

# BAILEY AVE BRT

## ACCESSIBLE FOR ALL

The Niagara Frontier Transportation Authority is designing transit and infrastructure upgrades as part of their Bailey Ave BRT (bus rapid transit) project. All the improvements will be compliant with the Americans with Disabilities Act (ADA). It is part of NFTA's commitment to ensure safe, easy, and inclusive travel for all riders.

### NEAR LEVEL BOARDING

Stations are aligned closely with bus floors to minimize gaps and steps, ensuring easier boarding for passengers with mobility devices.

### LIGHTING

Adequate lighting at stations and boarding areas enhances safety, visibility, and navigation across platforms and pathways.

### CURB RAMPS

Provide smooth transitions between sidewalks and street-level crossings, with slopes that meet ADA standards for wheelchair access.

### UNOBSTRUCTED PATHWAYS

Clear, wide, and barrier-free walkways that connect sidewalks to boarding areas, providing safe and convenient access for all passengers.
