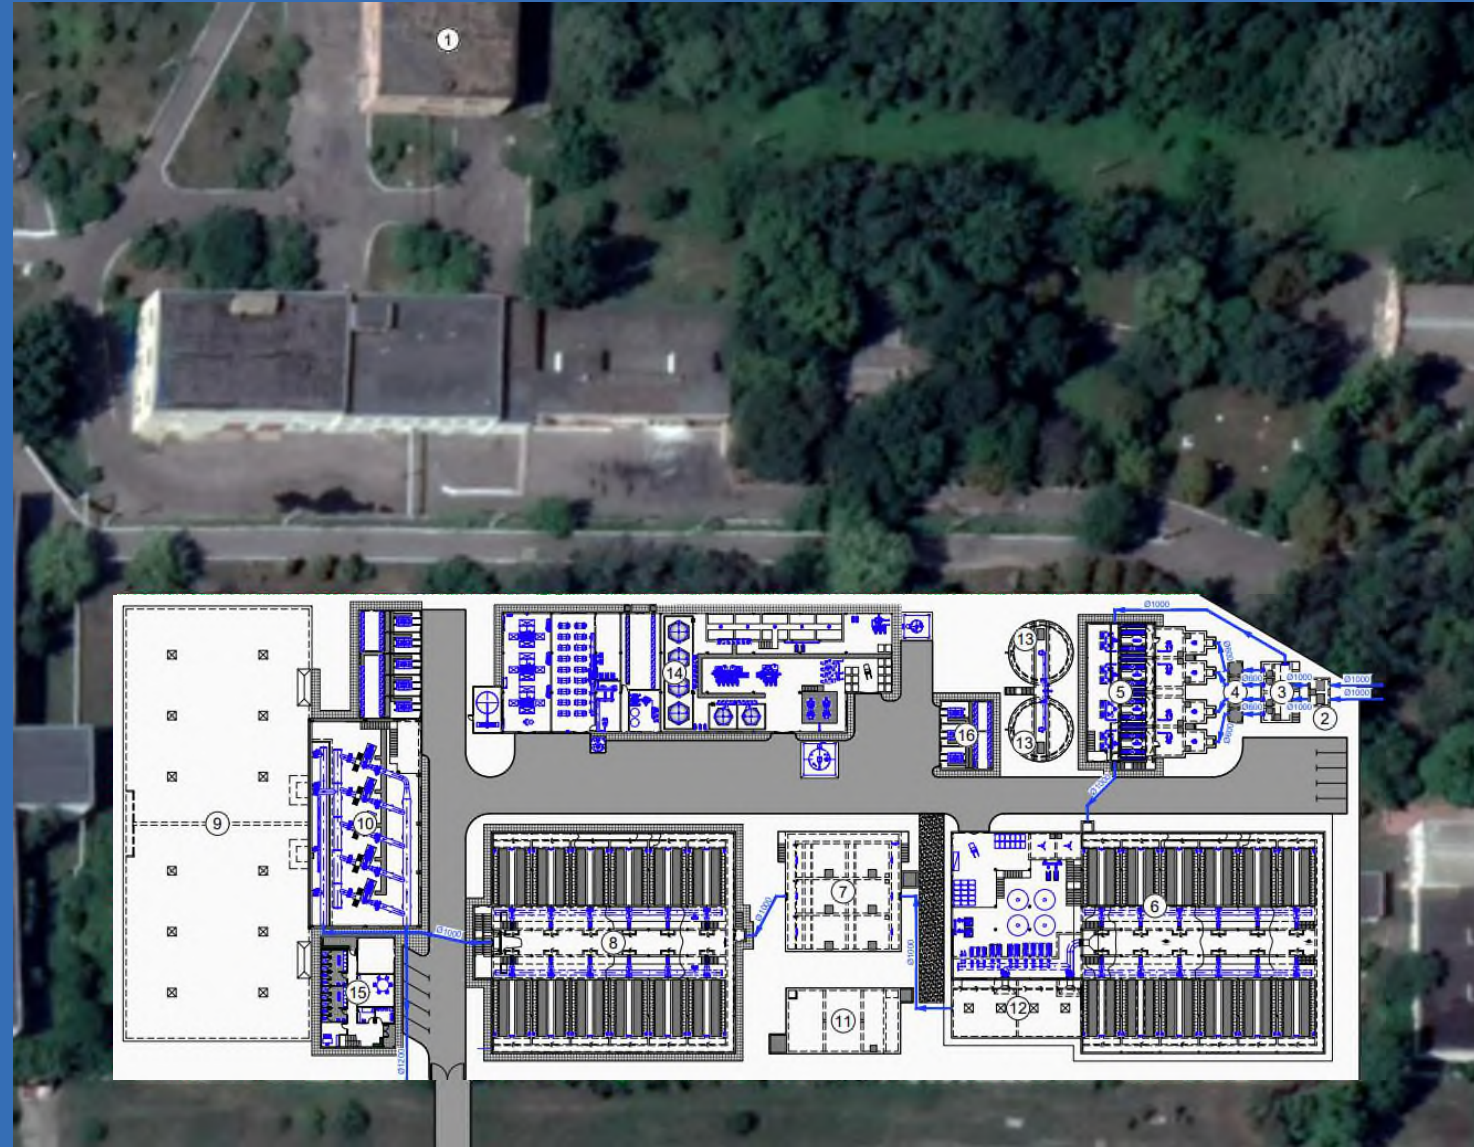

ASSUMED:

- Chamber with flow meter
- High speed clarifier
- Two-layer gravity filters
- Ozonation chamber
- Coal filters
- Reservoir for the reuse of industrial water (gravity and coal filters)
- Filtered water tank
- Sealed water tank
- Reagent and dehydration building
- Electrical equipment building

Building of the pumping station of the 2nd lift

ASSUMED:

- Purified water tank: volume – 10575 m³
- Pumping station of the 2nd lift
- Horizontal centrifugal pumps
- Network Ø1200 mm (water supply to the city)

Reconstruction of the water treatment plant and reconstruction of water pumping stations in Vinnytsia

EXPECTED RESULTS:

- 400 thousand residents of the community will be provided with quality drinking water
- 3 MW – backup power supply for the facility
- 3.7 million m³/year – reduction of pollution in the Pivdennyi Buh river through the use of modern water purification technology
- 623 tons/year – reduction in the use of reagents and materials due to automation
- 1.8 million kW*h/year – reduction in electricity consumption

Design and estimate documentation
(existing conceptual design)

Project implementation period – **3 years**

Estimated project cost – **€37 million**
