

ESMIL
GROUP

ESMIL: ReBuild Ukraine with Global Standards.

Ukraine Waterworks Problematics.

Sergiy Pesin

CEO Esmil Group

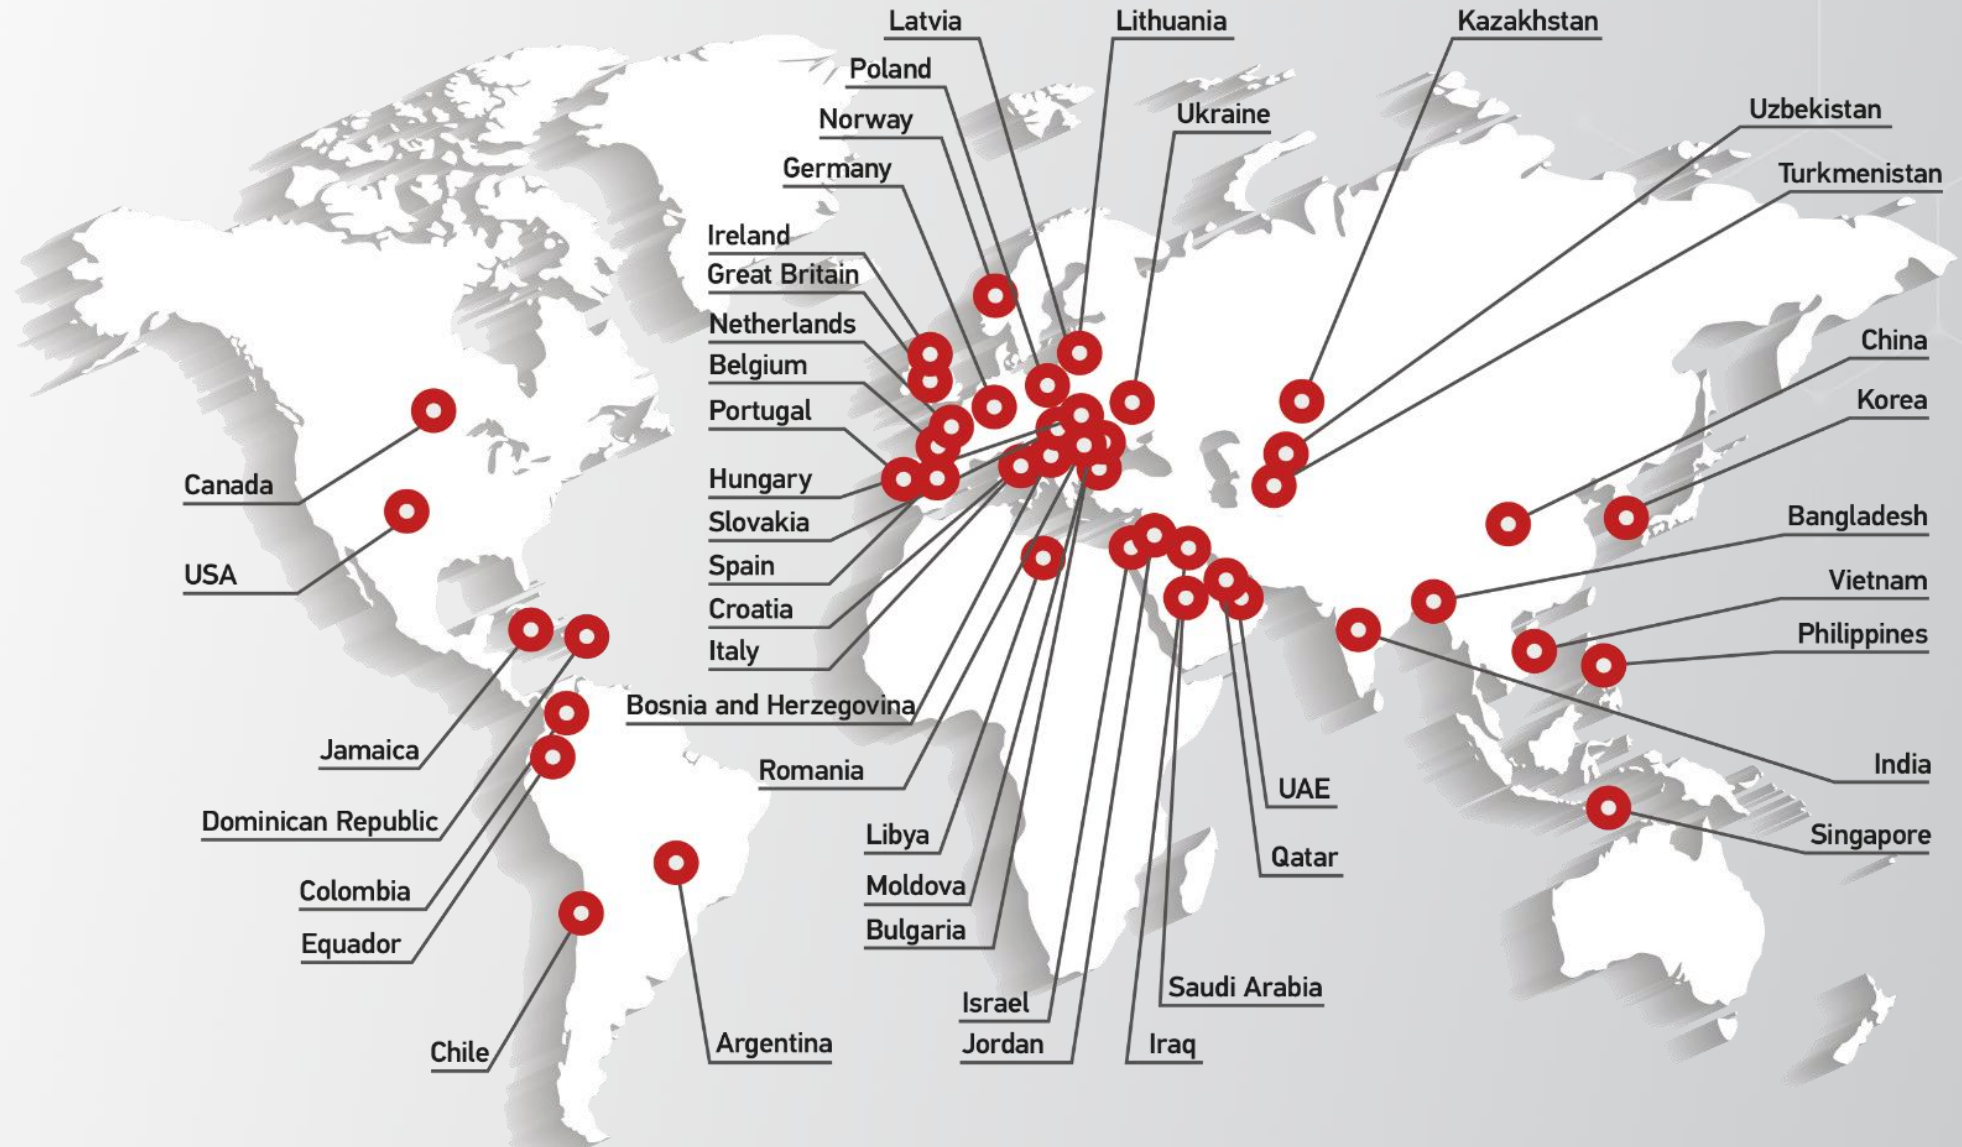

Wastewater Treatment Process Equipment Manufacturer

**Esmil Group - 30 Years
dedicated to Wastewater
Treatment**

ESMIL Installations Worldwide

ESMIL in Ukraine in 2022–2025

**80+ projects of restoration/modernization for
Ukrainian Wastewater Treatment Plants**

Overall “ReBuild Ukraine” Problems for the Water Sector:

- Cultural differences for multinational project teams: different approaches and expectations result in delays and project failures
- Initial data is unclear: risk of project failure
- Production and supply logistics fail to make equipment ready on a large scope and on time
- Local after-sales service missing: risk of making the whole project totally useless

We Know How to Make It Work: Facing Cultural Differences Issue

- ESMIL is a **multinational company** with Ukrainian roots.
- Our structure allows seamless collaboration across the EU, USA, and UK.
- Each project team involves people with both Ukrainian and International project backgrounds
- **~140 employees**, incl. **~50 in Ukraine**.

Esmil's Global Project Footprint

Bagdad, Iraq

Houston, TX, U.S.

Kharkiv, Ukraine

Warsaw, Poland

We Know How to Make It Work:

Manufacturing Capacity and Logistics

ESMIL has its **manufacturing plants** in

- **Poland,**
- **USA,**
- **Ukraine.**

Engineering Center in

- **United Kingdom**

High-quality manufacturing in line with both international and local Ukrainian standards.

We Know How to Make It Work:

ESMIL factory in Poland as a Logistics Hub for Ukrainian Projects

Strategically located in the EU, our Polish production site ensures efficient equipment delivery and seamless support for Esmil's projects across Ukraine.

