

**Strategy for the restoration
and development of water
supply and sewerage systems**

Oleksandr Kravchenko ,

**Director of the Institute of Public Infrastructure LLC,
Doctor of Technical Sciences**

**Strategy for the
restoration and
development of water
supply and sewerage
systems**

**Stable financial
support of water
utilities**

**Harmonization of
standards with
European norms**

Stable financial security

Tasks of the state:

- Reasonable tariff
- accessibility for vulnerable groups of the population
- uniform and clearly formulated rules of the game

Possible investments:

- ~~State budget (next 5 years)~~
- ~~Local budgets~~
- financial institutions
 - Credits
 - Grants
- Real Investments
 - Short-term donors
- Partners
 - Training
 - preparation of FS and project documentation
 - repayment of interest on the loan

Harmonization of standards

Subject of standardization	European Document	Steps
Requirements for the quality of drinking water	Council Directive 98/83/EC	Roadmap development
Construction Standards	International Construction Standards EN, DIN, DWA, DVGW	Development of new DBN External networks
Operating Standards	International Construction Standards EN, DIN, DWA, DVGW	Definition of the list of standards

Harmonization of standards

Development of new editions of the DBN for Water Supply and Sewerage

DBN

- Mandatory requirements
- Parameters
- Goals:
 - Projects of DBN External networks and structures.
 - DSTU set
 - A list of additional standards and other regulatory documents (if necessary) for the further development of design standards for water supply facilities, including by adapting existing international standards ISO, DIN, etc..

DBN

- Mandatory requirements
- Parameters
- Goals:
 - 1. Mandatory DSTU - 6 documents.
 - 2. Minimum requirements are based on existing DBN
 - 3. Optional DSTU
 - Can make mandatory by the customer
 - Based on 2 DVGW
 - contain best practices
 - may be more stringent than mandatory

The project is funded by GIZ

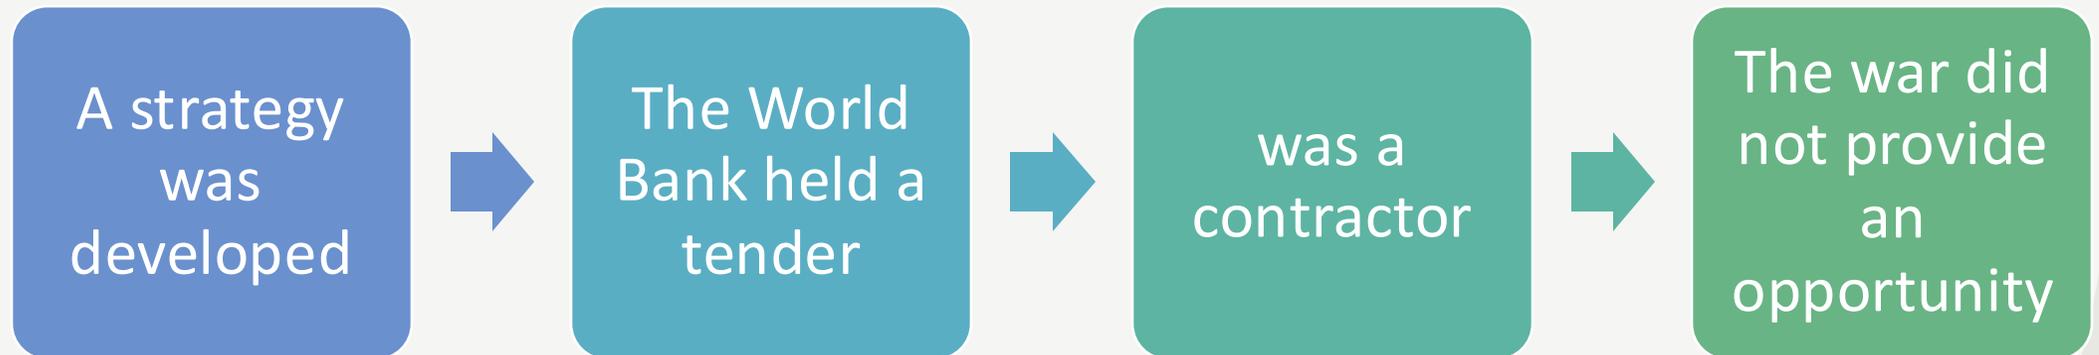

Implementation period - 1.5 years (until May 2026)

Harmonization of standards

Prospects for harmonization of standards:

- adoption of operating standards
- adoption of enterprise management and technical policy standards
- development and harmonization of tariff setting

History of strategy development

It's time to get back to strategy development

Reasons:

- Significant need for recovery
- «A period of limited resources»
- There is a clear need for upgrades
- the need for a single technical policy
- the need to standardize approaches
- availability of international financial sources.

Composition of the Strategy

Areas of technical development of the sector

achievement of EU standards

guarantees of return of funds to investors

Consolidation of water companies

Regulation of licensing activities

Water Strategy of Ukraine

Strategy.Approval.

CANNOT be a resolution
of one Ministry or
Department.

It is NOT intended to be
a recommendation.

A resolution of the
Cabinet of Ministers or a
Law of Ukraine is
required.

Looking for help

1. Strategy development

2. Methodology of enterprise development

3. Normalization of the situation with tariffs (homework that requires external help)

4. Harmonization of standards - projects similar to GIZ

Thank you for your attention!
