With better hearing in windy situations and improved soundscape processing, Styletto AX continues to perform better than ever

Augmented Xperience hearing aids can now understand your needs better than ever, and provide the best hearing experience even in windy situations. The newly updated eWindScreen feature keeps wind noise at bay so you can enjoy outdoor activities. Meanwhile, improved AX Soundscape Processing works to understand your situational needs more precisely than ever before, utilizing input from our Own Voice Processing feature to better optimize for conversation in difficult listening situations. Combined with our class-leading speech clarity and HandsFree mode for hands-free cellphone calls, Signia AX gives you our most brilliant Xperience yet – again.
