Managing environmental data for green recovery in Ukraine

www.ceobs.org

Operationalising data

The Green Recovery Platform (GRP) must be built on, and informed by, a **robust environmental data foundation**.

This should be **developed in lockstep** with the GRP concept and become a permanent component of it.

It should comprise a **trusted data directory and repository** that...

Operationalising data

- Can hold (or direct to) data, and shows how it could be used;
- Trusted by stakeholders, easy to navigate and able to evolve;
- Oriented towards assessment, remedial and recovery activities;
- Can identify research priorities and capacity-building needs;
- Is resourced on a long-term basis.

DESCRIPTION: Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing

Key considerations

1. Information clearing house or source of information products?
2. Contributors and users.
3. Sustainability.
4. Harmonisation with existing or emerging initiatives.
5. Data availability, quality, ownership and confidentiality.
6. Implications over access to environmental information.
