

Ukraine's second budget

The budget of the Dnipro territorial community is the **2nd largest in Ukraine** and continues to grow dynamically even during the war

The total budget for 2024 is **UAH 21.4 billion**

Priority areas of funding from the city budget remain **education, healthcare, transportation, and housing and utilities**

* Pre-war indicators: /

76% of the working population
1200 large and medium-sized enterprises,
240 of which are industrial

12.2% of Ukraine's GDP
16% of Ukraine's total exports
25% of total industrial output of the region

The city conducts foreign economic activity with almost **130** countries.

In the pre-war period, the volume of export-import operations of the city's economy amounted to more than **7%** of Ukraine's foreign turnover.

About **200 thousand IDPs** (internally displaced persons) live in Dnipro.

It is expected that a significant number of IDPs will remain living and working in the city after the end of hostilities.

Dnipro is the center of the Dnipro region and the Dnipro agglomeration.

The city's population is **1 million people**. City area - **410 km²**

Dnipro

Before the war

Before the full-scale invasion of the Russian Federation, Dnipro was developing dynamically as an industrial, logistics and business leader in the Central and Eastern region of Ukraine, comfortable for living and doing business

Industrial enterprises

Modern architecture

Public spaces, parks

Theaters, museums, festivals

Universities, academies,
colleges, gymnasiums,
schools

Professional and amateur
sports

Dnipro

During the war

Life in the city has changed radically: Dnipro has become a humanitarian, medical, transportation and evacuation hub for the entire territory of Eastern Ukraine

