

«Geothermal Ukraine – An Empowering Change for Good: Making Difference in Technology for Rapid Deployment»

«Energizing Recovery: Building a Stronger Ukrainian Energy Sector»

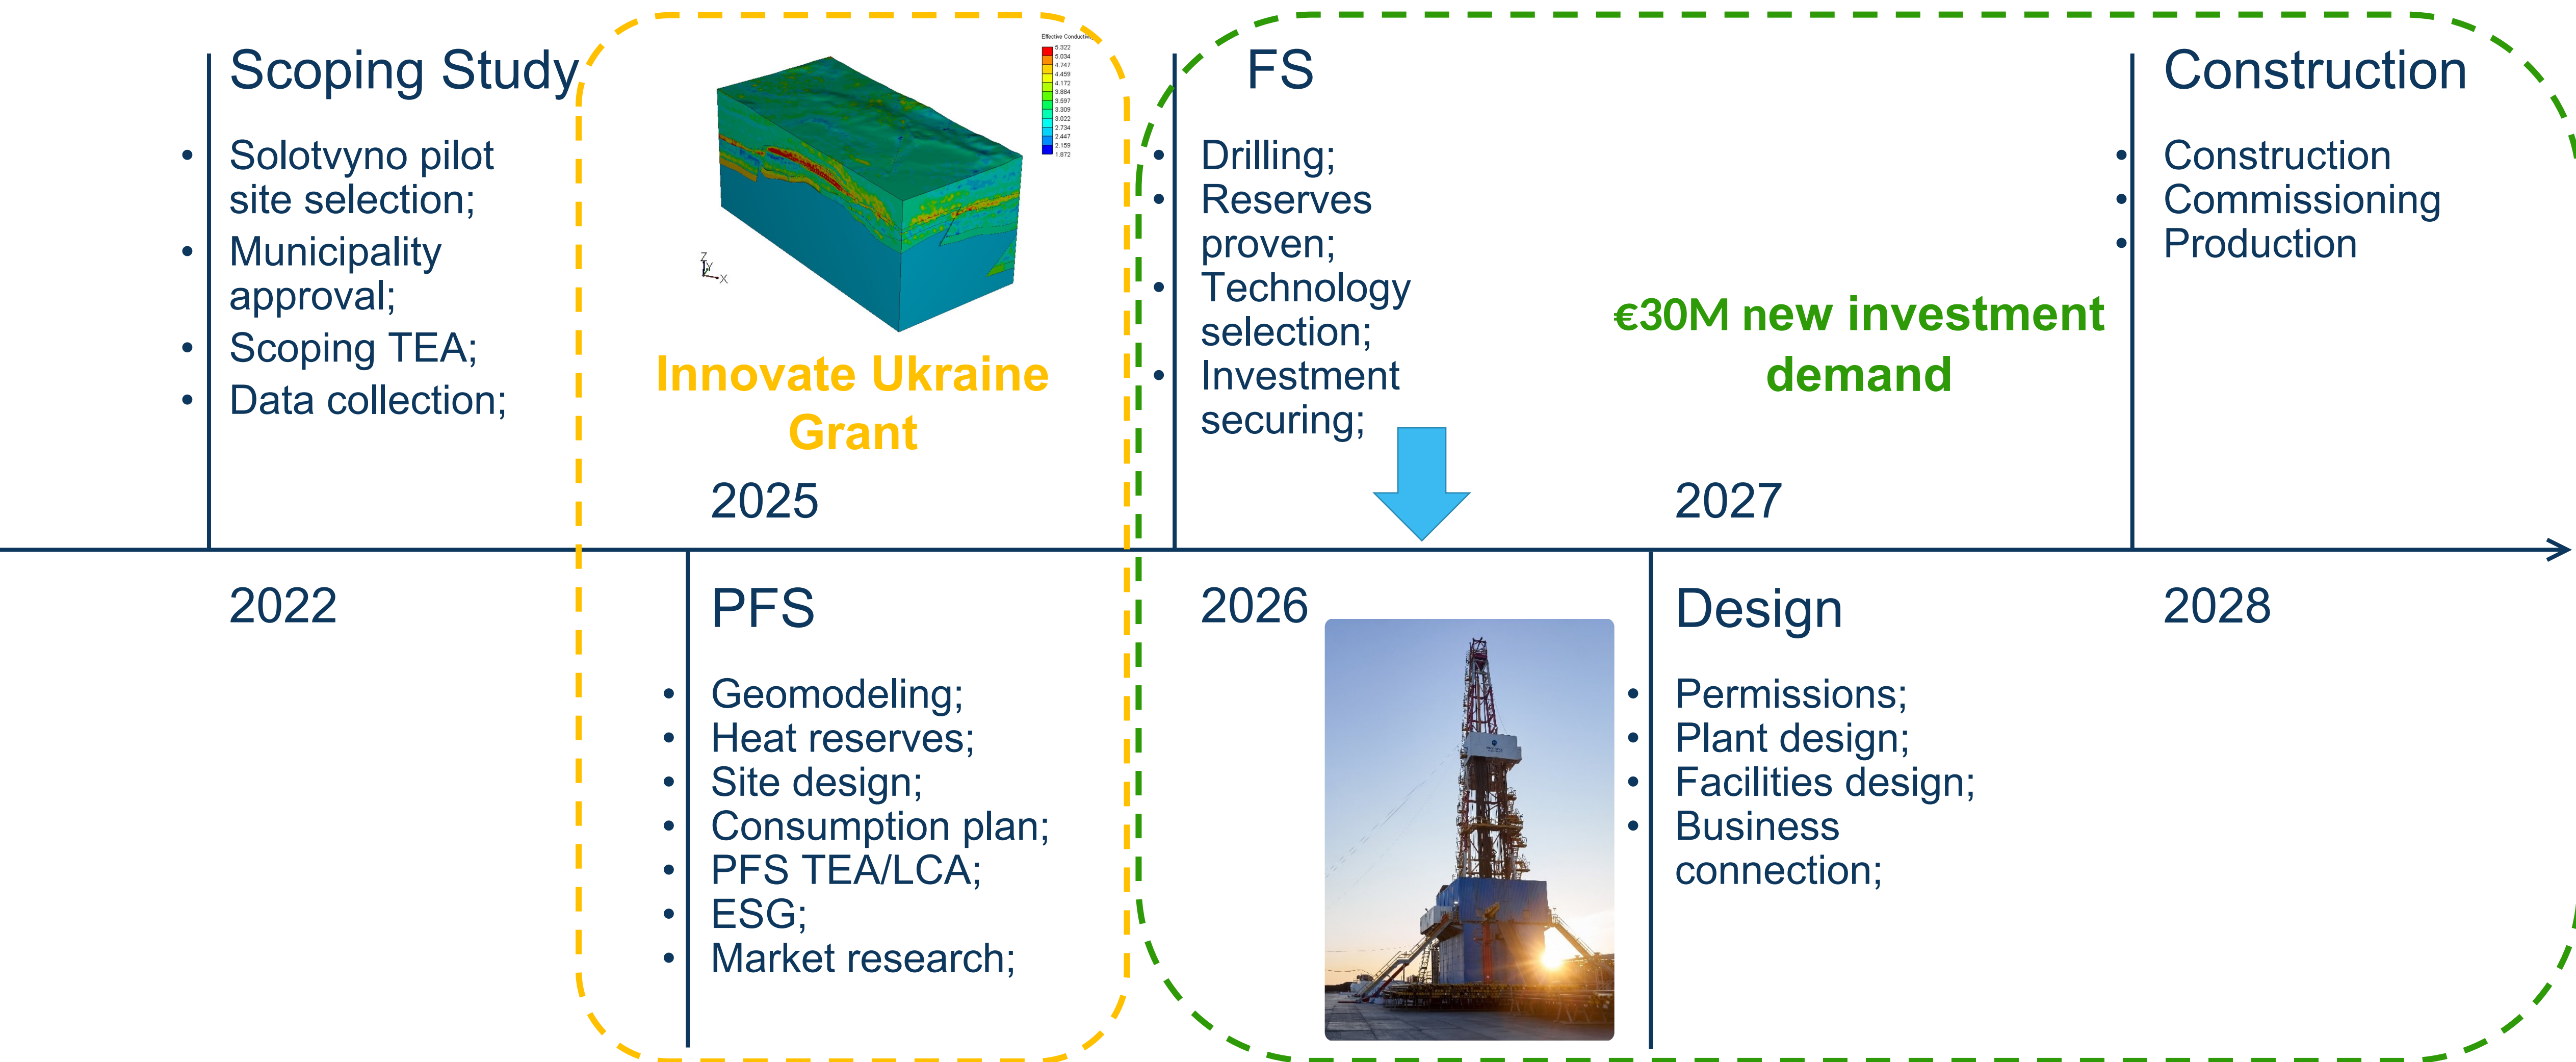

Ivan Virshylo

2025

Strong cooperation

- Shared expertise makes a synergy between the industry, academia, and local communes.
- Wider networks leads to the new proposal within the Innovate Ukraine and other grants.
- Industry focused program – the most reliable approach for rapid development from research to industrial application

Pilot geothermal power plant

- ❖ We are doing the geological exploration for whole Transcarpathian region – to rapid scale-up technology after the pilot;
- ❖ Geothermal and gas exploration combined to increase efficiency;
- ❖ Carbon capture & storage and critical raw materials extraction are developing as side-projects to examine the added value;
- ❖ Accelerator program is very useful extra benefit of Innovate Ukraine program to develop financial tools for the project speed-up.
