**FEEDS FOR PIGEONS,
PARROTS, AND RODENTS**

Our company proudly offers a wide range of top-quality products.

We specialize in producing high-quality feed for racing pigeons, parrots, and rodents, demonstrating an unparalleled level of professionalism and dedication to our craft.

To create our feeds, we pay special attention to selecting ingredients and raw materials. All components are sourced directly from certified manufacturers, guaranteeing their safety and quality. Additionally, the quality parameters of each type of feed raw material are laboratory-tested to ensure that every portion of feed meets the highest standards of safety and quality.

The composition of each feed is developed by Ukrainian veterinary specialists with many years of experience, providing a balanced diet for your pets. Using modern feed optimization programs, we create mixtures that precisely meet the physiological needs of pigeons, parrots, and rodents. We are confident that the quality of our feeds not only supports pets' health but also contributes to their active and happy lives.

ABOUT US

«Perlyna Stepu» is your reliable partner in the world of pets feeds.

«Perlyna Stepu» is one of Ukraine's leading manufacturers of pet food. Founded in 2011, our company has traveled an exciting path filled with challenges, innovations, and achievements. Today, «Perlyna Stepu» is associated with high quality and care for the health and well-being of your pets in many countries.

The story of the company began with a small team of enthusiasts who dreamed of creating feeds that maximally met the needs of pets. From the very beginning, we were convinced that healthy nutrition is the key to a happy life for animals. The support of a veterinary specialist in the initial stages of the company's development was an important factor in shaping our products. Thanks to expert knowledge, we were able to develop formulas that not only meet modern quality standards but also consider the specific needs of different species and breeds.

Over the years, our company has successfully adapted to market changes, taking into account new trends and scientific achievements in veterinary medicine and animal nutrition. This allows us to offer products that meet all modern requirements and standards. Our team regularly conducts research and development to ensure we remain at the forefront of innovation in feed production.

We understand that your animals are members of your family. Therefore, we set an ambitious goal: only the best for them.

Our products are made from natural ingredients without harmful additives or preservatives. We strive for every portion of feed to be not only tasty but also beneficial for your pets' health.

We engage in contract cultivation of grain, legume, and oilseed crops, which are essential components of our feeds, with verified suppliers. We control the grain cultivation process from sowing to harvest. To ensure that our products meet high-quality standards, the company uses equipment from leading companies.

Grain cleaning using Petkus machinery lays a strong foundation for improving the quality of the material throughout the entire technological chain of its processing. During the cleaning of each grain batch, both coarse and fine impurities, foreign matter, and shriveled and broken grains are carefully and gently removed. Therefore, raw material cleaning is also a protection for your pet.

Another way to increase the efficiency of ingredient separation in the seed cleaning complex is fractionation using a Buhler photoelectric separator at the final stage of seed processing. This allows us to separate unfilled and shriveled seeds by color.

All ingredients undergo laboratory control, where their purity, moisture content, presence of pests, chemical composition, and nutritional value are studied.

Grain is stored at the production site and then mixed to ideal proportions for your pets. Storage and treatment of raw materials with fumigants prevent the appearance of pests.

