Thank you for your continued support for the Bailey Avenue Bus Rapid Transit (BRT) Project.

We are excited to share that the Bailey Ave BRT project is progressing through the engineering of the planned improvements. **The designs for the first part of the project, a new BRT station at University Station Loop, should be complete in the middle of 2026.** NFTA anticipates construction starting later in 2026 and work being complete in 2027. For all other improvements – the other BRT stations, intersection upgrades, sidewalks, traffic signals, etc. – design will be completed in late 2026. Depending on the procurement process, construction could start in 2027 and be finished in late 2028 or early 2029. The service is expected to launch around that time.

While the engineering continues, so does **NFTA's engagement efforts for the Bailey Ave BRT project.** The Bailey Ave BRT community ambassadors are tabling at community events and visiting businesses (institutions and organizations) along the corridor. NFTA staff and consultants are also meeting with block clubs and community groups to make sure they know about the project and to answer any questions. You can view the schedule of upcoming engagement events here.

Let us know if you want us to staff a table at your next community event or present to your organization!

NFTA is also working on related efforts that they will be ready to share with the public shortly, including, the **branding name and logo** for the new BRT system, initial findings of a study on a future **network of transit priority corridors**, and a study on **development potential along Bailey Avenue** as a result of the new BRT project.
