

About us

make your decision data**driven**

Leading Ukrainian provider of research & consulting services

Consultants
from the
world of
research &
data

DataDriven was established by dedicated research enthusiasts, who have been developing the Ukrainian think tank ADASTRA since 2019.

Born from a collective vision to revolutionise decision-making processes in public and private sectors, DataDriven proposes data-driven strategies.

Having worked in multiple research and consulting institutions, we know how data-based analysis can solve problems across all economic sectors and how many issues are caused by a lack of needed information. Driven by this insight, we aim to bridge the gap with our services.

Deep presence on the Ukrainian market

State stakeholders

We advised many state executive bodies, ministries, Ukrainian parliamentarians, and embassies abroad, such as:

- Continuous support of the Political Department of the Ministry of Foreign Affairs

- Strategic recommendations for the Ukrainian delegation to the Council of Europe

- Analysis of an emissions trading scheme introduction for the Ministry of Ecology

Different business industries

We have experience in working with multiple Ukrainian industries:

- Support the Export Acceleration Mission of National Trade Promotion Agency of Malaysia to Ukraine (focus on energy, electronics, security)

- Research of a coffee market for a big Ukrainian FMCG group

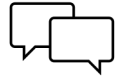

- Sourcing support in import from Ukraine to Indian companies (agriculture, auto, equipment)

Local & regional stakeholders

We worked with multiple local actors, showcasing our abilities to deliver projects in all Ukrainian regions:

- Field & expert interviews in Kharkiv, Lviv, Odesa, Dnipro & Kyiv for a retail player

- Research on charity in Ukraine during the war for the NGO from the West of Ukraine

- Supporting several territorial communities from Chernivtsi Region in communication with international stakeholders

Global chain of partners for cross-border projects