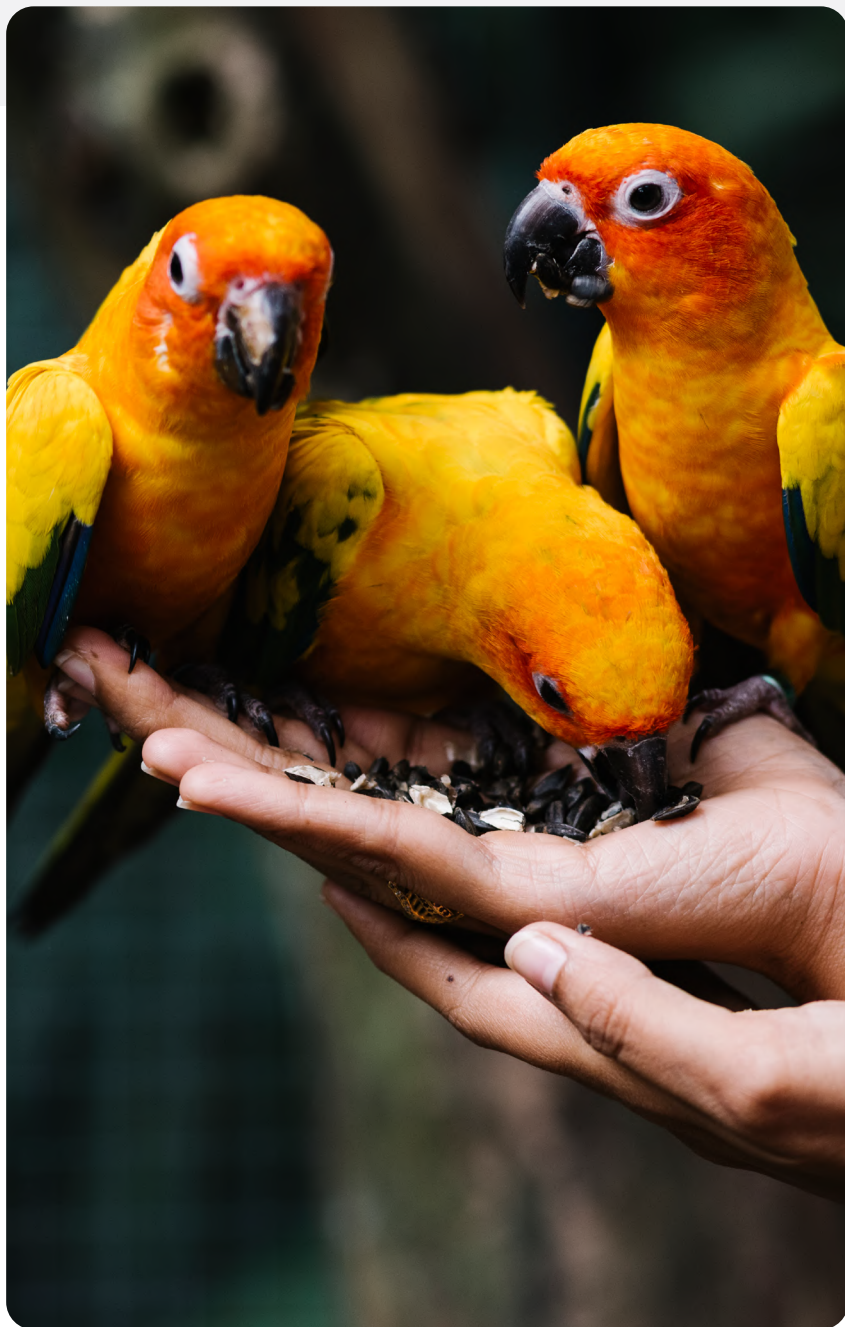

All stages of production ensure safety and quality according to HACCP system criteria.

We do not use preservatives in our production.

We invite you to explore our assortment and find the perfect feed for your pet.

**«Perlyna Stepu»
is not just feed;
it's a guarantee
of health, joy, and
a long life for your
animals. Thank you
for choosing us!**

OUR MISSION

At the heart of «Perlyna Stepu» lies an unconditional love for our pets and a sincere desire to provide them with the best quality of life. Our goal is to create perfect feeds that will be the foundation of your pets' health and happiness. We believe that proper nutrition plays a key role in shaping a healthy and active lifestyle for animals, and we strive to achieve this through several core principles.

We believe that active and healthy animals are happy animals. Therefore, our products are developed taking into account the physical needs of pets.

We offer various formulas that correspond to different life stages and activity levels of pets. Every feed we produce aims to support immunity, strengthen muscles, and prevent diseases.

Our team actively researches the needs of different species and breeds of birds and rodents to develop feeds that best meet these needs. We actively interact with veterinarians to ensure a scientific approach to feed production.

The process of producing feed for birds and rodents is not just a routine for us, but a true art.

We approach its organization with utmost seriousness, dedicating ourselves to our work with love, attention, and professionalism. The selection of grains, seeds, herbs, and other additives is based on scientific research and veterinary recommendations. This allows us to guarantee that each formula is enriched with the necessary vitamins, minerals, and other beneficial substances to support animal health.

The production process at «Perlyna Stepu» is innovative and technologically advanced. Using modern processing methods, we ensure optimal preservation of all beneficial properties of the ingredients. Every stage, from mixing components to packaging the finished product, is controlled. This prevents contamination and guarantees the high quality of the final product.

Our company not only produces feed but also adheres to the highest quality standards. Each batch of feed undergoes thorough inspection at all stages of production to ensure it meets our strict requirements. This applies not only to safety but also to taste, as we strive for those for whom our feeds are intended to receive only the best.

We understand that every pet owner prioritizes quality. We are a reliable partner for everyone who cares about their birds and rodents. We continue to grow, striving to create better conditions for animal health and well-being.

Thanks to our dedication to quality, innovation, and consumer needs, we have become one of the leaders in feed production in Ukraine.

PIGEONS**

**FEEDS FOR
PARROTS**

**FEEDS FOR
RODENTS**

FEEDS FOR PIGEONS

Pigeons, as one of the oldest domesticated birds, enjoy immense popularity due to their endurance, trainability, and beautiful appearance. These birds not only bring joy to their owners but also actively participate in sporting competitions and exhibitions.

