

Chateau
PINOT

FAMILY WINERY FROM UKRAINE

ABOUT COMPANY

Chateau Pinot is a modern, family-owned, full-cycle winery located in the Odesa region, one of Ukraine's premier winemaking regions - the Bessarabia of the Dniester, in the village of Ozerne, on the slopes of Ukraine's largest freshwater lake - Yalpug. Viticulture has been a longstanding tradition here since the times when Greeks and Thracians first discovered these fertile lands.

60 hectares of vineyards thrive on clay soils rich in minerals, with deep layers of limestone. Each vine yields only a few clusters, hand-harvested to preserve their rich flavor and aroma, imparting strength, harmony, and elegance to the wine. The geographical location, sharing the same latitude as Bordeaux and Piedmont, offers an excellent opportunity to cultivate grapes in optimal climatic conditions.

At Chateau Pinot, we present wines that embody the terroir that created them. The vineyards were planted in 2013, the winery was built in 2019, our first planned release of wines in 2022 was postponed to 2023 due to the war.

While specializing in grape varieties of the Pinot group, we also experiment with other varieties.

In creating Chateau Pinot, we have infused it with our core values - a love for artisan winemaking and communication with people, as well as an appreciation for life's simple moments.

Chateau Pinot Winery is very young but already impressive.
