PROFESSIONAL SUMMARY

Structural Engineer with a strong academic background (Bachelor's and Master's degrees in Civil Engineering)

and hands-on experience in reinforced concrete design, structural analysis, and site engineering.

Experienced in developing safe, efficient, and code-compliant structural systems.

Currently seeking a full-time position in the Netherlands in building design and structural engineering.

KEY SKILLS

- Structural Design of Reinforced Concrete Buildings
- Slab, Raft, and Foundation Design
- Load Calculations & Structural Drafting
- Site Supervision & Quality Control
- Multidisciplinary Coordination
- Problem Solving & Communication

PROFESSIONAL EXPERIENCE

Structural Engineer - Riyadh, Saudi Arabia (Sep 2021 - Aug 2024)

- Designed concrete structures for residential and commercial buildings
- Produced detailed structural analysis and engineering drawings
- Ensured compliance with safety codes and project integration

Site Engineer - Dalian, China (Jan 2021 - Sep 2021)

- Oversaw construction of reinforced concrete works
- Performed inspections and material testing on-site
- Resolved technical issues and collaborated with construction teams

Renovation Designer - Shanghai, China (Sep 2017 - Aug 2018)

- Designed floor plans and 3D layouts for renovation projects
- Conducted site visits and communicated directly with clients

EDUCATION

MSc Civil Engineering - Changchun Institute of Technology, China (2020)

BSc Civil Engineering - Wuhan University of Technology, China (2017)