Pigeons Mix

«Perlyna Stepu» has developed specialized feeds that consider all pigeons' nutritional needs and contribute to their health and well-being.

Our assortment is designed with simplicity and efficiency in feeding methods in mind, making it an ideal choice for both experienced bird keepers and beginners.

If you are a pigeon fancier, you know that feeding can be quite a complex process. Our line of feeds simplifies this process as it consists of ingredients that your birds easily digest. This not only saves you time but also provides adequate and complete nutrition for your birds.

Pigeons Mix

Unique Formula

Pigeons Mix feeds from «Perlyna Stepu» are created to meet the needs of all lovers of these beautiful birds.

Only Natural Ingredients

Top Quality Seed Mix

Essential Nutrition

Young Pigeons DM N° 44

Our formula takes into account all the necessary nutritional needs of pigeons, allowing their bodies to receive all essential elements for growth and development.

Feed rich in quality proteins and other nutrients will help young chicks grow faster and more energetically, and will also increase their ability to resist diseases.

Composition of Young Pigeons DM N° 44 feed:

vetch, white sorghum, red sorghum, popcorn, yellow peas, green peas, green split peas, paddy rice, safflower, yellow millet, Iregi sunflower, hulled oats

Analytical constituents:

crude protein – 15.2%, crude oils and fats – 5.4%, fiber – 6.8%

Breeding Pigeons MR 027

A high-quality blend of grains was developed to ensure optimal growth and development of young pigeons, especially during the critical feeding period and for the first 2–3 months of life.

Balanced nutrition ensures not only good growth and development but also the pigeons' ability to withstand loads, maintaining an active lifestyle.

Composition of Breeding Pigeons MR 027 feed:

vetch, white sorghum, red sorghum, wheat, red corn, popcorn, yellow peas, green peas, green split peas, safflower, black sunflower

Analytical constituents:

crude protein – 16.9%, crude oils and fats – 5.3%, fiber – 10.8%

Flight Energy Extra Sport LE

This formula is distinguished by its rich composition, taking into account all the basic nutritional needs of birds.

The feed provides an ideal balance of proteins, fats, and carbohydrates, so young pigeons receive energy for an active life.

Composition of Flight Energy Extra Sport LE feed:

rapeseed, canary seed, white sorghum, red sorghum, brown corn, red corn, popcorn, paddy rice, flaxseed, safflower, mung bean, red millet, yellow millet, Iregi sunflower, hulled sunflower, hemp, hulled oats

Analytical constituents:

crude protein – 17.1%, crude oils and fats – 4.7%, fiber – 5.5%

Flight Super Energy LSE

The feed contains oilseeds such as safflower, hemp, and flax, which are rich in unsaturated fatty acids.

These ingredients contribute to energy accumulation, allowing pigeons to endure long distances and improve results during competitions.

Composition of Flight Super Energy LSE feed:

rapeseed, canary seed, white sorghum, red sorghum, red corn, brown corn, popcorn (small corn), paddy rice, flaxseed, safflower, mung bean, red millet, Iregi sunflower, hulled sunflower, hemp, hulled oats, buckwheat

Analytical constituents:

crude protein – 19.1%, crude oils and fats – 8.3%, fiber – 5.2%

BSS Pigeon Loft

This blend provides a balance of amino acids, vitamins, and minerals necessary for optimal development and vitality.

The high bioavailability of all ingredients makes the feed easy to digest, which is critically important during competitions when rapid energy recovery significantly affects results.

Composition of BSS Pigeon Track feed:

rapeseed, vetch, white sorghum, red sorghum, wheat, popcorn (small corn), yellow peas, green peas, green split peas, flaxseed, safflower, red millet

Analytical constituents:

crude protein – 16.8%, crude oils and fats – 6.2%, fiber – 5.9%

Widower Super Flight WSL

This blend is designed to maintain optimal energy levels and physical fitness in pigeons, providing them with all the necessary micro and macro elements that contribute to their productivity.

During competitions, pigeons need high-quality sources of proteins, fats, and carbohydrates for maximum energy recovery.

Composition of Widower Super Flight WSL feed:

canary seed, white sorghum, red corn, popcorn, yellow corn, yellow peas, green peas, green split peas, paddy rice, safflower, mung bean, hemp

Analytical constituents:

crude protein – 17.3%, crude oils and fats – 5.5%, fiber – 4.6%

Super Diet Medvedenko

A blend of easily digestible grains, created to stabilize the physiological state of birds and optimize metabolic processes in their bodies after heavy loads.