Esmil Poland Manufacturing Plant

Year of foundation:
2012

Place of production:
Elk, Poland

Activity:
wastewater treatment
and sludge dewatering
equipment manufacturing

Esmil Poland Manufacturing Plant

Year of foundation:
2012

Place of production:
Elk, Poland

Activity:
wastewater treatment
and sludge dewatering
equipment manufacturing

Esmil USA Manufacturing Plant

Year of foundation:
2016

**Place of production
for North American
market:**
Cleveland OH, USA

Activity:
wastewater treatment
and sludge dewatering
equipment manufacturing

Esmil Ukraine Manufacturing Plant

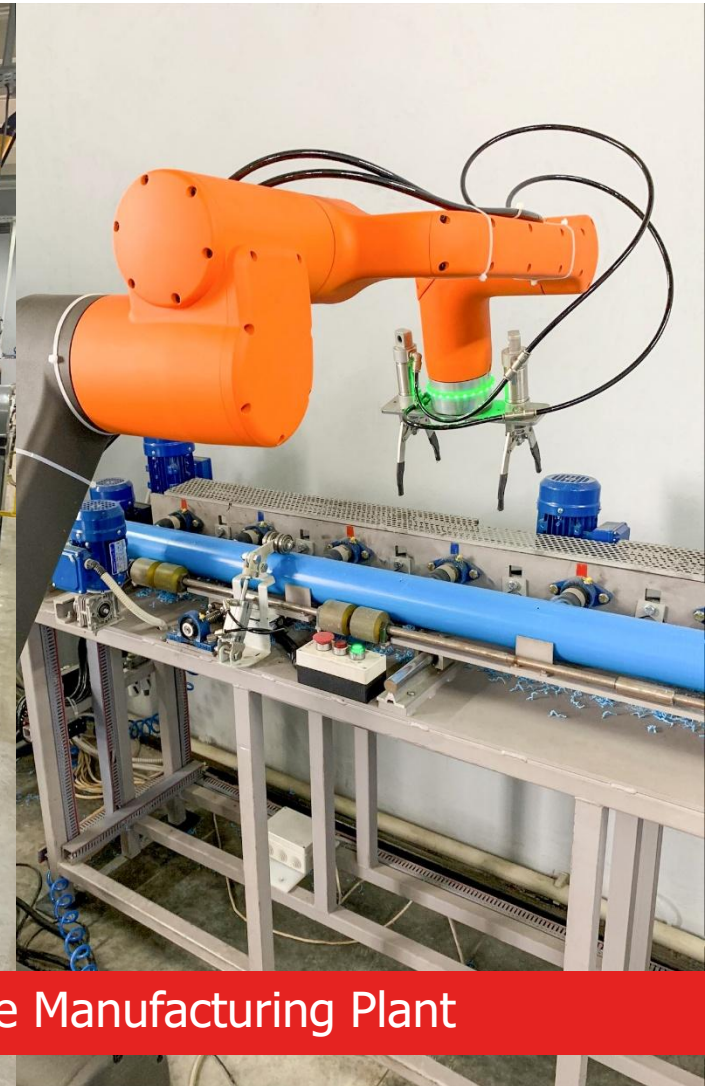

Year of foundation:
1995

Place of production:
Chuhuiv, Ukraine

Activity:
wastewater treatment
and sludge dewatering
equipment manufacturing

Esmil Ukraine Manufacturing Plant

Year of foundation:
2022

Place of production:
Chernivtsy, Ukraine

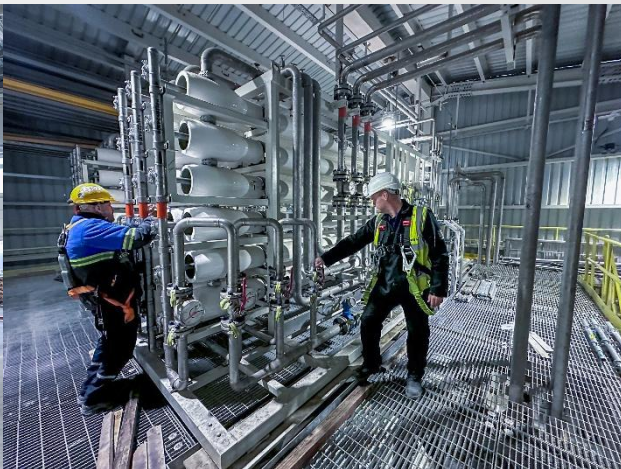

Activity:
wastewater treatment
and sludge dewatering
equipment manufacturing

We Know How to Make It Work:

Initial data collection and engineering

- On-site data collection
- Pilots
- Long-term cooperation with Ukrainian designers
- Huge record of installations in Ukraine (totally more than 500 projects)

We Know How to Make It Work:

Local Service in Ukraine

- Field service technicians
- Process Engineers
- Automation Engineers
- Mechanical Engineers

Our experienced technical team ensures full-service support — from equipment design to its commissioning and maintenance.

We Know How to Make It Work:

Modular Solutions for Maximum Flexibility

- Mechanical treatment
- Clarifiers and DAFs
- Aeration
- Sludge dewatering

Plug-and-Play units delivered from the Factory are ready to use.

**Ukraine's infrastructure
reconstruction during the war is not
an easy task.**

**ESMIL knows how and makes it
happen**

**We appreciate you
all very much for
ReBuilding Ukraine!**

**Happy to Share Our
Experience**
