STEEL SOLUTIONS

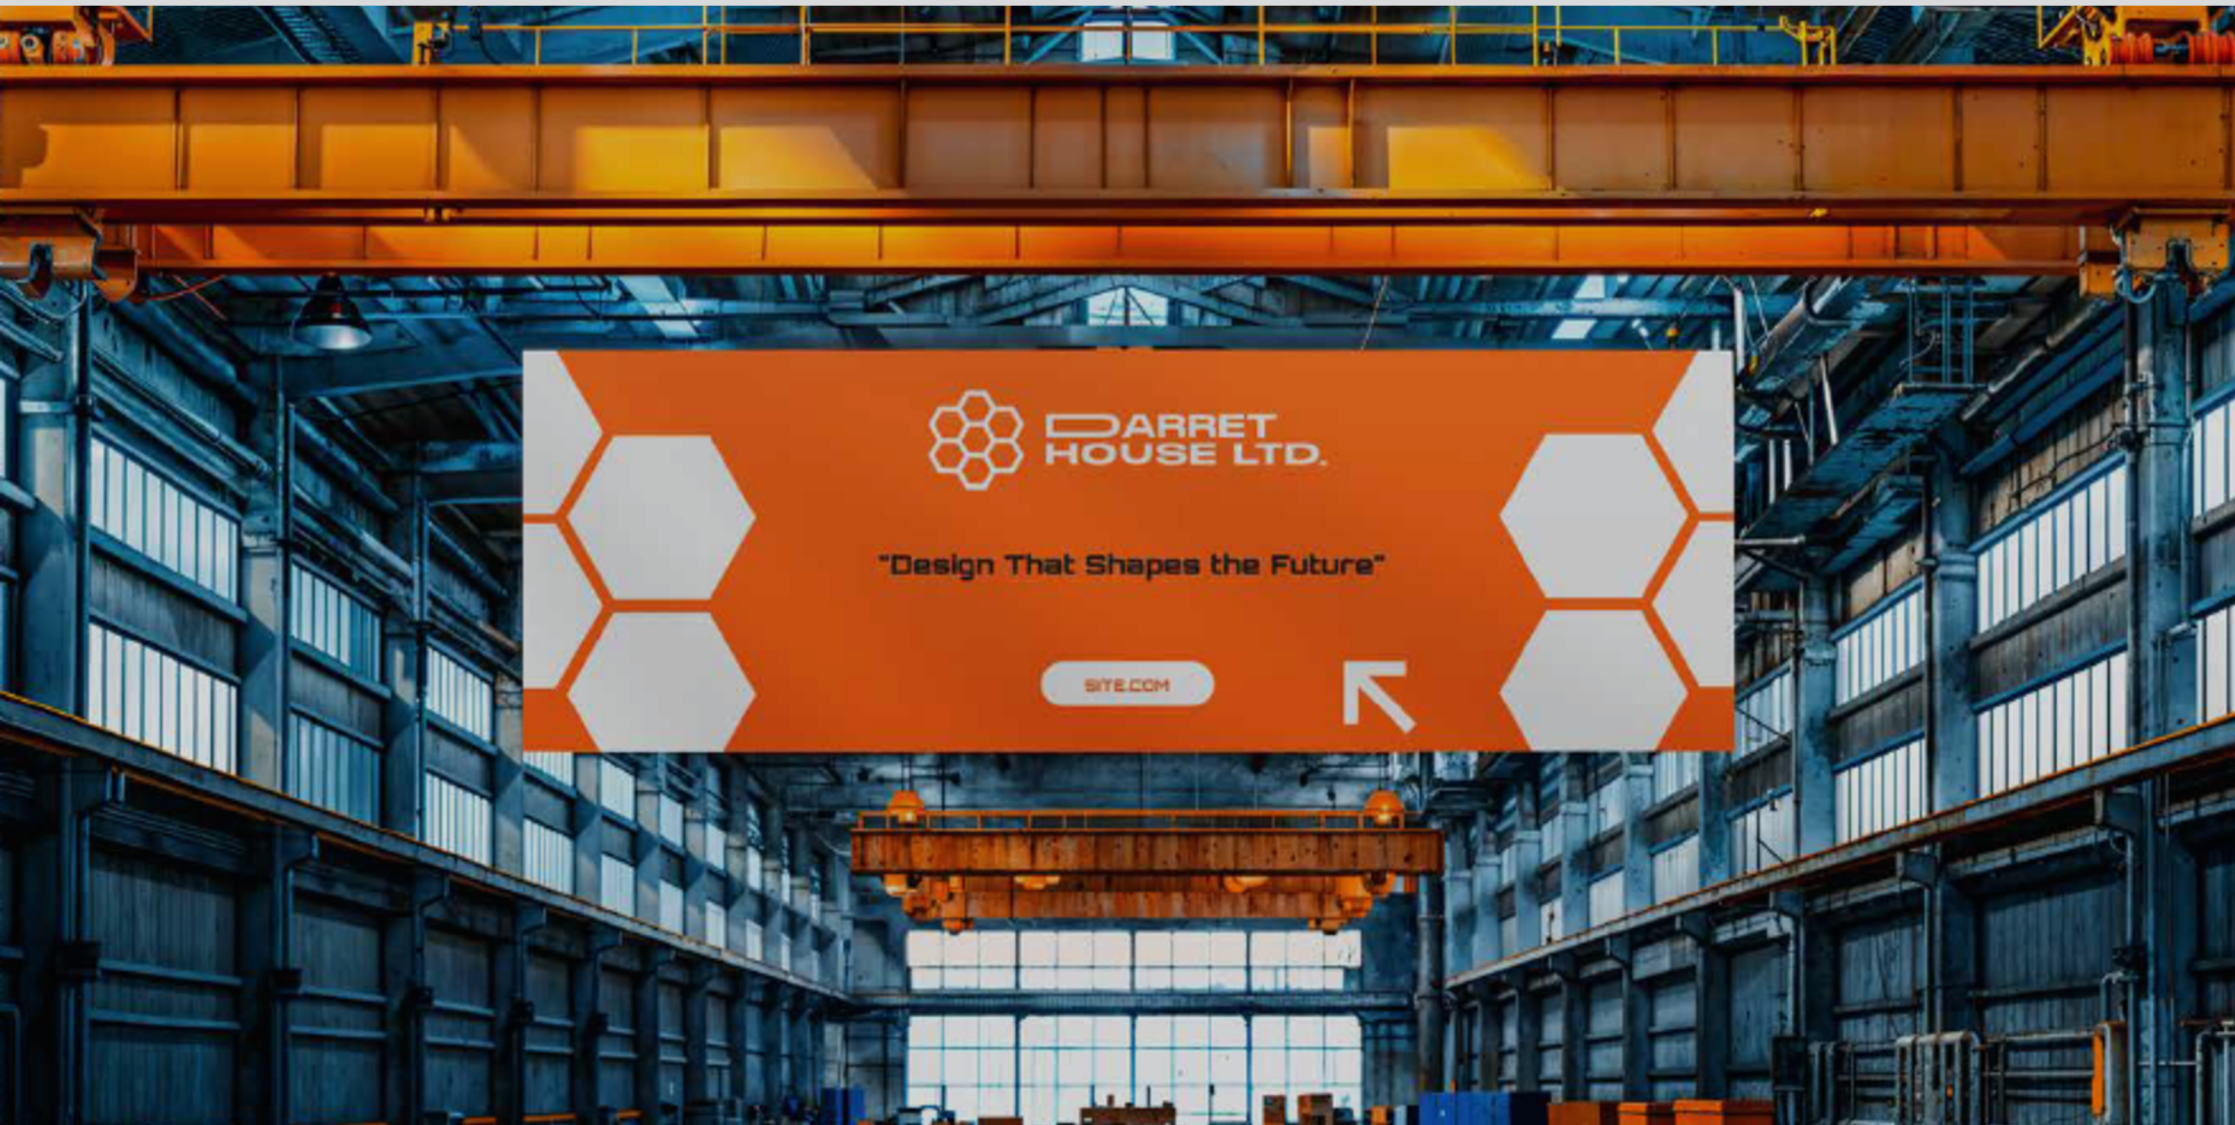

# WELCOME TO OUR COMPANY

## Fabrication of metal structures and reinforcement products

Our commitment to delivering top-notch steel manufacturing and fabrication solutions globally reflects your dedication to excellence in the industry. By leveraging world-class fabrication techniques and a team of professional experts, we ensure that our clients receive the best possible results for their projects. Our use of high-grade steel underscores your commitment to quality and durability, providing clients with reliable and long-lasting structures. Focus on safety code compliance and meeting customer requirements demonstrates our dedication to ensuring the well-being of both workers and end-users while also meeting client expectations. By going the extra mile in every aspect of our work, we set a high standard for steel fabrication and manufacturing, positioning our company as a leader in the industry.

That's great to hear about the history and development of Our company since its founding in 2004. It's impressive to see how We have navigated through changing markets and gained the trust of Our customers and partners over the years. Building a strong reputation and relationships with clients is crucial for long-term success in any business, and it sounds like We have done a great job in that regard. It's always inspiring to see companies evolve and adapt to the ever-changing business landscape, and it's a testament to Our dedication and hard work. We wish continued success in the future and look forward to seeing what new achievements and milestones company will reach in the years to come.

Whether it is the manufacture of reinforcement products or the manufacture of steel structures, our experience has been honed over many years of painstaking work that we have done over 20 years.

