

# MACROECONOMICS

## WHEN

Spring 2025

## CREDITS

2.5

## FORMAT

Online Offline

## EXTRA

MBA-course

## LANGUAGE

English

During this course you will focus on the fundamental issues in macroeconomics such as economic growth, inflation, unemployment, monetary and fiscal policy, and exchange rate determination.

You will explore the nature of the main economic policy issues at a conceptual level and will use macroeconomic tools to analyze how various disturbances and government policies affect the economy with particular focus on applications to the economy of Ukraine.

## COURSE OBJECTIVES

The main objective is to help students See how economies function in both national and international contexts. Choose this course if you want to:

- Gain a thorough understanding of major macroeconomic indicators such as GDP, inflation, unemployment, current account and budget deficits, government debt, and their significance in assessing the health and performance of an economy
- Acquire a deep understanding of the nature of local and global economic crises
- Explore the role of government policies in shaping the economy
- Learn how to apply their knowledge of macroeconomics to strategic planning and business decision making
- Examine the interdependencies between different parts of the economy and analyze the feedback reactions that occur as a result of policy interventions and external shocks
- Understand how macroeconomic factors can influence business operations, investment decisions, and overall business strategy
- Explore the transmission mechanism of various macroeconomic policies and shocks on different sectors of the economy.
