

Xylem's commitment & strategy to support Ukraine's sustainable water infrastructure recovery, reconstruction, and modernization

Xylem Eastern Europe North Division

14th of November 2025

Markets & Product Lines

Xylem innovates and collaborates with utilities, industrial manufacturers, building operators, and communities, to protect and optimize water.

Pumping & Transport

Restore sewage pumping stations, add flood/dewatering capacity, stabilize neighborhood pressure with booster sets, and keep service running during repairs via temporary bypass.

Municipal WWTP (aerobic)

Restore compliance and cut energy by modernizing aeration and oxygen control, and add modular SBR/field-erected units to handle growth and rain peaks.

Municipal WWTP (anaerobic/biogas)

Digest sludge to reduce disposal, co-treat suitable industrial flows, and generate biogas for heat/power to offset operating costs.

Wastewater Mixing – basins & ditches

Stabilize basins with Flygt mixers; adaptive control matches real-time demand to cut electricity and prevent dead zones and odors.

Drinking Water & Municipal Water Supply – Filtration & Barriers

HVAC and building services solutions for clean water supply of commercial and residential buildings. Leopold filters; UV and ozone barriers to improve safety, taste, and color in compact footprints.

Disinfection & Chemical Feed

Generate disinfectant on-site (OSEC) or use gas/chlorine dioxide where appropriate, with automated analyzers/controllers maintaining safe residuals and alarms.

Tertiary Treatment & Advanced Clarification

Use compact CoMag/BioMag for tertiary polishing and storm first-flush pretreatment – protecting rivers & lakes now, and preparing plants for tighter future limits.

Water Quality & Discharge Monitoring

Continuously monitor residual disinfectant, pH, conductivity, ORP, temperature, and open-channel flow to enable early warnings and audit-ready compliance data.

Digital (SCADA & Analytics)

Run real-time dashboards and automated control to trim energy, reduce leaks, speed operator response, and provide proof-of-performance for investors and community governments.

Xylem's Partner Distributors in Ukraine

Together, we will restore, rebuild, and modernize Ukraine's water infrastructure network

**SAFCO
ADAQUOR
GROUP**

- Flygt (wastewater pumps & mixers)
- Lowara (building services and industrial applications pumps/systems)
- Godwin (diesel, self-priming pumps)
- Leopold (filtration/underdrains)
- WEDECO (UV & ozone)
- Sanitaire (aeration, SBR/ICEAS, blowers)

- Flygt (sewage/axial/portable & adaptive mixers)
- Lowara (building services and industrial applications)
- Godwin (diesel bypass/dewatering)
- Leopold (filters, Texler lamella, IMS underdrains, Oxelia DW solution)
- WEDECO (UV: E/ME, A/B-PE, K-series, Duron)
- Sanitaire (SBR, TurboMAX blowers, Silver diffusers)
- MJK (MagFlux flowmeters, instrumentation)

ЕкоІнструмент-Київ
ecoinstrument

- WTW (lab & online process – IQ SensorNet, CarboVis/NitraVis/TetraCon, turbidimeters)
- YSI (lab & life-sciences analyzers)

АНТАРЕС
НАУКОВО-ВИРОБНИЧИЙ ЦЕНТР

- SonTek (hydrometry – RS5, M9, SL ADCPs)
- YSI (monitoring buoys EMM family/software)

Silcarbon
aktivkohle

- Wallace & Tiernan (disinfection and water quality monitoring and control)
- OSEC electro-chlorination
- DIOX chlorine dioxide generators
- Chlorine gas feed equipment
- Water quality analyzers & controllers

Ukrainian Water Association Partnership

Xylem partners with the UWA through Watermark to implement the Community Water Resource Management Strategy – a feasibility study to help Ukrainian communities develop & implement their water infrastructure projects

**Ukrainian
Water
Association**

xylem 
watermark™

**Collect & Validate –
communities' water
resource network
data**

**Develop –
infrastructure
reconstruction &
modernization
projects, and
calculate budgets**

**Connect –
communities with
industries and
investors for project
implementation**

Xylem's Watermark Impact

Through Xylem's social impact & responsibility program Watermark, our teams across Europe & the United States come together to organize humanitarian and disaster response support to Ukrainian communities through NGO partners