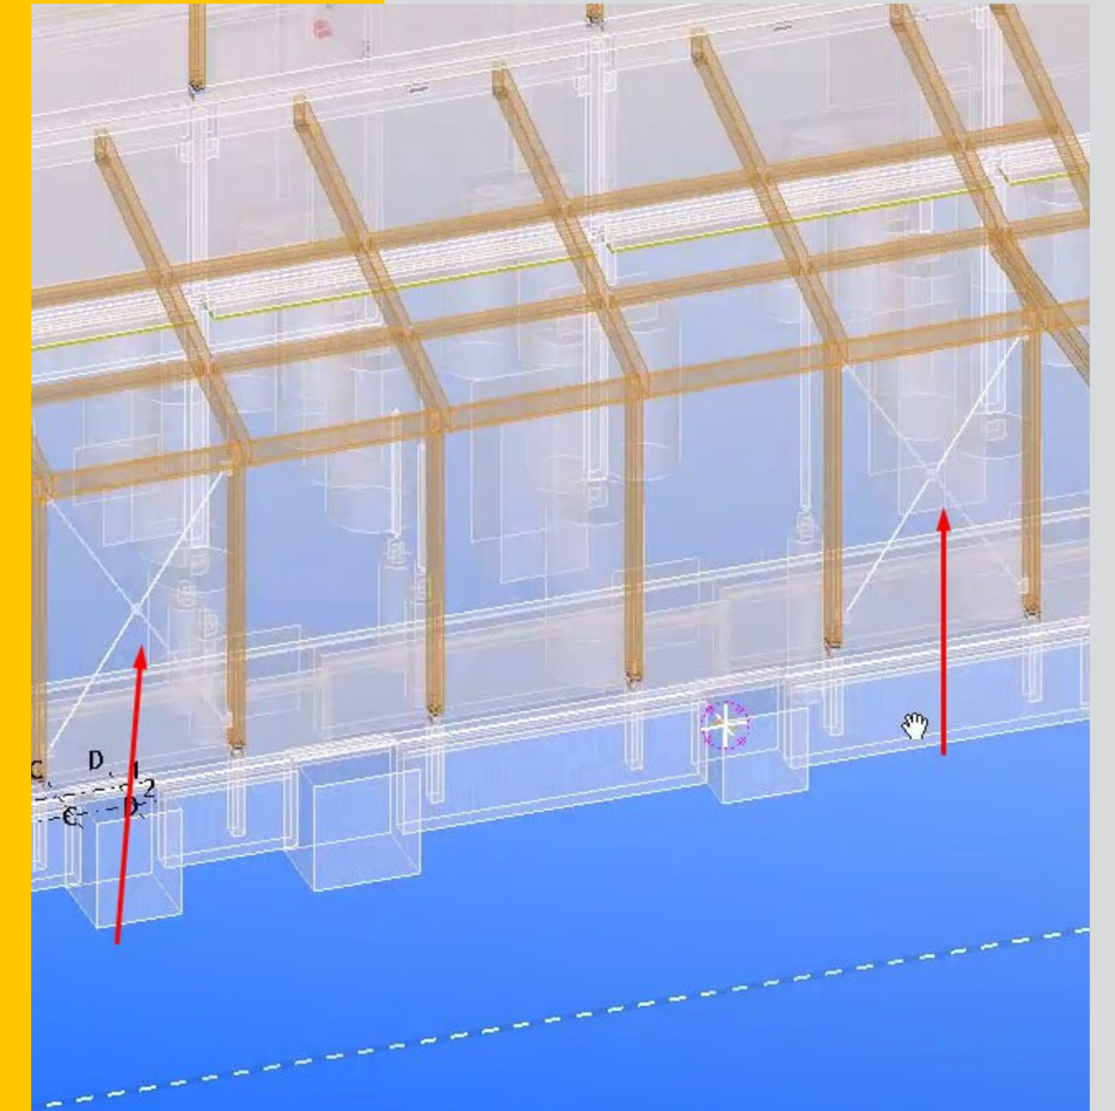

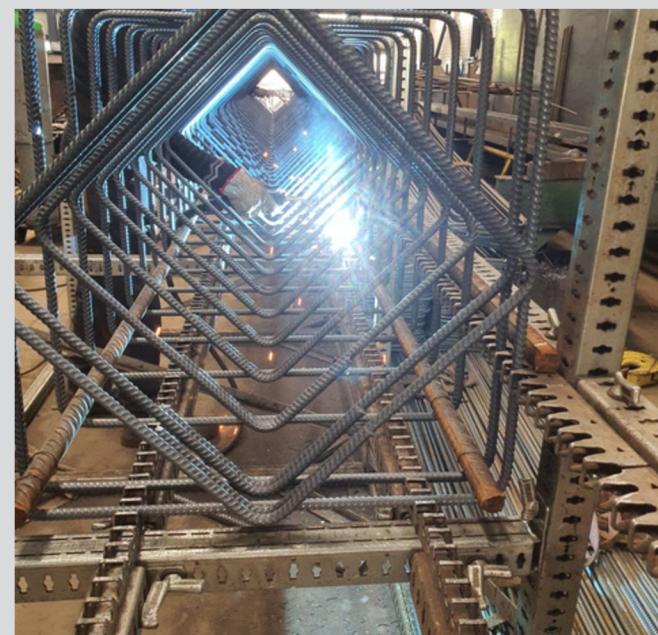

# ABOUT "DARRET HOUSE" LTD.

# VISION & MISSION

By producing our own reinforcement and metal structures, we are able to closely control the quality of these crucial components. This ensures that they meet our exact specifications and are of the highest standard. Additionally, having our own production capabilities allows us to be more flexible and responsive to changes in design or construction requirements. We can quickly adjust our production processes to meet the needs of each individual project, saving time and reducing costs.