The purpose of this feed is to support energy and balanced nutrition, allowing pigeons to effectively adapt to stressful situations associated with competitions.

Composition of Super Diet Medvedenko feed:

canary seed, white sorghum, red sorghum, wheat, barley, yellow corn, green peas, paddy rice, flaxseed, safflower, mung bean, yellow millet, red millet, hemp, hulled oats, buckwheat

Analytical constituents:

crude protein – 16.1%, crude oils and fats – 4.7%, fiber – 5.8%

Special Diet DS

Thanks to its optimally selected composition, the feed is quickly digested, allowing pigeons to quickly recover strength after physical exertion.

The feed contains ingredients that help normalize metabolic processes in the body, which is especially important for sporting pigeons.

Composition of Special Diet DS feed:

canary seed, white sorghum, red sorghum, wheat, barley, paddy rice, flaxseed, safflower, mung bean, yellow millet, red millet, hemp, hulled oats, buckwheat

Analytical constituents:

crude protein – 16.2%, crude oils and fats – 5.2%, fiber – 7%

Molting Medvedenko ML 107

A balanced feed designed for the molting period of pigeons.

It contains all the necessary grains for fast and high-quality molting, ensuring proper feather growth and development.

Composition of Molting Medvedenko ML 107 feed:

rapeseed, canary seed, white sorghum, red sorghum, wheat, barley, red corn, yellow corn, yellow peas, green peas, brown split peas, green split peas, paddy rice, flaxseed, safflower, mung bean, yellow millet, black sunflower, hulled oats

Analytical constituents:

crude protein – 15.1%, crude oils and fats – 5.9%, fiber – 8.3%

Molting ML 103 (Wheat-Free)

Thanks to its balanced composition, the feed promotes energy recovery and improved feather quality.

Its balanced composition and rich nutrient content make it an ideal choice for bird breeders who strive to give their pigeons the best.

Composition of Molting ML 103 Wheat-Free feed:

rapeseed, vetch, white sorghum, red sorghum, barley, brown corn, yellow corn, yellow peas, green peas, green split peas, paddy rice, flaxseed, safflower, mung bean, red millet, yellow millet, Iregi sunflower, lentils

Analytical constituents:

crude protein – 14.8%, crude oils and fats – 6.1%, fiber – 8.2%

Universal UA88

Proper nutrition plays a key role in supporting the immune system, energy levels, and reproductive processes.

The right choice of feed and its balanced use will help maintain pigeon health and ensure their activity and productivity.

Composition of Universal UA88 feed:

white sorghum, red sorghum, barley, brown corn, yellow corn, yellow peas, green peas, green split peas, paddy rice, safflower, mung bean, yellow millet, Iregi sunflower, hulled oats, buckwheat

Analytical constituents:

crude protein – 14.8%, crude oils and fats – 4.7%, fiber – 8.2%

DK 75 New for Decorative Pigeons

This specialized mix, providing them with essential vitamins, minerals, and other beneficial substances.

This formula has a high protein content, which promotes better absorption and acts as the main building material for the tissues and organs of birds.

Composition of DK 75 New feed:

rapeseed, vetch, white sorghum, red sorghum, barley, red corn, popcorn, yellow peas, green peas, green split peas, paddy rice, safflower, mung bean, red millet, yellow millet, Iregi sunflower, hemp

Analytical constituents:

crude protein – 16.2%, crude oils and fats – 5.8%, fiber – 5.4%

**Only Natural
Ingredients**

**Top Quality
Seed Mix**

**Essential
Nutrition**

The composition of «Budgies Mix» includes various types of millet, oats, and naturally colored biscuits, which provide birds with not only tasty but also healthy nutrition. Millet, thanks to its natural fiber content, ensures optimal nutrient density.

Safflower, also contained in the feed, is of considerable importance. This ingredient is an ideal source of protein and Omega-6, essential for maintaining the physical fitness of budgies.

These biscuits contain natural substances known as xanthophylls, which positively affect the pigmentation of birds' feathers.

Packaging:
500 g, 1 kg, 20 kg.

Seed Mix

Essential
Nutrition

In our assortment, you'll find specially formulated food containing natural ingredients that can positively impact your canaries' overall health and emotional well-being.

One of the main components of our feed is canary seeds, which are a rich source of Omega-3 fatty acids. These beneficial fats help improve feather condition, making them bright and shiny. Omega-3 also positively affects the overall health of canaries, strengthening their immune system and helping to prevent many diseases.

Our mix also contains a blend of oats, known for their beneficial digestive properties. Oats help regulate digestion, which is especially important for small birds. Strengthening immunity and improving digestion are key elements that allow canaries to remain active and singing.

