Thank you for your continued support for the Bailey Avenue Bus Rapid Transit (BRT) Project.

We are excited to share that the Bailey Ave BRT project has moved from planning into the design phase!

NFTA anticipates construction starting on the first improvements in 2026, with completion in 2027. Design for all other improvements is on schedule to enter construction in 2027, with completion in 2028 and 2029.

In June and July, we held our Project update events where we shared updated concepts that incorporated comments from previous engagement efforts. More information from those events can be viewed here. Engagement will continue in the area, so please keep your eyes open for our Community Ambassadors visiting businesses along the corridor and attending community events. NFTA will continue to meet with community organizations along the corridor through the end of 2025 and throughout 2026. Let us know if you want us to come present to your organization! You can view the schedule of upcoming engagement events here.

- NFTA is also undertaking related efforts along the corridor to answer the following questions:
  - What should the branding be for the future NFTA BRT system?
  - Are there other transit priority corridors in the Buffalo/Niagara region that NFTA should consider for future BRT projects?
  - How will these transportation improvements along Bailey Avenue lead to more development?

Pictured below is the proposed station design at Genesee/Bailey

Please visit NFTA-Metro | Bailey Avenue BRT | Get Involved for a list of upcoming events and make sure to checkback often for updates! If you have questions regarding the project, please email them to NFTA at baileybrt@nfta.com.

For more information about the project please visit NFTA-Metro | Bailey Avenue BRT.

We wish you a peaceful close to 2025 and a bright start to 2026!