Destruction of a transport company

Constant air raid alerts

Destruction of housing and deaths of city residents

About 275 thousand residents fled, mostly young women with children

Around 200 thousand IDPs entered the city

Teaching pupils and students in bomb shelters

WORLD INNOVATION FORPOST

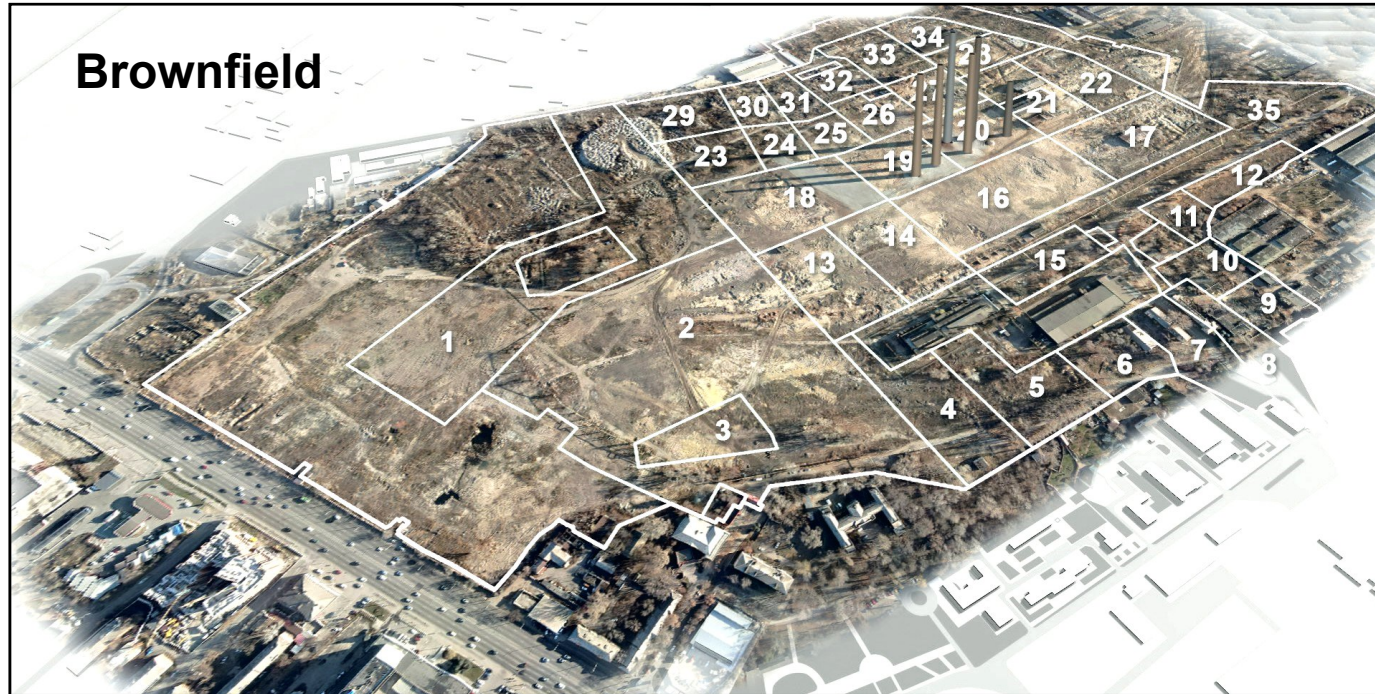

Dnipro

Economic and industrial development

Industrial Park // INNOVATION FOR PROGRESS

Brownfield

Area - 49.5114 ha

Project proposal

+ **10 hectares** of residential and public buildings

35 cadastral land plots

Up to **30 new** ecological productions (enterprises)

