2

laboratories for prosthetics manufacturing

1000+

employees

THIS IS THE JOURNEY A PATIENT MUST UNDERTAKE TO REACH A SCHEDULED OR URGENT SURGERY

REBUILD UKRAINE
3rd INTERNATIONAL EXHIBITION | CONFERENCE
HEALTH & REHABILITATION
HELPING INJURED UKRAINIANS RECOVER FASTER

SURGERIES WE WILL PERFORM

-  operative interventions in the maxillofacial area;
-  removal of osteophytes and neuromas;
-  excision of osteomyelitis;
-  acute conditions;
-  treatment of inflammatory and purulent diseases;
-  emergency care;
-  plastic surgery.

Faster surgical assistance

- Reduction of waiting time for surgeries from 1 month to 1-2 weeks.
- Ensuring timely adjustments for prosthetics

Reducing the burden on the hospital

- Overcrowded hospitals will reduce the workload.
- More resources for new patients.

Improving rehabilitation

- The closed cycle reduces the rehabilitation time by 1.5-2 months.
- Patients return to active life faster.

Increase in bandwidth

- Increasing the number of operated patients

OPERATING BLOCK

The area

675,7 m2

clean operating room

294.5 m2

purulent operating room

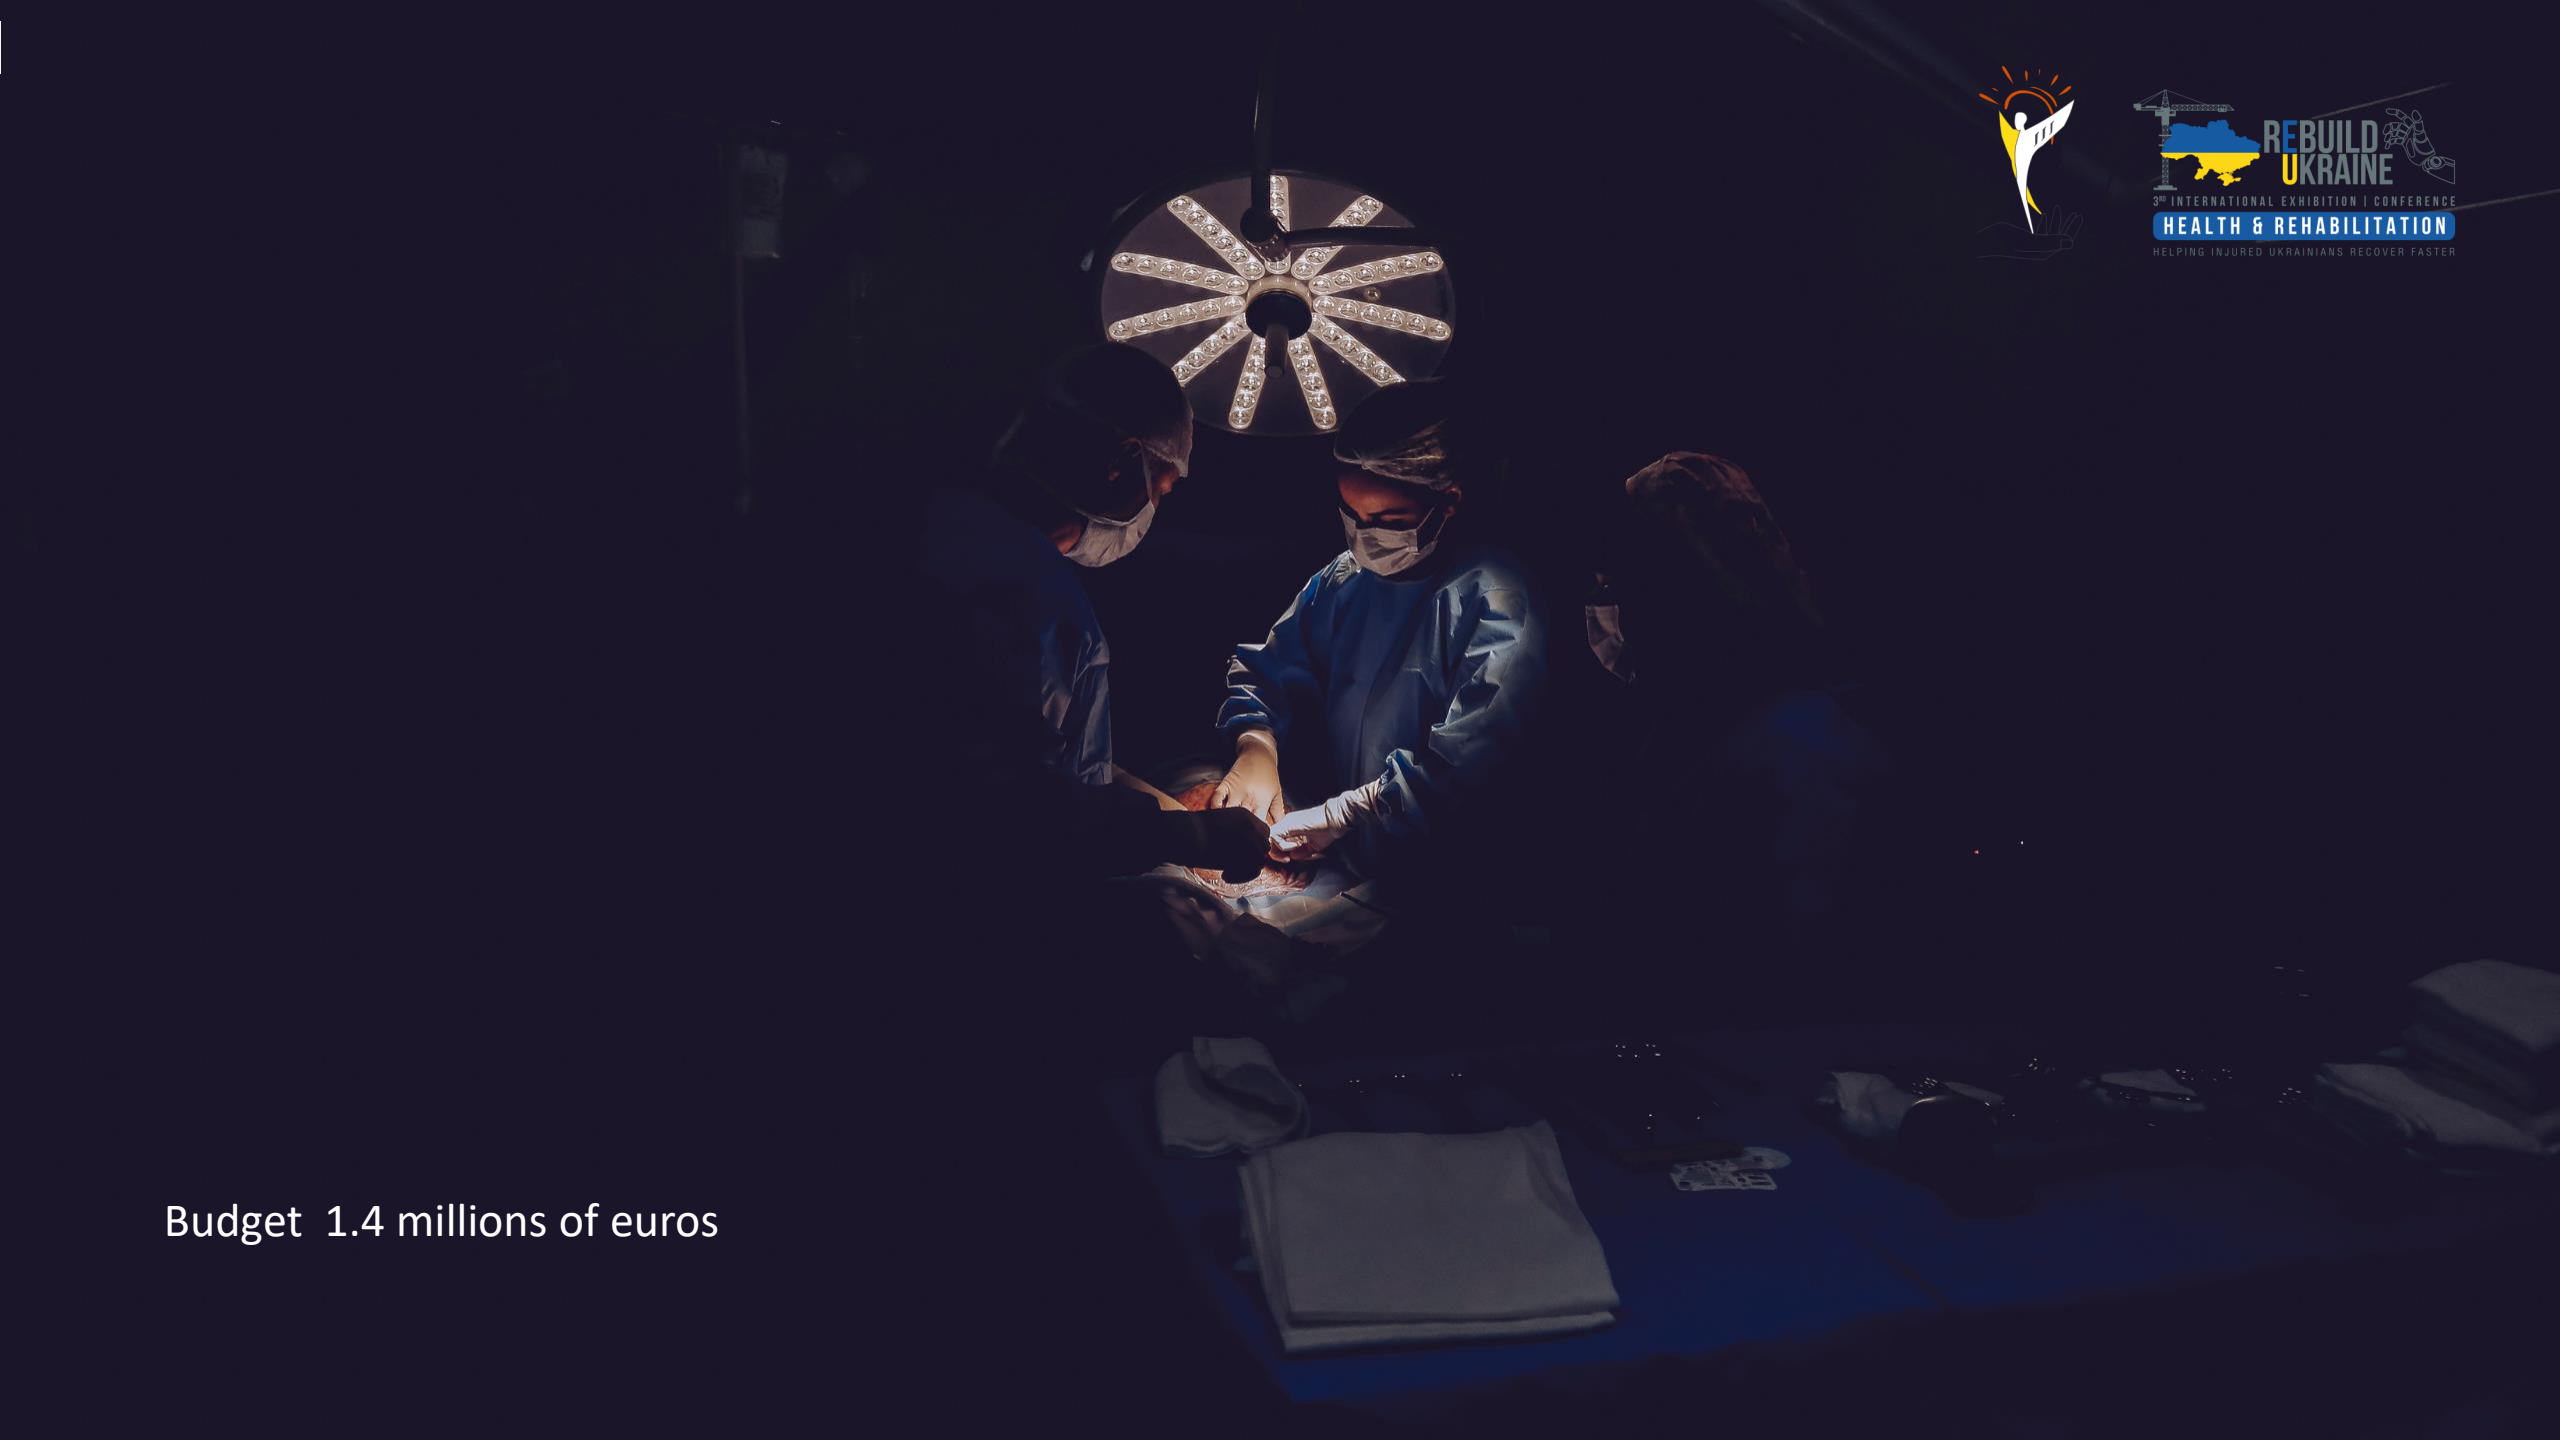

230 m2

6 ward 25.5 m2

151.2 m2

Budget 1.4 millions of euros

THANK YOU