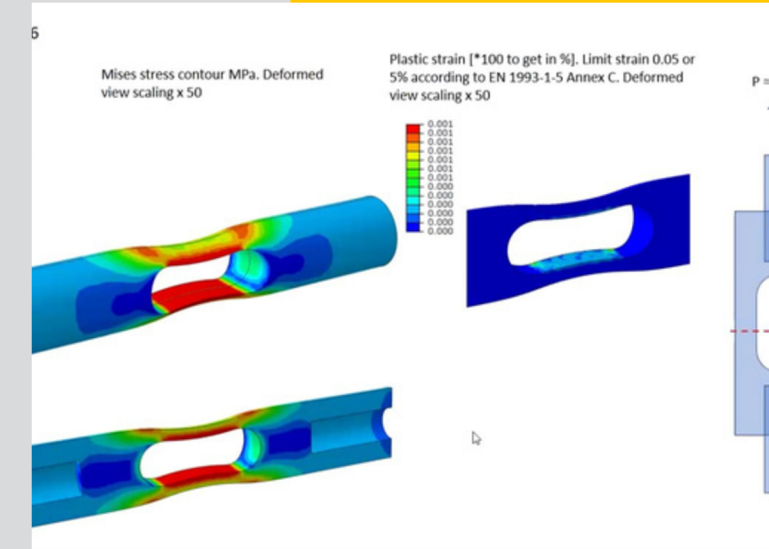

Furthermore, by integrating the production of reinforcement and metal structures into our construction cycle, we are able to streamline the entire process. This means that we can coordinate the delivery of these components with the construction schedule, ensuring that they are available when needed and avoiding delays. It also allows us to optimize the design and construction of the entire project, leading to more efficient and cost-effective outcomes.

# OUR COMPANY SERVICE

- 01** Engineering service:  
Steel structures, concrete, timber, tender offer calculation, reinforcement detailing.
  
- 02** Fabrication of steel structures:  
Commercial, housing, infrastructure projects, energy infrastructure steel structures, marines. Sandblasting, painting, hot deep galvanising, fire resistance coating. EN 1090
  
- 03** Reinforcement fabrication:  
Cutting, bending, Welded cages, beams, pillars, pile cages. reinforcement meshes. Rebars threading. Lenton systems. Spirals. Radius bended. Fabrication according to any shape codes from 5mm to 40mm. ISO17760; SFS1267; EN10080

Whether it is the manufacture of reinforcement products or the manufacture of steel structures, our experience has been honed over many years of painstaking work that we have done over 20 years.

# OUR COMPANY SERVICE

04

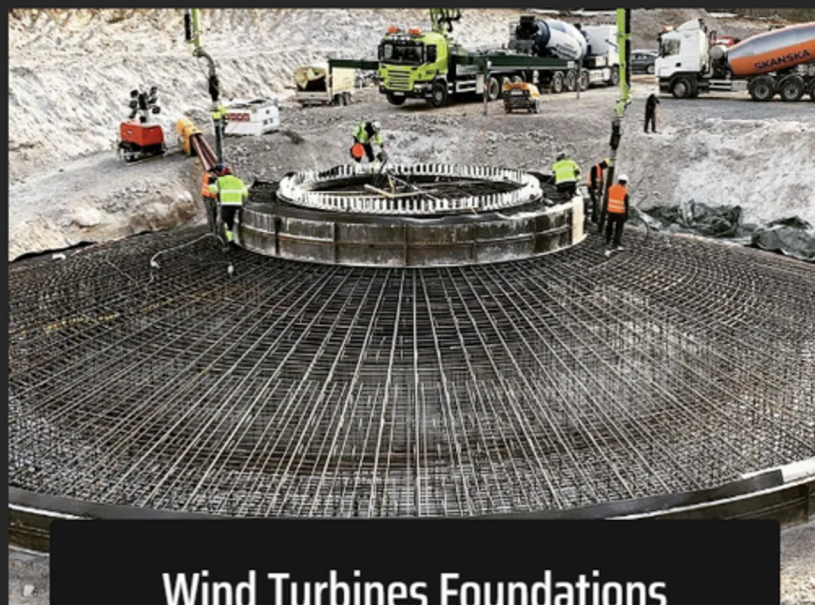

We provide concrete works and turn-key projects in housing or commercial construction, in Baltic states.

By producing our own reinforcement and metal structures, we are able to closely control the quality of these crucial components. This ensures that they meet our exact specifications and are of the highest standard. Additionally, having our own production capabilities allows us to be more flexible and responsive to changes in design or construction requirements. We can quickly adjust our production processes to meet the needs of each individual project, saving time and reducing costs. Furthermore, by integrating the production of reinforcement and metal structures into our construction cycle, we are able to streamline the entire process. This means that we can coordinate the delivery of these components with the construction schedule, ensuring that they are available when needed and avoiding delays. It also allows us to optimize the design and construction of the entire project, leading to more efficient and cost-effective outcomes. Overall, our ability to produce reinforcement and metal structures in-house gives us a competitive edge in the construction industry. It allows us to meet the high demands of function and quality, while also providing us with greater control and flexibility throughout the construction process.