Up to **5000** new jobs

Constructions of infrastructure in four stages

Constructions period – **3 year**

Total investments: **118.7** mln €

Scheme of the infrastructure

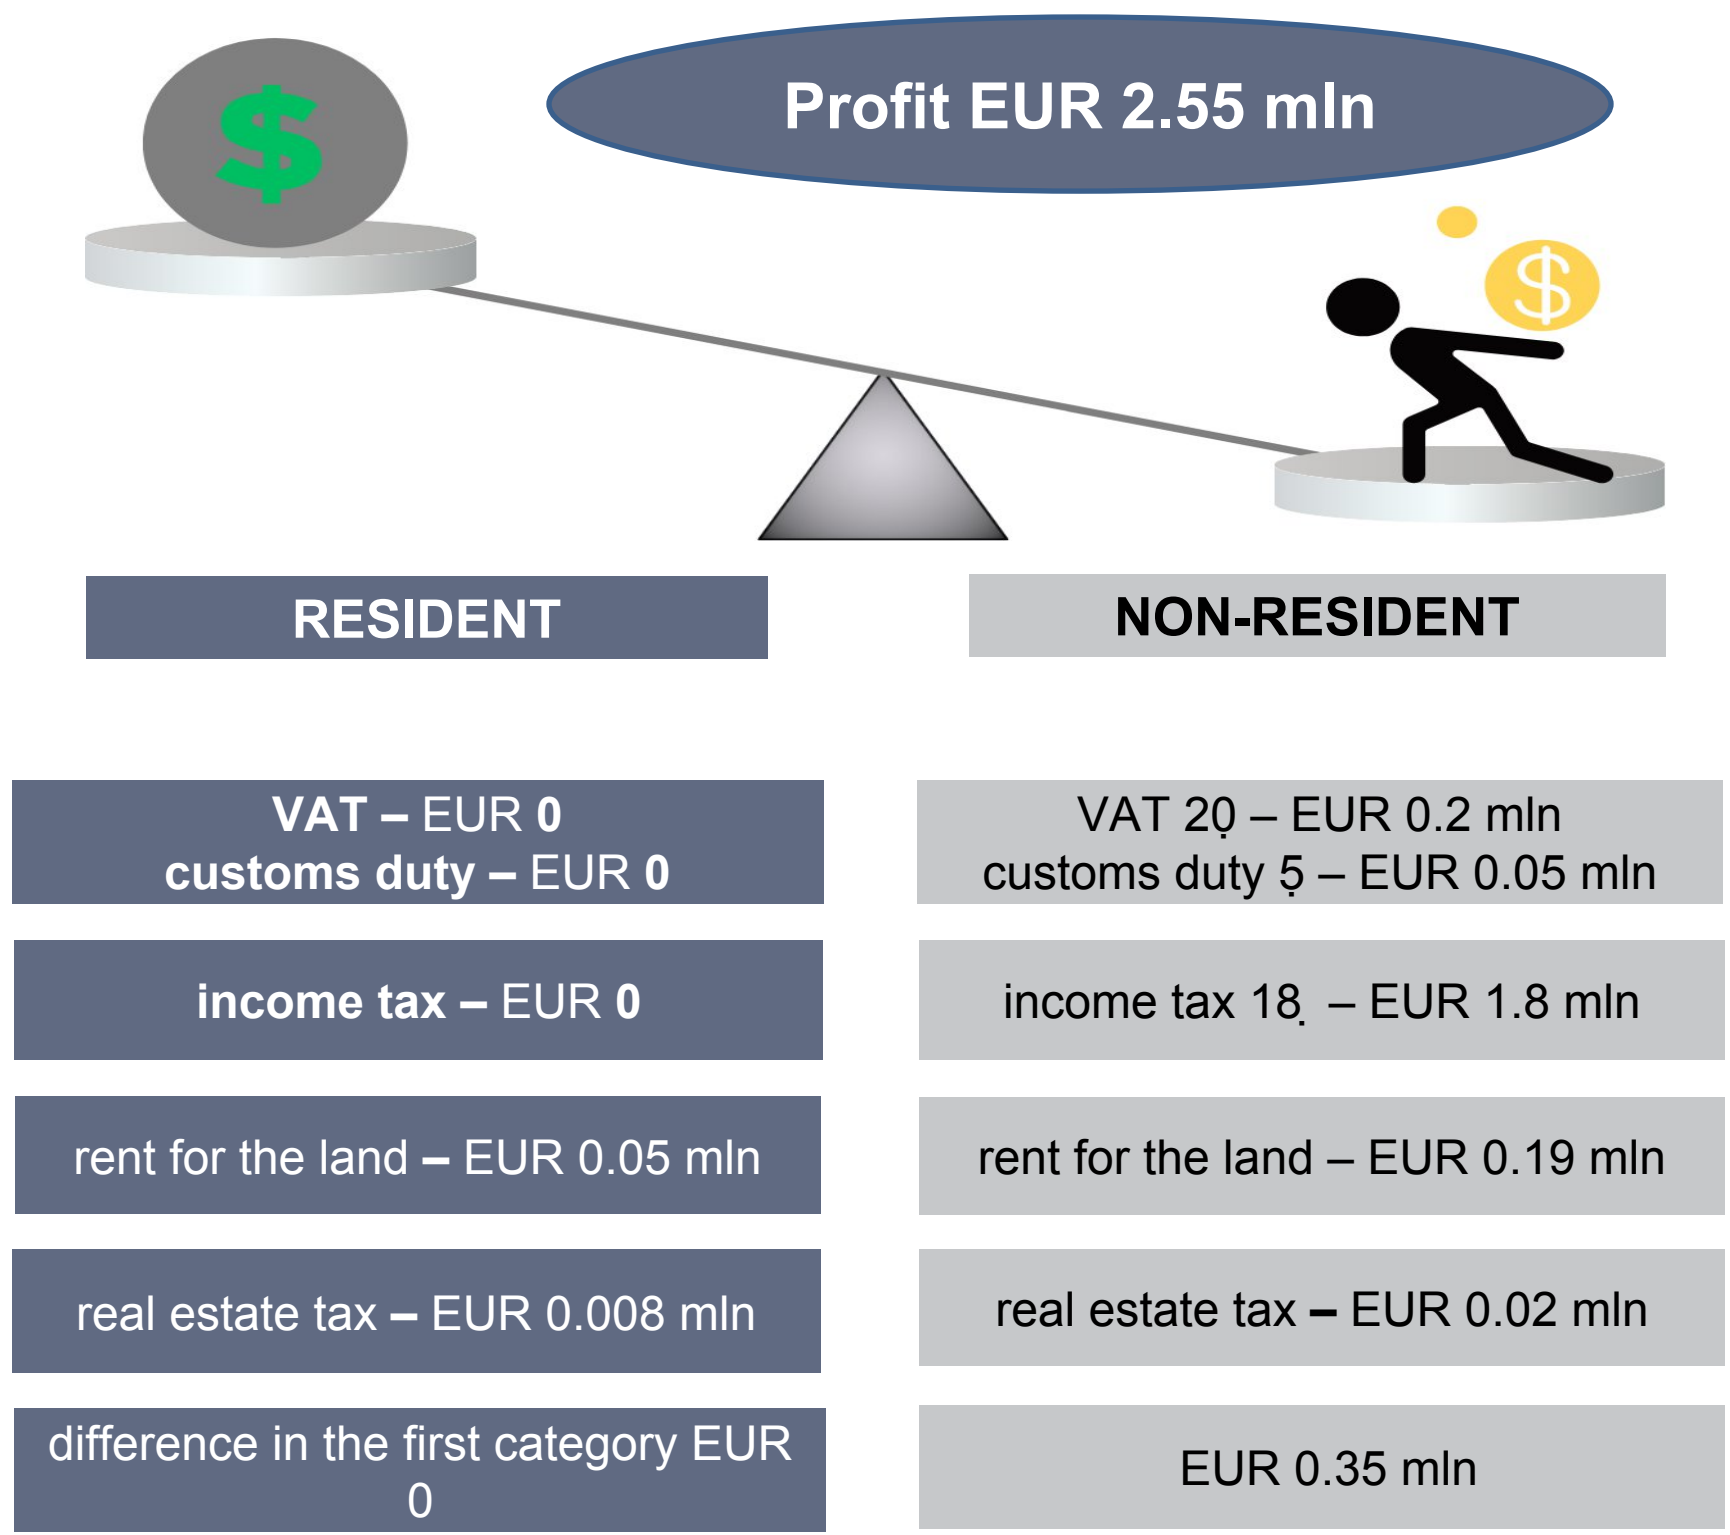

MLN €

Economic and industrial development

Financial benefits for the resident for 10 years

Financial benefits on:

- ~ import of equipment, materials and equipment for EUR 1.0 million
- ~ income tax from EUR 10 million a year
- ~ rent for the land from 1 ha
- ~ real estate tax per 1000 m²
- ~ electricity tariff, difference in the first category, with consumption of 1.2 MWh per year

Economic and industrial development

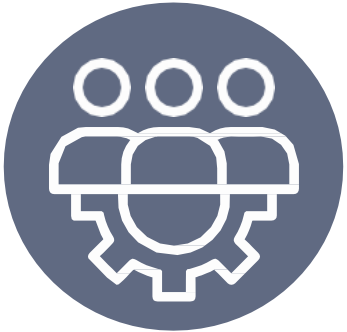

There are prepared industrial land plots of communal property ranging from 0.4 ha to 6.3 ha for the location of production facilities of hazard classes 4 and 5 with a full package of documents and prepared for lease (sublease)

Residents of an industrial park deal with one legal entity, the management company, when organising and carrying out activities within the park.
This is the single window" principle.

Reconstruction of the Central Aeration Station

Existing condition of the wastewater treatment facilities

The WWTP, commissioned in 1979, has a design capacity of 330,000 m³/day and an actual load of 120,000 m³/day

