

New building for UNBROKEN KIDS – New hope for children

UNBROKEN

545 Ukrainian children died from the war

1,390 children were seriously injured

1,525 hospitals were damaged, **198** were completely destroyed

Roman, a year after the rocket attack on Vinnytsia

Since 24 february 2022,
Lviv has welcomed
more than 5 million people

About the hospital

UNBROKEN

Over **FIVE HUNDRED** wounded children were evacuated to UNBROKEN KIDS at St. Nicholas Hospital.

We have become a place of salvation for children from all over Ukraine. This includes treatment, rehabilitation and prosthetics. We also take in displaced children who flee to Lviv from the war.

humanity ecosystem

War: our patients

Severe mine and gunshot wounds,
burns, amputations. Many of them
suffered brain damage both as a
result of shelling and after the
experience

trains. *April 2022*

In the photo - 8-year-old Roma.

He is that boy who was injured in July 2022 during an airstrike on Vinnytsia.

His mother took the child to a doctor when the Russians fired rockets into the city center. Mother died. Roma received 45% burns on his body.

UNBROKEN

Mykhailo Volovikov was wounded during a mortar attack. This is how Russians attacked civilian objects in Kherson on New Year's Eve. On 31 December, the boy and his friend were having lunch in a cafe. When the shelling started, they quickly ran into the office. However, this did not save them – the metal went through the walls. Mykhailo injured part of his skull, and **one of the fragments got inside his brain**. His 11-year-old friend died on the spot.

A fragment remained in his brain. Neurosurgeons managed to remove the 8 mm fragment and preserve all brain functions.

UNBROKEN

And 10-year-old Veronika is the only one of her family to survive in the shelter. In early April, Russians hit her home in Vuhledar with precision tank fire: her father, grandmother and uncle and his wife died. Veronika survived because adults covered her with their bodies. Fragment in the brain and spinal cord, paralysis of a part of her body, damage to her left eye, the absence of a phalanx on her hand, numerous abrasions and bruises.

The shell fragment is still in her head.

After rehabilitation at a ballroom dance competition

The number of visits to the hospital increased 5 times

25,690

Children treated in 2023

12,300

Surgical operations in 2023

87,582

Patients admitted in 2023

The word "UNBROKEN" is written in white, bold, uppercase letters inside a white U-shaped frame on a yellow background.

UNBROKEN

- Hospital is overcrowded
- Surgery schedule is booked a month in advance

Patients should not wait for help – we should provide it immediately

For this, we need a new building. Everything needed to save children from all over Ukraine will be in one place: specialists, conditions, and equipment
