To the Director of Premier Expo

Tatiana FEDOROVA

Regarding energy support of Ukraine

Dear Ms. Fedorova,

Due to the ongoing massive missile strikes by the Russian Federation against Ukraine's energy infrastructure, our country is experiencing significant disruptions in heating, water, and gas supply for the population. A considerable number of energy facilities have sustained severe damage or have been completely destroyed, creating an urgent need for the rapid restoration of the energy system.

In view of the scale of the destruction, Ukraine is in critical need of emergency restoration equipment, including: power transformers of various voltage classes (750 kV, 330 kV, 110–150 kV, 35 kV), high-voltage circuit breakers and disconnectors, 10 kV outdoor switchgear units, cable and wiring products (including control cables and cable terminations), mobile substations, as well as other essential equipment required to restore electricity generation, transmission, and distribution. In addition, there is an urgent need for gas turbine units and compressor systems to ensure stable operation of the gas transmission system and underground gas storage facilities.

Given the strong reputation of Premier Expo and its extensive network of international business contacts, we kindly request your support in disseminating information on Ukraine's urgent equipment needs among foreign companies that may be able to provide the required items (attached).

In case of any questions please do not hesitate to contact Mr. Oleksandr Dorofieiev, the first secretary of the Department of Economic Diplomacy and Recovery of the Ministry of Foreign Affairs of Ukraine: oleksandr.dorofieiev@mfa.gov.ua.

We would be grateful for your assistance and engagement of partners willing to support Ukraine during this critical period.

Attachment: 6 pages.

Sincerely,

**Acting Director of the Department
of Economic Diplomacy and Recovery**

Dmytro KOKHAN