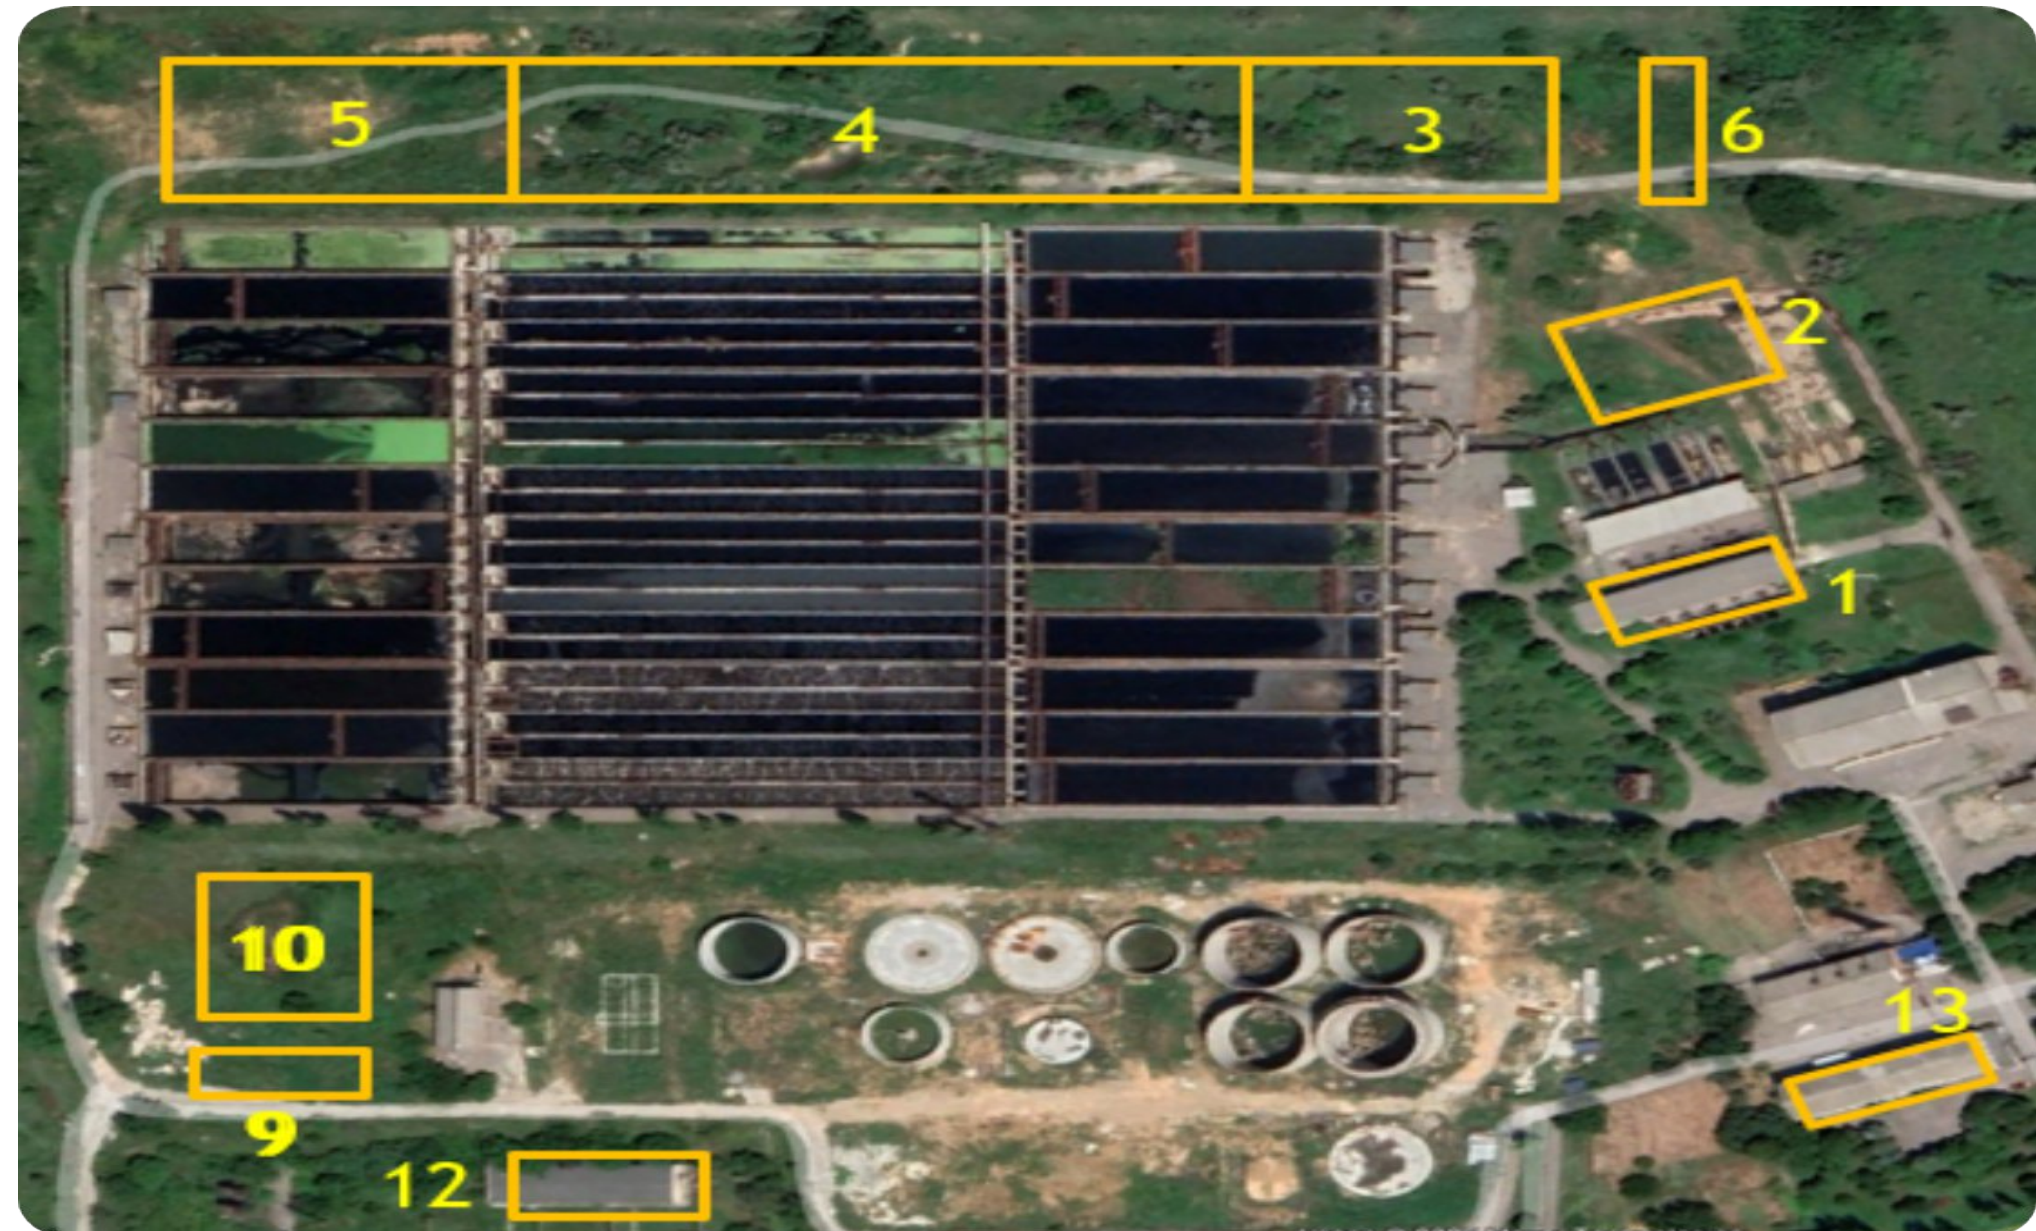

FIRST PHASE

The first construction phase with a capacity of over 60,000 m³/day

Reconstruction of main treatment sections (grates, pumping stations, power supply)

