

A wide-angle landscape photograph showing a suspension bridge over a river at sunset. The sun is a large, bright yellow orb in the upper left, casting a warm glow over the scene. The river flows from the foreground towards the background. On the far bank, a dense line of green trees separates the water from a city skyline. The city features various buildings, including several tall skyscrapers, and construction cranes are visible. The foreground is filled with the lush green foliage of trees, partially obscuring the view of the river and bridge.

NATURE AND BIODIVERSITY

INFRASTRUCTURE. RISKS AND SOLUTIONS

Dr Bohdan Vykhov - CEO of WWF-Ukraine

Transport infrastructure without consideration of the environmental component

RISKS

- Loss of habitat and connectivity
- Loss of biodiversity and ecosystem services
- Accidents involving wildlife and humans

SOLUTIONS

- Biodiversity monitoring system
- Wildlife crossings
- Improvement of national legislation towards EU. DNSH
- Investment policy

Renewable energy infrastructure without consideration of the environmental component

RISKS

- Loss of biodiversity
- Corruption
- Investment and reputational risks for business

SOLUTIONS

- Demarcation of protected areas
- DNSH principles implementation
- Good governance towards EU
- Investments policy
