VEKA Fine Structure

Your VEKA partner:

FO-FINE STRUCTURE-03/2024-ENG

For stylish windows

- **Striking look**

The new line of VEKA decorative foils impresses with its finely textured surfaces with a matt finish that are reminiscent of powder-coated aluminium windows and simply look good.

- **The latest trend colours**

The carefully selected colours harmonise especially well with all modern architecture styles.

- **First-class VEKA quality**

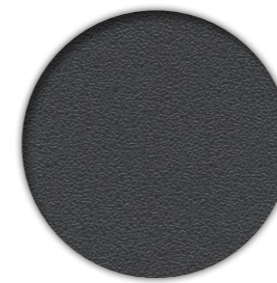

The surfaces are extremely resilient, weather-resistant and scratchproof – as demonstrated by comprehensive stress tests.

Sophisticated colours – finely textured and matt

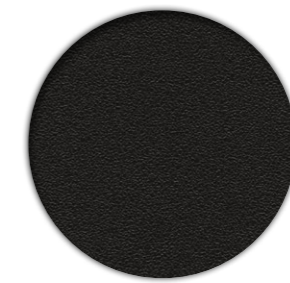

The VEKA Fine Structure colour range features what are currently the most popular colours for windows. The colours effuse elegance and restraint while nevertheless confidently making their mark, and can be optimally mixed and matched with a wide array of other facade colours and materials.

The Fine Structure decorative foils are especially impactful when incident light is reflected in different directions by the finely textured surfaces. This results in a matt look which is reminiscent of powder-coated aluminium windows and creates an especially sophisticated impression.

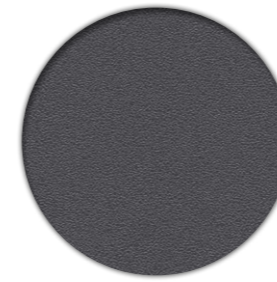

VEKA Fine Structure comes in eight popular trend colours

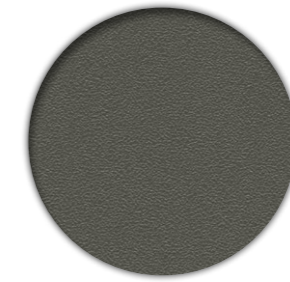

01
anthrazitgrau
Fine Structure

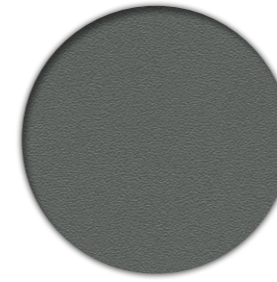

02
schwarz
Fine Structure

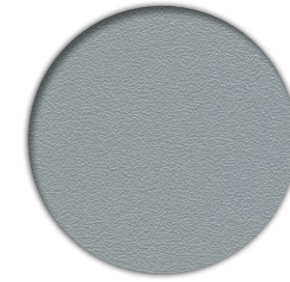

03
schiefergrau
Fine Structure

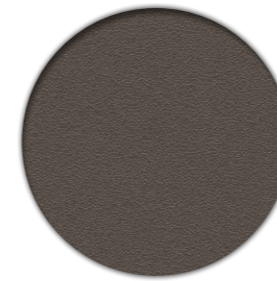

04
quarzgrau
Fine Structure

05
basaltgrau
Fine Structure

06
silbergrau
Fine Structure

07
umbra
Fine Structure

08
verkehrsweiß
Fine Structure

Extremely resilient

VEKA Fine Structure boasts a high degree of resilience to all mechanical and chemical influences as well as to temperature and UV rays.

Epecially easy-care

The frame and sashes are easy to clean as dirt is unable to stick to the surface in the first place.

Anti-fingerprint finish

Fingerprints don't stand a chance on the finely textured, dirt-repellent surface.

Sustainable material

The PVC-U profiles and the decorative foils are recyclable – meaning valuable resources are conserved.