New blocks: grit chambers, sedimentation tanks, aerotanks, disinfection unit

New pipelines and automation system

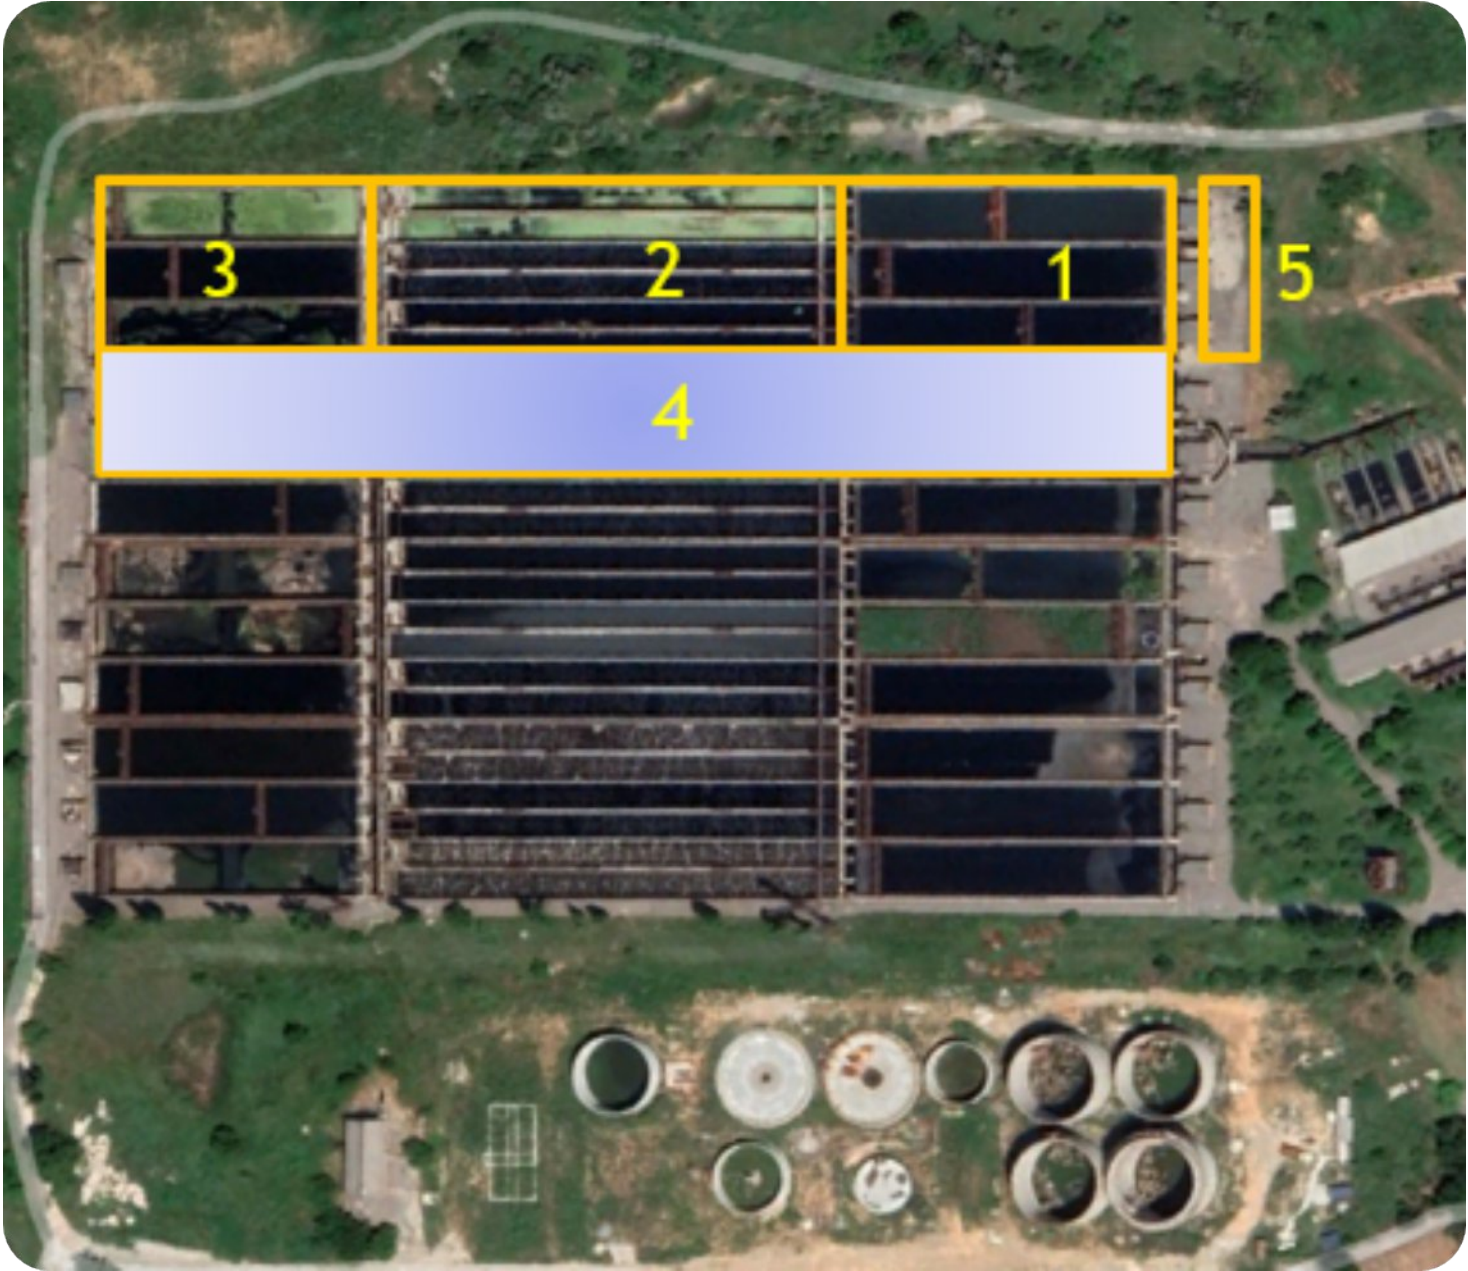

SECON
D
PHASE

Reconstruction of the Central Aeration Station

Second phase of construction with a capacity of over 60,000

m³/day

Reconstruction of existing aeration tanks № 10, 11, and 12

