Improving the efficiency of patient management, registration and referrals

barrier-free accessibility

Reconstruction of the first floor of the polyclinic building, digitalisation of the registry, installation of a roof solar power plant at the Municipal Non-Commercial Enterprise «BCCH» BCC

CONSULTATIVE POLYCLINIC AND PRIMARY HEALTHCARE CENTRE

COST:
EUR 913 850

AREA:
3049,3 m²

DESIGN CAPACITY:
118 916 visits per year

Municipal non-commercial enterprise "Berezhany Central City Hospital" of Berezhany City Council
Municipal non-commercial enterprise "Primary Health Care Centre" of Berezhany City Council

ADDRESS: 16 Stepan Bandera St., Berezhany
OWNERSHIP: Communal

The building in Berezhany located the Berezhany Central City Hospital and the Primary Healthcare (Medical and Sanitary) Centre, which provide specialised consultative, diagnostic and medical care to residents of the Berezhany, Saranchukiv and Narayiv communities in Ternopil District, as well as internally displaced persons.

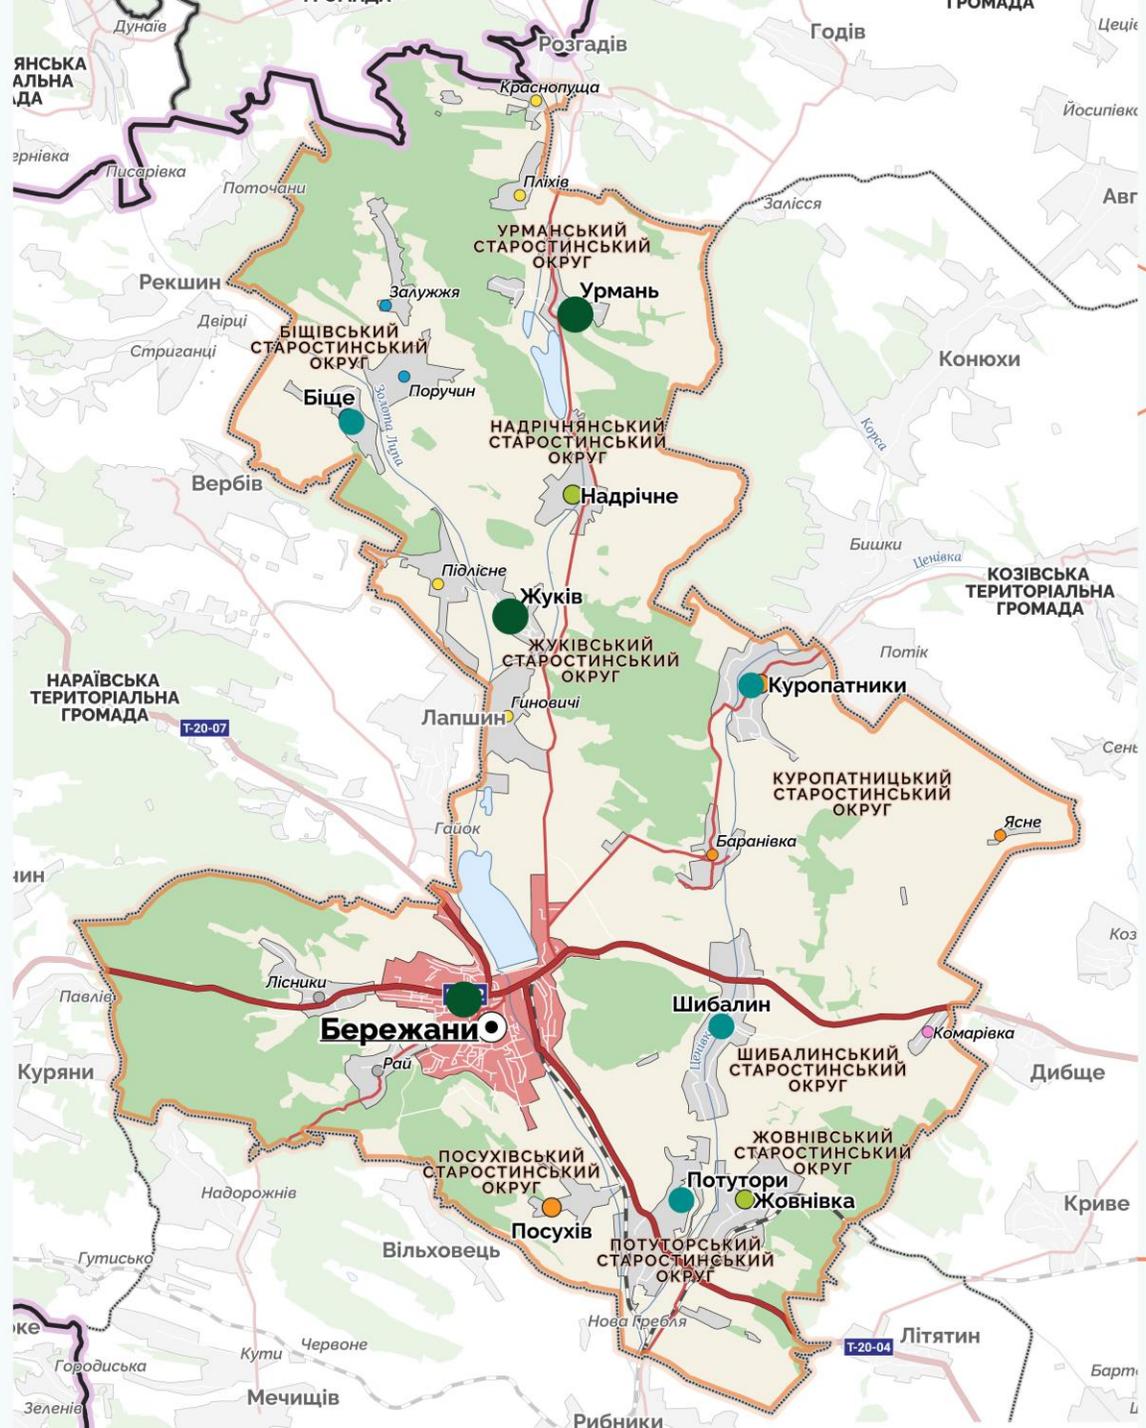

The project will enable remote pre-appointments with doctors and relevant specialists, an electronic queue, digitalisation of medical records and communication between patients and medical and non-medical staff. To ensure uninterrupted operation during the war and frequent power outages, a solar power plant will be installed to enable the provision of digital electronic services and diagnostics.

The project is aimed at strengthening the technical capacity of healthcare facilities, improving the efficiency of patient management and referrals, improving access to quality services in community healthcare facilities; building the capacity of healthcare facilities (medical and non-medical staff)
