ABOUT KYIV AGGLOMERATION

KYIV AGGLOMERATION ASSOCIATION
established on October 9, 2019

Mission: To unite efforts in addressing common challenges faced by territorial municipalities, protect their rights and interests, create conditions for the sustainable socio-economic development of settlements, and ensure the effective exercise of local self-government powers.

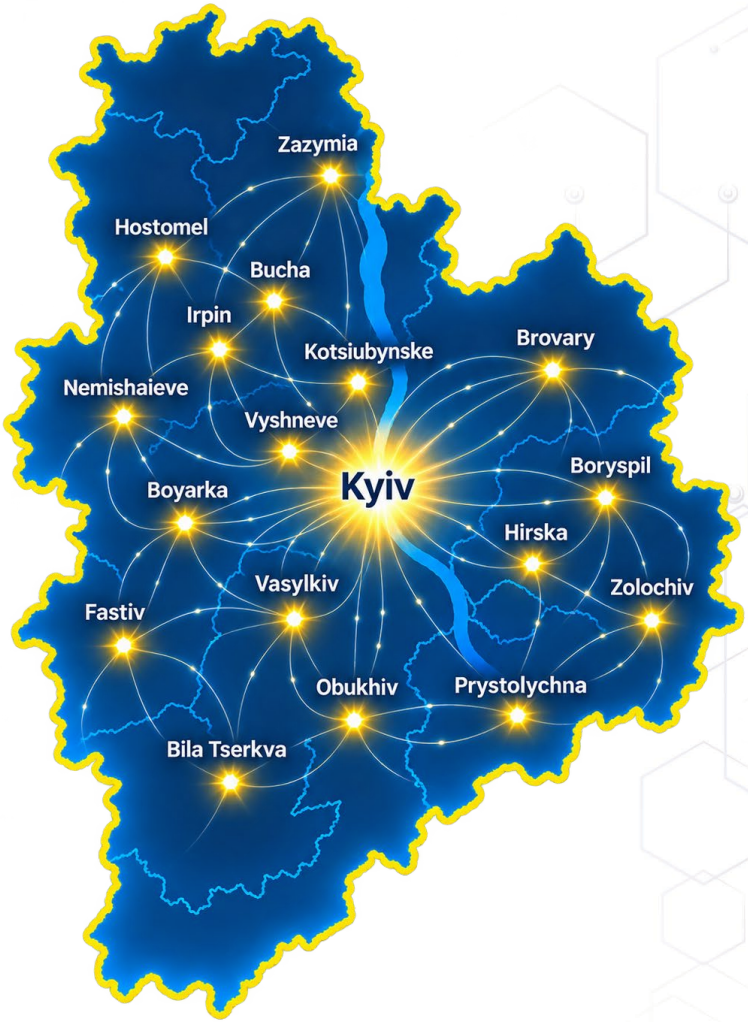

Kyiv Agglomeration brings together **18 territorial municipalities**, centered around **Kyiv**, the capital of Ukraine.

The **18 municipalities** encompass **167 settlements**.

Total area: 4,291.05 km²

Population as of February 24, 2022: 3,881,867 people

Population as of September 1, 2026: 3,826,518 people

SUPPORT TO MUNICIPALITIES WITHIN KYIV AGGLOMERATION

- Coordination of humanitarian assistance in March–April 2022 for municipalities affected by temporary Russian occupation and shelling. Aid was delivered from western regions of Ukraine and abroad, including food, hygiene products, construction materials, and equipment.

- Cooperation with the B50 Charitable Foundation to clear debris in areas affected by Russian occupation.

- Emergency and rescue assistance: Kyiv provides ambulance services and rescue equipment support to the municipalities of Bucha, Irpin, Hostomel, and Borodianka.

- Restoration of water supply: With the participation of Bucha, Irpin was connected to Kyiv's water supply system. The city now receives water from the capital's water treatment facilities.

- Joint public transport services were launched between Kyiv and its surrounding municipalities.

- Direct financial assistance: Agreements were signed to provide financial support to municipalities that suffered extensive destruction. Kyiv allocated a total of UAH 255 million (EUR 6.4 million) in direct financial assistance to 10 municipalities affected by the Russian invasion.

INVESTMENT OPPORTUNITIES EXIST, BUT THEY ARE FRAGMENTED

Where Do We Stand Today?

- Each municipality independently develops and presents its investment proposals.
- Information on investment projects, land plots, and infrastructure is scattered across different sources.
- Common needs and challenges of municipalities are not always identified and analyzed at the agglomeration level.
- Investors find it difficult to assess the potential of the entire area as single economic space.
- Intermunicipal projects require coordination and joint preparation.

The challenge is not only fragmented information, but also insufficient coordination of investment initiatives.

18 MUNICIPALITIES — SHARED NEEDS, JOINT SOLUTIONS

What Are We Planning to Do?

Develop a unified digital platform that will bring together:

- An interactive map of investment opportunities;
- Infrastructure and resource potential;
- Information on municipalities' needs and initiatives;
- Opportunities to identify joint intermunicipal solutions.

The digital platform will enable:

- Collection and systematization of municipalities' needs;
- Analysis of shared challenges and opportunities for cooperation;
- Identification of potential intermunicipal projects;
- Development of a joint investment portfolio for potential partners.

From the needs of individual municipalities to joint development projects across Kyiv Agglomeration.

PRIORITY AREAS OF COOPERATION WITHIN KYIV AGGLOMERATION

INFRASTRUCTURAL

- Development of a joint comprehensive transport scheme for road and rail transport
- Implementation of energy independence projects

ECONOMIC

- Joint priority development areas
- Joint resource management and greater integration

ENVIRONMENTAL

- Construction of joint zero-waste waste processing complexes, including biogas
- High-quality water supply and wastewater management
- Preservation of the Bilichanskyi Forest
- Expansion of cycling routes

WHAT WE ARE ALREADY DOING TO ENHANCE THE INVESTMENT ATTRACTIVENESS OF KYIV AGGLOMERATION MUNICIPALITIES

Addressing a Shared Infrastructure Challenge:

FASTIV – KYIV – BROVARY EXPRESS

Developing suburban rail services will provide a viable alternative to private cars and improve accessibility across Kyiv Agglomeration municipalities.

SUBURBAN BUS SERVICES IN BUCHA DISTRICT

Joint suburban bus routes will help reduce congestion on the transport network and make travel easier for Kyiv Agglomeration residents.

Modern suburban transport connections are a practical step towards sustainable municipal development and new investment opportunities.

FROM SEPARATE WASTE MANAGEMENT SYSTEMS TO INTERMUNICIPAL COOPERATION

Municipalities face shared challenges: waste accumulation, transportation costs, and the need for waste sorting and recycling.

An effective waste management system often requires cooperation between several neighboring municipalities.

Joint solutions may include sorting facilities, recycling infrastructure, coordinated logistics, and integrated planning.

A practical area of cooperation is the development of intermunicipal partnerships within the Bucha Cluster.

A CLEAN ENVIRONMENT — A SHARED INTEREST OF 18 MUNICIPALITIES

Air quality, the condition of water bodies and green spaces, and environmental pollution affect the entire Kyiv Agglomeration.

Environmental challenges in one municipality can have consequences for neighboring municipalities.

Joint actions include environmental monitoring, protection of water resources, preservation of green spaces, and implementation of environmental projects.

The Investment Map can help identify areas with shared needs and develop joint projects to attract international support.