Installation of blowers for the second phase

Automation integration and site improvement

Improving the quality of wastewater treatment to international standards

Improving the environmental safety by preventing the discharge of untreated wastewater into the Dnipro River

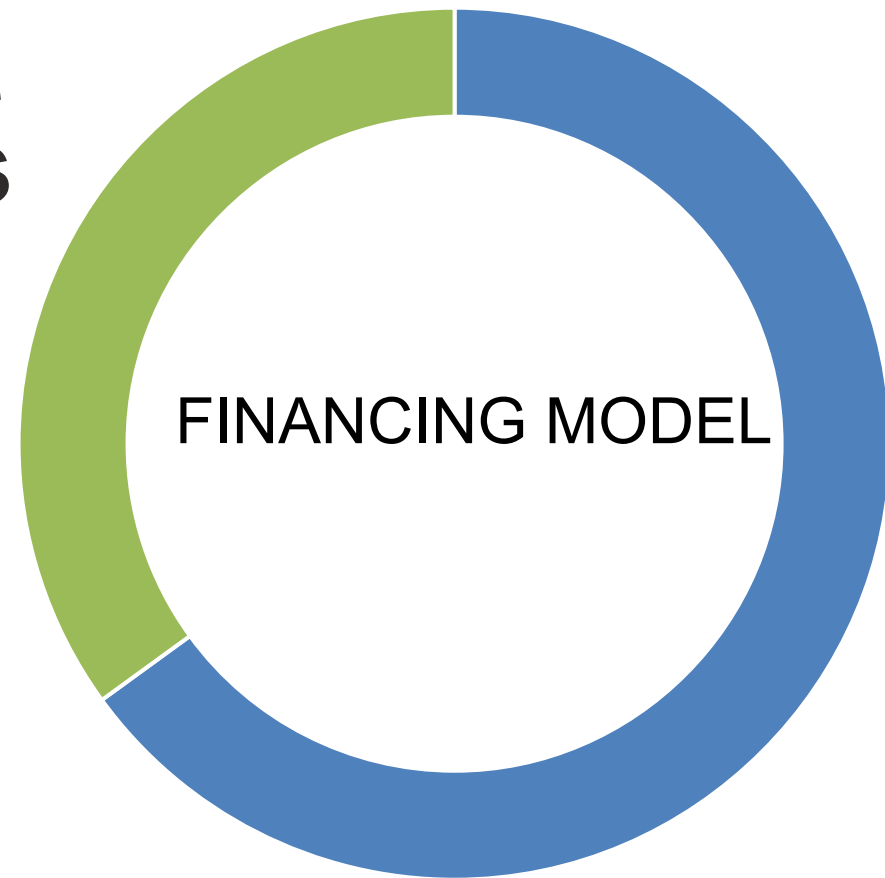

Improving the energy efficiency of the facility
