EGG BANK. EMBRYOLOGICAL PART

HOW DO WE WORK?

1. Use only certified media (Global, Gynotec, Cryotech).
2. Select for freezing only 60-70% of the obtained oocytes.
3. Denudation 1 hour after OPU, vitrification no later than 2 hours after OPU.
4. Freeze 2 oocytes per straw.
5. Use RI Witness system for quality control.
6. All employees have experience in international cooperation.

**Responsible person for quality control: IVF Lab Director Mykola Yaroshyk
(Certified trainer by M.Kuwayama)**

OUR RESULTS BASED ON THE EXPERIENCE OF OUR PARTNERS:

- Survival rate - 93+%
- Fertilization rate - 85+%
- GQ D3 - 67%
- Blastulation rate - 52%
- Embryo utilization rate - 55%
- Clinical pregnancy rate- 63%

OUR TIPS FOR GETTING THE BEST RESULTS.

1. Follow the manufacturer's instructions (Crytech/Kitazato).
2. Fertilize one hour after thawing.
3. Use Artificial Oocyte Activation.
