Constant enemy shellings of the city that are regularly carried out during 2022-2024 led to massive destruction of infrastructure and civilian losses

## Shelters indoor

Constant enemy shellings of the city indicate that we need to create an urban space where every resident of the community could feel safe.

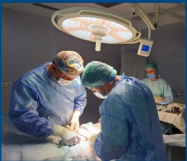

# Mobile protective structures

Constructing a network of shelters and safe areas is the point that our community has been working at for more than 2 years

KRAMATORSK CITY  
TERRITORIAL COMMUNITY

This is the concept of creating an urban space that will take into account the basic needs of the community in education, health care, emotional and physical relief.

Moreover it should be taken into account that people spend a significant part of their time at home. Therefore, the goal of building a network of shelters for citizens where they can get as quickly as possible is our priority.