Composition of Canary Mix feed:

Cereals:	black millet, red millet, yellow millet, naked oats, black oats, rapeseed
Seeds:	canary seed, flax
Bakery products:	colored biscuit
Analytical constituents:	
crude protein – 17%, crude ash – 4.1%, crude oils and fats – 19%, moisture – 9.6%, crude fiber – 5%

Essential
Nutrition

The foundation of this feed is an optimal protein level, which promotes muscle development and overall body strengthening. The beneficial fats included in the composition improve metabolism, providing energy and supporting the vital functions of the birds.

Various types of millet, which are part of the diet, along with several kinds of oats, are an excellent source of fiber. This is crucial for the digestive health of small birds, as fiber helps normalize intestinal function. Furthermore, these grains contain important minerals, including iron and magnesium, which are essential for maintaining overall health.

Composition of Exotic Mix feed:	
Cereals:	black millet, red millet, yellow millet, white millet, hulled oats
Seeds:	canary seed, flaxseed, safflower
Bakery products:	colored biscuit
Analytical constituents:	
crude protein – 13%, crude ash – 2.12%, crude oils and fats – 5%, moisture – 12%, crude fiber – 4%	

Packaging:

Essential
Nutrition

Healthy digestion is the foundation of your parrots' well-being, and we carefully select ingredients to maintain this process at a high level.

For medium parrots, known for their robust health, a diet should be diverse yet simple. The basis of their nutrition is a grain mixture, which is a source of essential vitamins and minerals.

The high-calorie grain we use is rich in vitamins A, B, and E and is easily digestible. This is especially important for active parrots, who need a constant supply of energy for their games and fun.

Our products are created with great care for your feathered friends, allowing you to be confident in their well-being.

Composition of Medium Mix feed:

Cereals:	wheat, paddy rice, black millet, red millet, yellow millet, naked oats, hulled oats, black oats, rape
Seeds:	canary grass, flax, safflower, black sunflower, sunflower hybrid, hemp
Bakery products:	colored biscuit
Analytical constituents:	
crude protein – 15%, crude ash – 2.3%, crude oils and fats – 10%, moisture – 10.8%, crude fiber – 4%

Nutrition

Among the main components of our feed are bananas, which are a source of potassium and B vitamins. Potassium helps normalize heart and muscle function, while B vitamins support the birds' nervous system and metabolism.

White sunflower and Jaguar seeds are another important element in the feed, as they are rich in unsaturated fats and have antioxidant properties. These ingredients help maintain healthy skin and plumage and also strengthen the parrots' immune system.

Safflower seeds in the feed act as a natural biostimulant, helping to boost the birds' metabolism and possessing anti-inflammatory properties. This makes it easier for your parrots to digest food and absorb essential nutrients.

Composition of Large Mix feed:

Cereals:	red sorghum, wheat, brown corn, yellow corn, paddy rice, naked oats, buckwheat
Seeds:	safflower, Jaguar sunflower, white sunflower
Fruits/vegetables:	banana, carrot, pumpkin, chili pepper, carob
Nuts:	peanuts

PREMIUM MENU

COMPLETE FEED FOR GUINEA PIGS

Your guinea pigs deserve the best, and we offer a complete and tasty food specifically developed to meet their nutritional needs. Our food, consisting of vegetables, grains, and pellets, helps maintain the health and activity of guinea pigs.

Unique
Formula

Only Natural
Ingredients

Top Quality
Seed Mix

Essential
Nutrition

The uniqueness of our food lies in its enrichment with stabilized vitamin C, which is vital for guinea pigs.

These animals cannot synthesize vitamin C on their own, so they get it exclusively from their food. A balanced intake of vitamin C helps support the immune system, skin health, and prevents a range of diseases.

Among the main components of our food are raisins, which are rich in natural sugars, iron, and antioxidants. These ingredients help improve your pet's energy levels and positively affect digestion. They help guinea pigs' bodies resist external aggressive factors and stay lively.

Composition of Premium Menu complete feed for guinea pigs

Cereals:	alfalfa pellets with vitamin C, pressed oats, pressed peas, wheat, barley, red corn, popcorn (small corn), red sorghum, paddy rice, mung beans, oat husks, black oats, buckwheat, lentils
Seeds:	flaxseed, safflower, hemp seed
Fruits/vegetables:	dried apple, rosehip, raisins, dried beetroot, dried carrot, dried pumpkin, apple pomace, carob
Analytical constituents:	
crude protein – 16%, crude ash – 8%, crude oils and fats – 3%, moisture – 13%, crude fiber – 13%
